Cave City, Kentucky William Basil Gillenwater Lock Box 227

June 14, 1954

Due to the excessive foliage I was unable to locate the larger trees that had mature burrs in the latter part of last August, however, I did locate a number of smaller trees which appeared to be shoots or suckers coming up from the roots of the old stumps. I hope to have an opportunity in the season to locate the trees that had seemingly borne mature fruit last year, and if and when I locate these trees I will communicate with you further.

CLINTON, KY.

C. B. Hilliard
