# EPA Transport Modeling Notice of Data Availability (NODA)

- **Comments due October 23, 2015.**
- The data and methods in the NODA will be used to inform a proposal that EPA expects to release later this year to address interstate ozone transport for the 2008 ozone NAAQS (aka, the next generation of the Transport Rule).
- The NODA updates modeling data released on January 22, 2015 and includes:
  - (1) Emission inventories for 2011 and 2017, supporting data used to develop those emission inventories, methods and data used to process emission inventories into a form that can be used for air quality modeling; and
  - (2) Base year 2011 and projected 2017 ozone concentrations and projected 2017 ozone state contribution data at individual ozone monitoring sites based on air quality modeling, supporting data including 2009-2013 base period and 2017 projected ozone design values, and methods used to process air quality model outputs to calculate 2017 ozone concentrations and contributions at individual monitoring sites.
- The NODA is available here:
