- MWH<sub>CCEO</sub> = the total number of RECs sold (in MWhs) to Connecticut customers through the Connecticut Clean Energy Options program in the year prior to the vintage year of the CO<sub>2</sub> allowances to be retired;
- MWH<sub>RECS</sub> = the total number of RECs from renewable energy sources located within any participating state sold (in MWhs) to Connecticut customers through means other than the Connecticut Clean Energy Options program in the year prior to the vintage year of the CO<sub>2</sub> allowances to be retired;
- (B) If the total number of allowances calculated to be retired pursuant to subparagraph (A) of this subdivision exceeds the number of CO<sub>2</sub> allowances held in the Voluntary Clean Energy Purchase Set-aside Account, then the number of CO<sub>2</sub> allowances to be retired shall be equal to the total number of CO<sub>2</sub> allowances allocated in the Voluntary Clean Energy Purchase Set-aside Account pursuant to subdivision (4)(A) of this subsection;
- (C) If the total number of allowances calculated to be retired pursuant to subparagraph (A) of this subdivision is less than the number of CO<sub>2</sub> allowances held in the Voluntary Clean Energy Purchase Set-aside Account, then allowances from the Voluntary Clean Energy Purchase Set-aside Account not allocated for a vintage year shall be transferred to the Connecticut Auction Account, from which such allowances shall be auctioned in accordance with subdivision (5) of this subsection;

- (5) Compliance.
- (A) Allowances available for compliance deduction. CO<sub>2</sub> allowances that meet the following criteria are available to be deducted in order for a CO<sub>2</sub> budget source to comply with the requirements of subsection (b)(3) of this section for a control period or an interim control period.
    - (i) The CO<sub>2</sub> allowances are of allocation years that fall within a prior control period, the same control period, or the same interim control period for which the allowances will be deducted; and
    - (ii) The CO<sub>2</sub> allowances are held in the CO<sub>2</sub> budget source's compliance account as of the CO<sub>2</sub> allowance transfer deadline for that control period or interim control period or are transferred into the compliance account by a CO<sub>2</sub> allowance transfer correctly submitted for recordation under subsection (h)(1) of this section by the CO<sub>2</sub> allowance transfer deadline for that control period or interim control period;
  - (B) For CO<sub>2</sub> offset allowances, the number of CO<sub>2</sub> offset allowances that are available to be deducted in order for a CO<sub>2</sub> budget source to comply with the requirements of subsection (b)(3) of this section for a control period or an interim control period may not exceed three and three tenths (3.3) percent of the CO<sub>2</sub> budget source's CO<sub>2</sub> emissions for that control period, or of one-half of the CO<sub>2</sub> budget source's CO<sub>2</sub> emissions for an interim control period, as determined in accordance with subsection (i) of this section;
  - (C) CO<sub>2</sub> allowances are not necessary for deductions for excess emissions for a prior control period under subparagraph (G) of this subdivision;
  - (D) Deductions for compliance. Following the recordation, in accordance with subsection (h)(2) of this section, of CO<sub>2</sub> allowance transfers submitted for recordation in the CO<sub>2</sub> budget source's compliance account by the CO<sub>2</sub> allowance transfer deadline for a

control period or interim control period, the commissioner shall deduct CO<sub>2</sub> allowances available under subparagraph (A) of this subdivision to cover the source's CO<sub>2</sub> emissions, as determined in accordance with subsection (i) of this section, for the control period or interim control period, as follows:

