

Long Island Sound Blue Plan

*Ecologically Significant Areas and
Significant Human Use Areas
Available for Public Review*

January 2019

Ecologically Significant Area Definitions

Criteria	Supporting Datasets	Description
<p>(Pillar I) Areas with rare, sensitive, or vulnerable species, communities, or habitats</p>		
<p>1. Hard bottom and complex sea floor</p>	<ul style="list-style-type: none"> • Long Island Sound Ecological Assessment (LISEA) hard bottom (pts) • USGS Surficial sediment map, gravel areas (polys) • Long Island Sound Mapping and Research Collaborative (LISMaRC) Phase II SEABOSS hard bottom observations (pts) • Terrain Ruggedness Index (top quintile) • Wrecks and obstructions (pts) 	<p>Areas of hard bottom are characterized by exposed bedrock or concentrations of boulder, cobble, pebble, gravel, or other similar hard substrate distinguished from surrounding sediments and provide a substrate for sensitive sessile suspension-feeding communities and associated biodiversity. Complex seafloor is a morphologically rugged seafloor characterized by high variability in neighboring bathymetry around a central point. Biogenic reefs and man-made structures, such as artificial reefs, wrecks, or other functionally equivalent structures, may provide additional suitable substrate for the development of hard bottom biological communities. Areas of hard bottom and complex seafloor are areas characterized singly or by any combination of hard seafloor, complex seafloor, artificial reefs, biogenic reefs, or wrecks and obstructions.</p>
<p>2. Areas of submerged aquatic vegetation</p>	<p>Seagrass surveys from 2002, 2006, 2009, 2012, 2017 (polys)</p>	<p>Areas where submerged aquatic vegetation, e.g., eelgrass (<i>Zostera marina</i>),</p>

		etc., are present or have been found to be present.
<p>3. Endangered, threatened, species of concern, or candidate species listed under state or federal ESA, and their habitats</p>	<ul style="list-style-type: none"> • Atlantic sturgeon gear restriction areas (polys) • Atlantic sturgeon and shortnose sturgeon high and medium use areas (polys) • Atlantic sturgeon migratory corridor (polys) • Predicted summer occurrence of roseate tern (raster) • Connecticut Natural Diversity Database approximate locations of endangered, threatened, species of concern (polys) • Connecticut Critical Habitats (estuarine, polys) • New York rare plants and rare animals (polys) • New York Significant Natural Communities (polys) • New York Significant Coastal Fish and Wildlife Habitats (polys) • US Endangered Species Act Critical Habitat for Atlantic sturgeon (polys) 	<p>The species listed by federal or state statutes (e.g., the US Endangered Species Act, the CT Endangered Species Act, the NY Endangered Species Act) as endangered, threatened, species of concern, or candidates for listing, and their associated habitats, recognizing that detailed spatial data depicting the distribution and abundance for these marine species in Long Island Sound are potentially unavailable.</p>
<p>4. Areas of cold water corals</p>	<p>LISMaRC Phase I and Phase II cold water coral observations near Stratford Shoals and eastern LIS (polys)</p>	<p>Areas where cold-water corals have been observed or where habitat suitability or other scientific models predict they occur.</p>

5. Coastal wetlands ¹	National Wetlands Inventory, clipped to Long Island Sound Study boundary (polys)	According to Connecticut General Statute (CGS) 22a-29: “Those areas which border on or lie beneath tidal waters, such as, but not limited to banks, bogs, salt marshes, swamps, meadows, flats, or other low lands subject to tidal action, including those areas now or formerly connected to tidal waters, and whose surface is at or below an elevation of one foot above local extreme high water; and upon which may grow or be capable of growing some, but not necessarily all, of [a list of specific plant species found in CGS section 22a-29(2)].”
Criteria	Supporting Datasets	Description
(Pillar II) Areas of high natural productivity (HNP), biological persistence, diversity, and abundance, including areas important for supporting or exhibiting such features, relative to the following characteristics or species²:		
6. Cetaceans (marine mammals)	<ul style="list-style-type: none"> • Cetacean density models for the US Atlantic Coast, Duke University Marine Geospatial Ecology 	Areas where cetaceans occur in higher concentrations and/or particular significant areas as noted in the general description (above) that

¹ Long Island Sound Blue Plan policies do not apply to areas landward of the 10-foot contour, and therefore, while considered Ecologically Significant Areas, Coastal Wetlands and any associated existing statutes or policies relevant to Coastal Wetlands are not within the scope of the Long Island Sound Blue Plan.

² Areas where natural productivity, biological persistence, diversity, and abundance are high, as well as migratory sanctuaries, stopovers and corridors, nesting areas, feeding areas, and nursery grounds for cetaceans, pinnipeds, sea turtles, marine birds, fish, mobile invertebrates, sessile-mollusk-dominated communities, managed shellfish beds, and soft-bottom benthic communities.

	<p>Lab, for species with predictions in LIS (raster)</p> <ul style="list-style-type: none"> • Expert participatory mapping (polys; P. Comins, Connecticut Audubon Society, 1/4/19) 	<p>support cetaceans (e.g. particular feeding areas, nursery grounds).</p>
7. Pinnipeds (seals)	<ul style="list-style-type: none"> • NOAA Environmental Sensitivity Index seal concentration areas (polys) • Expert participatory mapping included in the Blue Plan Inventory (polys) 	<p>Areas where pinnipeds occur in higher concentrations and/or particular significant areas as noted in the general description (above) that support pinnipeds (e.g. particular haul-out locations, feeding areas).</p>
8. Sea turtles and other reptiles	<ul style="list-style-type: none"> • Northern diamondback terrapin probability of occurrence (polys) • Locations of 2018 coastal CT sea turtle strikes (pts) • Live sea turtle strandings, rescues, and in-water observations, Riverhead Foundation for Marine Research and Preservation (pts) • Live sea turtle strandings and rescues, Mystic Aquarium (pts) 	<p>Areas where sea turtles and other reptiles occur in higher concentrations and/or particular significant areas as noted in the general description (above) that support sea turtles and other reptiles (e.g. particular feeding areas, nesting grounds, hibernation areas).</p>
9. Birds	<ul style="list-style-type: none"> • Seabird occurrence models, University of Connecticut (raster) • Expert participatory mapping (polys; P. Comins, Connecticut Audubon Society, 1/4/19) 	<p>Areas where birds are abundant or diverse including feeding areas; areas of high bird productivity including nesting areas.</p>

<p>10. Fish</p>	<ul style="list-style-type: none"> • Persistently productive places for fish (polys; LISEA high weighted persistence) • Areas of high fish abundance and concentration (polys; CT DEEP Marine Fisheries Long Island Sound Trawl Survey, 1995-2004 and 2005-2014, spring and fall data for species caught in >5 tows) 	<p>Areas of high weighted fish persistence and high fish abundance and concentration.</p>
<p>11. Mobile invertebrates</p>	<ul style="list-style-type: none"> • Areas of high mobile invertebrate biomass and concentration (polys; CT DEEP Marine Fisheries Long Island Sound Trawl Survey, 1995-2004 and 2005-2014, spring and fall data for crabs, lobster, squid, and horseshoe crab) • Horseshoe crab offshore hotspots (polys) • Horseshoe crab predicted high and medium use areas (polys) • Horseshoe crab predicted spawning beaches (polys) • American lobster projected thermal refuge (polys) 	<p>Areas of high mobile invertebrate (e.g., lobster, other crustaceans, squid) abundance and concentration.</p>
<p>12. Sessile-mollusk-dominated communities</p>	<p>LISMaRC Phase I and Phase II observations of Slipper shell (<i>Crepidula fornicata</i>) aggregations and blue</p>	<p>Areas where wild, natural sessile-mollusk-dominated communities occur.</p>