- (i) Until the amount of CO<sub>2</sub> allowances deducted equals the number of tons of total CO<sub>2</sub> emissions, or one-half of the number of tons of total CO<sub>2</sub> emissions for the interim control period, less any CO<sub>2</sub> emissions attributable to the burning of eligible biomass, determined in accordance with subsection (i) of this section, from all CO<sub>2</sub> budget units at the CO<sub>2</sub> budget source for the control period or interim control period; or
  - (ii) If there are insufficient CO<sub>2</sub> allowances to complete the deductions in clause (i) of this subparagraph, until no more CO<sub>2</sub> allowances available under subparagraph (A) of this subdivision remain in the compliance account;
- (E) Identification of CO<sub>2</sub> allowances by serial number. The CO<sub>2</sub> authorized account representative for a source's compliance account may request that specific CO<sub>2</sub> allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period or interim control period in accordance with subparagraph (D) or (G) of this subdivision. Such identification shall be made in the compliance certification report submitted in accordance with subsection (e)(1) of this section;
- (F) The commissioner shall deduct CO<sub>2</sub> allowances for a control period or interim control period from the CO<sub>2</sub> budget source's compliance account, in the absence of an identification or in the case of a partial identification of CO<sub>2</sub> allowances by serial number under subparagraph (E) of this subdivision, in the following order:
- (i) The commissioner shall first deduct CO<sub>2</sub> offset allowances subject to the relevant compliance deduction limitations under subparagraphs (D) and (G) of this subdivision. CO<sub>2</sub> offset allowances shall be deducted in chronological order (i.e., CO<sub>2</sub> offset allowances from earlier allocation years shall be deducted before CO<sub>2</sub> offset allowances from later allocation years). In the event that chronological order cannot be determined, the commissioner shall deduct CO<sub>2</sub> offset allowances by serial number, with lower serial numbered CO<sub>2</sub> offset allowances deducted before higher serial number allowances; and
  - (ii) The commissioner shall next deduct any CO<sub>2</sub> allowances, other than CO<sub>2</sub> offset allowances, that are available for deduction under subparagraph (A) of this subdivision. CO<sub>2</sub> allowances shall be deducted in chronological order (i.e., CO<sub>2</sub> allowances from earlier allocation years shall be deducted before CO<sub>2</sub> allowances from later allocation years). In the event that chronological order cannot be determined, the commissioner shall deduct CO<sub>2</sub> allowances by serial number, with lower serial numbered CO<sub>2</sub> allowances deducted before higher

serial number allowances.

- (G) Deductions for excess emissions. After making the deductions for compliance under subparagraph (D) of this subdivision, the commissioner shall deduct from the CO<sub>2</sub> budget source's compliance account a number of CO<sub>2</sub> allowances, from allocation years that occur after the control period in which the source has excess emissions, equal to three times the number of the source's excess emissions. No CO<sub>2</sub> offset allowances shall be deducted to account for the source's excess emissions. Any such CO<sub>2</sub> allowance deduction shall not affect the liability of the owners and operators of the CO<sub>2</sub> budget source or the CO<sub>2</sub> budget sources at the source for any fine, penalty or assessment, or their obligation to comply with any other remedy, for the same violation, as ordered under applicable state law. When assessing fines, penalties or other obligations, the commissioner shall:
- (i) Consider each day in the control period a day in violation when determining the number of days of violation if a CO<sub>2</sub> budget source has excess emissions for a control period unless the owner or operator of the source demonstrates that a lesser number of days should be considered;
  - (ii) Consider each ton of excess emissions as a separate violation;
  - (iii) Consider each day in the interim control period a day in violation when determining the number of days of violation if a CO<sub>2</sub> budget source has excess interim emissions for an interim control period unless the owner or operator of the source demonstrates that a lesser number of days should be considered; and
  - (iv) Consider each ton of excess interim emissions as a separate violation.
- (H) The commissioner shall record in the appropriate compliance account all deductions from such an account pursuant to subparagraphs (D) and (G) of this subdivision; and
- (I) Action by the commissioner on submissions. The commissioner may review and conduct independent audits concerning any submission under the CO<sub>2</sub> Budget Trading Program and make appropriate adjustments of the information in the submissions, including but not limited to, deductions of CO<sub>2</sub> allowances from or transfer of CO<sub>2</sub> allowances to a source's compliance account based on information in any such submissions.
- (6) Banking. Each CO<sub>2</sub> allowance that is held in a compliance account or a general account shall remain in such account unless and until the CO<sub>2</sub> allowance is deducted or transferred under subdivision (5) or (7) of this subsection and under subsection (e)(2), or (h) of this section.
- (7) Account error. The commissioner may correct any error in any CO<sub>2</sub> Allowance Tracking System account. Not later than ten (10) business days of making such correction, the commissioner shall notify the CO<sub>2</sub> authorized account representative for the account.

- (8) Closing of general accounts. The commissioner may close a general account for one of the following reasons:
- (A) A CO<sub>2</sub> authorized account representative of a general account may instruct the commissioner to close the account by submitting a statement requesting deletion of the account from the CO<sub>2</sub> Allowance Tracking System and by correctly submitting for recordation under subsection (h)(1) of this section a CO<sub>2</sub> allowance transfer of all CO<sub>2</sub> allowances in the account to one or more other CO<sub>2</sub> Allowance Tracking System accounts; or
  - (B) If a general account shows no activity for a period of six years or more and does not contain any CO<sub>2</sub> allowances, the commissioner may notify the CO<sub>2</sub> authorized account representative for the account that the account shall be closed and deleted from the CO<sub>2</sub> Allowance Tracking System following twenty business days after the notice is sent. The account shall be closed after the twenty day period unless before the end of such twenty day period the commissioner receives a correctly submitted transfer of CO<sub>2</sub> allowances into the account under subsection (h)(1) of this section or a statement submitted by the CO<sub>2</sub> authorized account representative demonstrating to the satisfaction of the commissioner good cause as to why the account should not be closed.
- (h) CO<sub>2</sub> Allowance Transfers.**
- (1) Submission of CO<sub>2</sub> allowance transfers. The CO<sub>2</sub> authorized account representatives seeking recordation of a CO<sub>2</sub> allowance transfer shall submit the transfer to the commissioner. The CO<sub>2</sub> allowance transfer shall include the following information:
    - (A) The numbers identifying both the transferor and transferee accounts;
    - (B) A specification by serial number of each CO<sub>2</sub> allowance to be transferred; and
    - (C) The printed name and signature of the CO<sub>2</sub> authorized account representative of the transferor account and the date signed.
  - (2) Recordation.
    - (A) Not later than five (5) business days of receiving a CO<sub>2</sub> allowance transfer, except as provided in subparagraph (B) of this subdivision, the commissioner shall record a CO<sub>2</sub> allowance transfer by moving each CO<sub>2</sub> allowance from the transferor account to the transferee account as specified by the request, provided that:
      - (i) The transfer is correctly submitted under subdivision (1) of this subsection; and
      - (ii) The transferor account includes each CO<sub>2</sub> allowance identified by serial number in the transfer;

- (B) A CO<sub>2</sub> allowance transfer into or out of a compliance account that is submitted for recordation following the CO<sub>2</sub> allowance transfer deadline and that includes any CO<sub>2</sub> allowances that are of allocation years that fall within a control period prior to or the same as the control period to which the CO<sub>2</sub> allowance transfer deadline applies shall not be recorded until after completion of the process pursuant to subsection (g)(5)(D) of this section; and
  - (C) Where a CO<sub>2</sub> allowance transfer submitted for recordation fails to meet the requirements of subparagraph (A) of this subdivision, the commissioner shall not record such transfer.
- (3) Notification.
- (A) Notification of recordation. Not later than five (5) business days of recordation of a CO<sub>2</sub> allowance transfer under subdivision (2) of this subsection, the commissioner shall notify each party to the transfer. Notice shall be given to the CO<sub>2</sub> authorized account representatives of both the transferor and transferee accounts;
  - (B) Notification of non-recordation. Not later than ten (10) business days of receipt of a CO<sub>2</sub> allowance transfer that fails to meet the requirements of subdivision (2)(A) of this subsection, the commissioner shall notify the CO<sub>2</sub> authorized account representatives of both accounts subject to the transfer of:
    - (i) A decision not to record the transfer; and
    - (ii) The reasons for such non-recordation.
  - (C) Nothing in this section shall preclude the submission of a CO<sub>2</sub> allowance transfer for recordation following notification of non-recordation.
- (i) **Monitoring and Reporting.**
- (1) For the purposes of this subsection the definitions in subsection (a) of this section and in 40 CFR 72.2 shall apply. In the case of conflict or inconsistency between the definitions in subsection (a) of this section and in 40 CFR 72.2, the definition in subsection (a) of this section shall control. The terms “affected unit” and “designated representative” in 40 CFR 75 shall be replaced by the terms “CO<sub>2</sub> budget unit”, and “CO<sub>2</sub> authorized account representative”, respectively, as defined in subsection (a) of this section, except as otherwise provided. The definition of “continuous emission monitoring system” or “CEMS” in 40 CFR 75 shall be replaced with the definition in subsection (a) of this section. If a CO<sub>2</sub> budget unit is not subject to an acid rain emissions limitation, the term “Administrator” shall be replaced by the term “commissioner” as defined in subsection (a) of this section.
  - (2) The owner or operator and, to the extent applicable, the CO<sub>2</sub> authorized account representative of a CO<sub>2</sub> budget source shall comply with the monitoring, recordkeeping and reporting requirements as provided in this subsection. The owner or operator of a CO<sub>2</sub> budget source shall comply with the monitoring, recordkeeping and reporting requirements

set forth in 40 CFR 75 applicable to CO<sub>2</sub> mass emissions. The owner or operator of a CO<sub>2</sub> budget unit who monitors a non-CO<sub>2</sub> budget unit pursuant to the common, multiple, or bypass stack procedures in 40 CFR 75.72 (b)(2)(ii), or 40 CFR 75.16 (b)(2)(ii)(B) as pursuant to 40 CFR 75.13, for purposes of complying with this section, shall monitor and report CO<sub>2</sub> mass emissions from such non-CO<sub>2</sub> budget unit according to the procedures for CO<sub>2</sub> budget units established in subdivisions (2) to (8), inclusive, of this subsection.

- (A) Requirements for installation, certification, and data accounting. The owner or operator of each CO<sub>2</sub> budget source shall:
- (i) Install all monitoring systems necessary to monitor CO<sub>2</sub> mass emissions in accordance with 40 CFR 75, except for equation G-1. Equation G-1 in Appendix G of 40 CFR 75 shall not be used to determine CO<sub>2</sub> emissions under this section. This may require systems to monitor CO<sub>2</sub> concentration, stack gas flow rate, O<sub>2</sub> concentration, heat input and fuel flow rate;
  - (ii) Successfully complete all certification tests required under this subsection and meet all other requirements of this subsection and 40 CFR 75 applicable to the monitoring systems installed under subparagraph (A)(i) of this subdivision; and
  - (iii) Make and keep records, report and test for quality assurance of the data from the monitoring systems installed under subparagraph (A)(i) of this subdivision;
- (B) Compliance dates. The owner or operator shall meet the monitoring system certification and other requirements of subparagraphs (A)(i) to (A)(iii), inclusive, of this subdivision on or before the following dates:
- (i) The owner or operator of a CO<sub>2</sub> budget source that commences commercial operation before July 1, 2008, shall comply with the requirements of this subsection not later than January 1, 2009;
  - (ii) The owner or operator of a CO<sub>2</sub> budget source that commences commercial operation on or after July 1, 2008, shall comply with the requirements of this subsection by the later of January 1, 2009, or one hundred and eighty (180) calendar days after the date on which the source commences commercial operation; and
  - (iii) For the owner or operator of a CO<sub>2</sub> budget source for which construction of a new stack or flue installation is completed after the applicable deadline under clauses (i) or (ii) of this subparagraph by the earlier of ninety (90) source operating days after the date on which emissions first exit to the ambient air through the new stack or flue or one hundred and eighty (180) calendar days after the date on which emissions first exit to the ambient air through the new stack or flue;

- (C) Reporting data.
- (i) Except as provided in clause (ii) of this subparagraph, the owner or operator of a CO<sub>2</sub> budget source that does not meet the applicable compliance date set forth in subparagraphs (B)(i) and (B)(ii) of this subdivision for any monitoring system under subparagraph (A) of this subdivision shall, for each such monitoring system, determine, record and report maximum potential or, as appropriate, minimum potential, values for CO<sub>2</sub> concentration, CO<sub>2</sub> emission rate, stack gas moisture content, fuel flow rate, heat input and any other parameter required to determine CO<sub>2</sub> mass emissions in accordance with 40 CFR 75.31(b)(2) or 40 CFR 75.31(c)(3), section 2.4 of Appendix D of 40 CFR 75 or Appendix E of 40 CFR 75;

The diagram shall indicate where the net electric output is measured and shall include all electrical inputs and outputs to and from the plant. If net electric output is determined using a billing meter, the diagram shall show each billing meter used to determine net sales of electricity and shall show that all electricity measured at the point of sale is generated by the CO<sub>2</sub> budget sources; and
  - (ii) For net thermal output, the diagram shall include all steam or hot water coming into the net steam system, including steam from CO<sub>2</sub> budget sources and non-affected sources, and all exit points of steam or hot water from the net steam system. In addition, each input and output stream shall have an estimated temperature, pressure and phase indicator, and an enthalpy in Btu/lb. The diagram of the net steam system shall identify all useful loads, house loads, parasitic loads, any other steam loads and all boiler feed water returns. The diagram shall represent all energy losses in the system as either usable or unusable losses. The diagram shall also indicate all flow meters, temperature or pressure sensors or other equipment used to calculate gross thermal output. If a sales agreement is used to determine net thermal output, the diagram shall show the monitoring equipment used to determine the sales of steam;
- (E) The output monitoring plan submitted by the CO<sub>2</sub> budget source pursuant to subparagraph (C) of this subdivision shall include a description of each output monitoring system. The description of the output monitoring system shall include a written description of the output system and the equations used to calculate output.

For net thermal output systems, descriptions and justifications of each useful load shall be included;

- (F) The output monitoring plan submitted by the CO<sub>2</sub> budget source pursuant to subparagraph (C) of this subdivision shall include a detailed description of all quality assurance and quality control activities performed to maintain the output system in accordance with subparagraph (I) of this subdivision;
- (G) The output monitoring plan submitted by the CO<sub>2</sub> budget source pursuant to subparagraph (C) of this subdivision shall include documentation supporting any output values to be used as a missing data value if there are periods of invalid output data. The missing data output value shall be either zero or an output value that is likely to be lower than a measured value and that is approved as part of the monitoring plan required under this section;
- (H) Initial Certification. CO<sub>2</sub> authorized account representatives shall submit a certification statement stating that either the output monitoring system consists entirely of billing meters or that the output monitoring system meets one of the accuracy requirements for non-billing meters below. This statement may be submitted with the certification application required pursuant to subdivision (6)(C) of this subsection.
  - (i) Billing Meters. The billing meter shall record the electric or thermal output. Any electric or thermal output values that the facility reports shall be the same as the values used in billing for the output. Any output measurement equipment used as a billing meter in commercial transactions requires no additional certification or testing requirements;
  - (ii) Non-Billing Meters. For non-billing meters, the output monitoring system shall either meet an accuracy of ten (10) percent of the reference value, or each component monitor for the output system shall meet an accuracy of three (3) percent of the full scale value, whichever is less stringent, as determined pursuant to clause (iii) or (iv) of this subparagraph;
  - (iii) The system approach to accuracy shall include a determination of how the system accuracy of ten (10) percent is achieved using the individual components in the system and shall include data loggers and any watt meters used to calculate the final net electric output data or any flow meters for steam or condensate, temperature measurement devices, absolute pressure measurement devices and differential pressure devices used for measuring thermal energy; or
  - (iv) A component approach to accuracy. If testing a piece of output measurement equipment shows that the output readings are not accurate to three (3) percent or less of the full scale, then the owner or operator of a CO<sub>2</sub> budget source

shall retest or replace the measurement equipment to achieve such level of accuracy. Data shall be considered invalid, prospectively, for purposes of determining allocations. Data remain invalid until the output measurement equipment passes an accuracy test or is replaced with another piece of equipment that passes the accuracy test;

- (I) Ongoing quality assurance and quality control. Ongoing quality assurance and quality control activities shall be performed by the owner or operator of a CO<sub>2</sub> budget source in order to maintain the output system, which shall include the following:
- (i) Billing Meters. In the case where billing meters are used to determine output, no quality assurance and quality control activities beyond those already performed are required;
  - (ii) Non-Billing Meters. Certain types of equipment such as potential transformers, current transformers, nozzle and venturi type meters, and the primary element of an orifice plate only require an initial certification of calibration and do not require periodic recalibration unless the equipment is physically changed. However, the pressure and temperature transmitters accompanying an orifice plate will require periodic retesting. For other types of equipment, the owner or operator of a CO<sub>2</sub> budget source shall either recalibrate or re-verify the meter accuracy at least once every two years, unless a consensus standard allows for less frequent calibrations or accuracy tests. The system approach to accuracy or a component approach to accuracy shall be in accordance with subparagraphs (H)(ii) to (H)(iv), inclusive, of this subdivision. If testing a piece of output measurement equipment shows that the output readings are not accurate to 3.0 percent or less of the full scale value, then the owner or operator of a CO<sub>2</sub> budget source shall retest or replace the measurement equipment to achieve such level of accuracy; and
  - (iii) Out of Control Periods. If testing a piece of output measurement equipment shows that the output readings are not accurate to the certification value, data remain valid until the output measurement equipment passes an accuracy test or is replaced with another piece of equipment that passes an accuracy test. All invalid data shall be replaced by either zero output or an output value that is likely to be lower than a measured value and that is approved as part of the output monitoring plan under subparagraph (C) of this subdivision; and
- (J) Recordkeeping and Reporting. The CO<sub>2</sub> authorized account representative shall comply with all recordkeeping and reporting requirements in this subparagraph and with the requirements of subsections (b)(5) and (c)(1)(E) of this section:
- (i) Recordkeeping. The owner or operator of a CO<sub>2</sub> budget source shall retain data used to monitor, determine or calculate net generation for ten (10) years;

- (ii) Annual output reports. Not later than March 1, 2009 and March 1 of each year thereafter, the CO<sub>2</sub> authorized account representative shall submit to the commissioner an annual output report containing until-level MWh data and all useful thermal output information not later than March 1 for the immediately preceding year; and
- (iii) The annual report shall be certified as follows:

"I am authorized to make this submission on behalf of the owners and operators of the CO<sub>2</sub> budget sources or CO<sub>2</sub> budget units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

**(j) Ratepayer relief.**

- (1) If proceeds generated by the auction of CO<sub>2</sub> allowances under subsection (f)(5) of this section in any calendar year exceed the threshold identified in subdivision (3) of this subsection, the commissioner shall return excess proceeds to the Public Utilities Regulatory Authority, in accordance with section 22a-200c, for return to Connecticut electric ratepayers, in accordance with section 16-19 of the Connecticut General Statutes.
- (2) If the proceeds generated by the auction of CO<sub>2</sub> allowances under subsection (f)(5) of this section in any calendar year from the auction of CO<sub>2</sub> allowances does not exceed the threshold price identified in subdivision (3) of this subsection, the commissioner shall distribute such auction proceeds pursuant to the requirements set forth in subsection (f)(6) of this section.
- (3) The amount of proceeds to be transferred to the Public Utilities Regulatory Authority shall be determined as follows:

$$A_r = (A_p - P_t)$$

Where:

$A_r$  = Auction proceeds to be returned to Connecticut electric ratepayers;

$A_p$  = Annual proceeds generated by the auction of CO<sub>2</sub> allowances under subsection (f)(5) of this section; and

$P_t$  = the program threshold of thirty-five (35) million dollars, increased by two and one-half (2.5) percent on January 1, 2015 and January 1 of each year thereafter.

**(k) Severability.**

Each provision of this section is deemed severable, and in the event that any provision of this section is held to be invalid, the remainder of this section shall continue in full force and effect.