	mussel (<i>Mytilus edulis</i>) aggregations near Stratford Shoals and eastern LIS (polys)	
13. Managed shellfish beds	<ul style="list-style-type: none"> • Oyster seed beds (CT Natural Shellfish Beds) (polys) • CT Recreational Shellfish Beds (polys) • CT State-managed Shellfish Beds (polys) • CT Town-managed Shellfish Beds (polys) 	Locations of commercial and recreational shellfishing harvest areas, including shellfish restoration activities and areas closed to shellfishing.
14. Soft-bottom benthic communities	<i>Adequate data not available</i>	Areas of soft-bottom seafloor communities where natural productivity, biological persistence, diversity, and/or abundance of marine flora and fauna are high, as well as areas of soft-bottom seafloor communities known to support important life history or important ecological functions of mobile species (e.g., migratory stopovers and corridors, feeding areas, and nursery grounds).
Zooplankton	<i>Adequate data not available</i>	Not an ESA criterion at this time, but noted for ecological relevance to productivity.

Ecologically Significant Area Maps

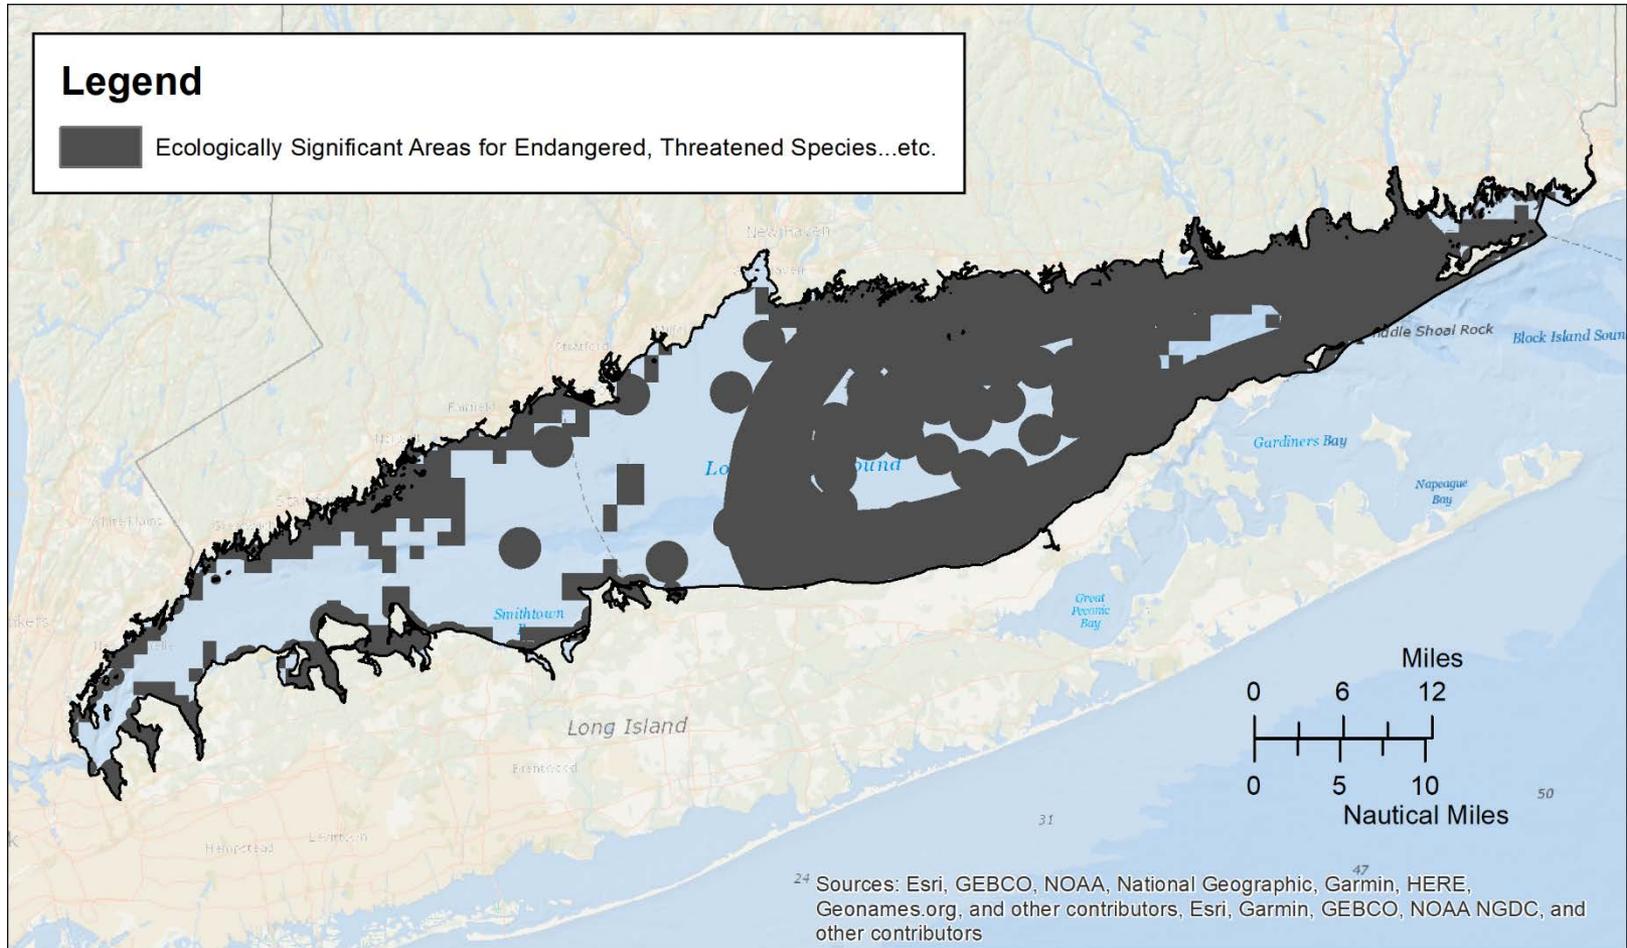

DRAFT Ecologically Significant Area Map: Hard Bottom & Complex Seafloor

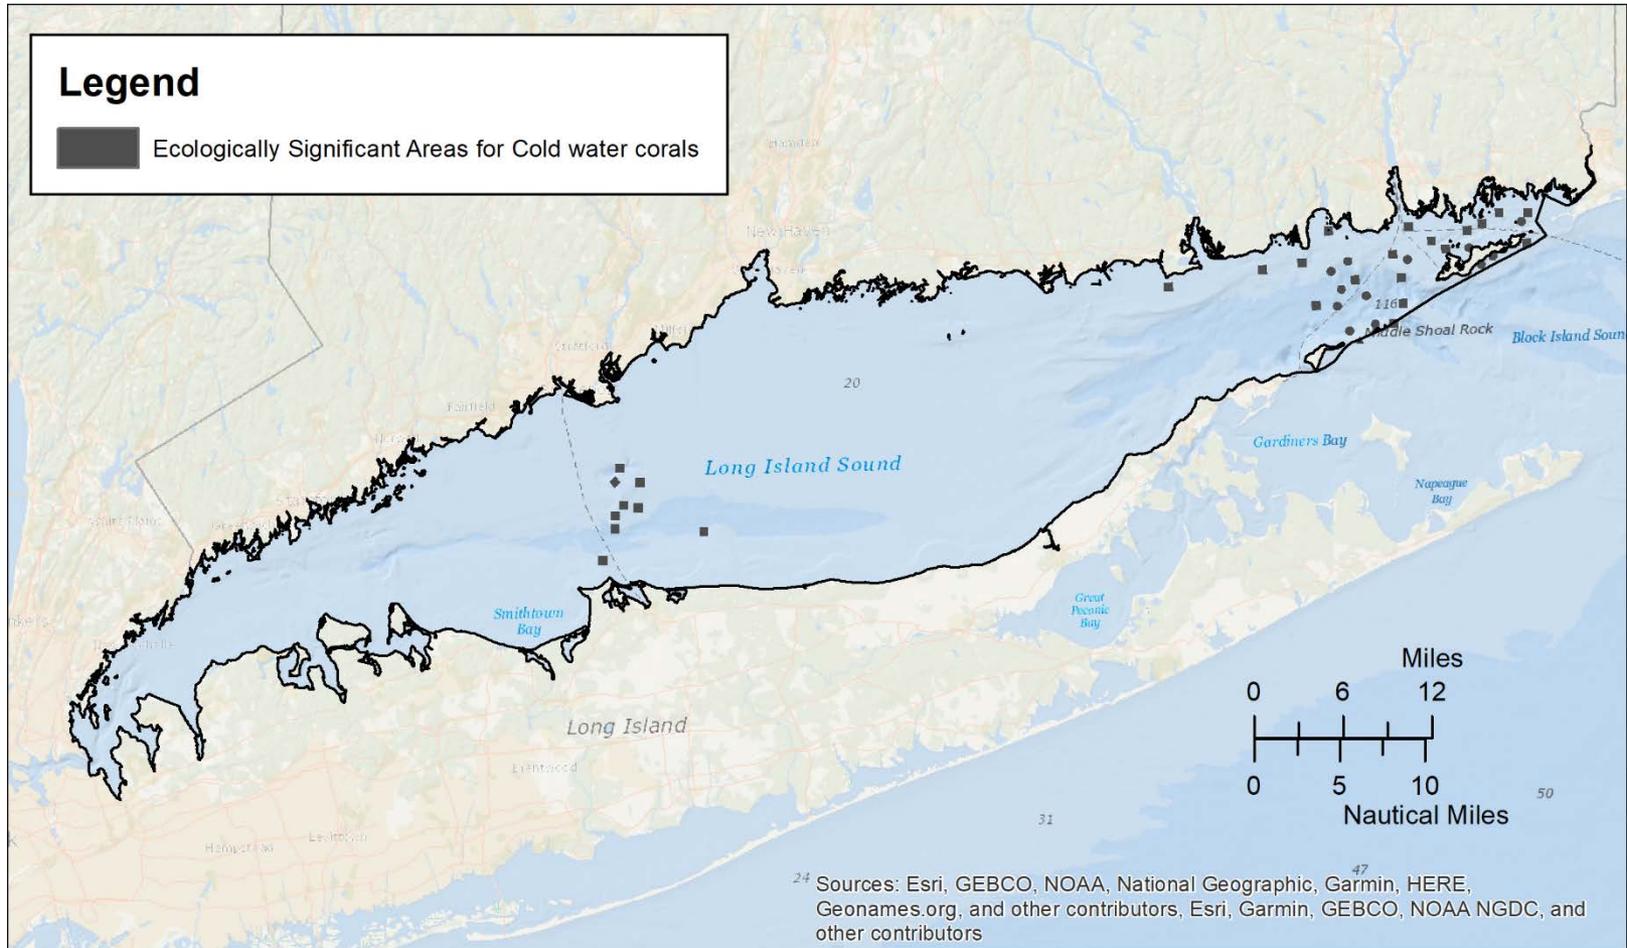

DRAFT Ecologically Significant Area Map: Submerged Aquatic Vegetation

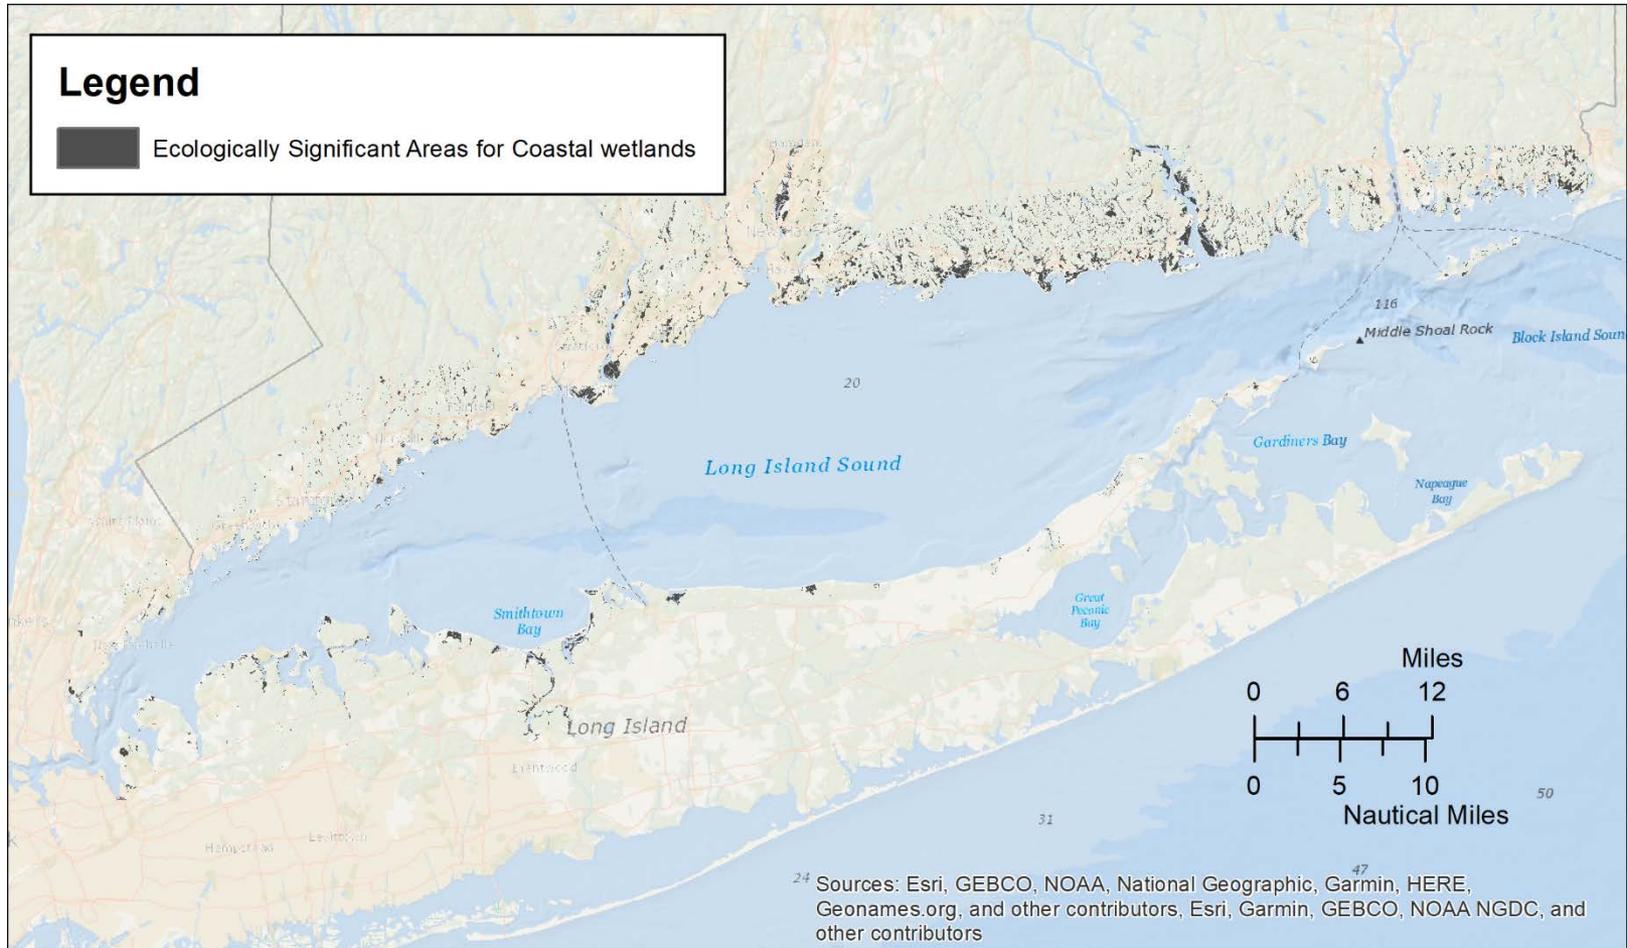

DRAFT Ecologically Significant Area Map: Endangered, Threatened, and Species of Concern

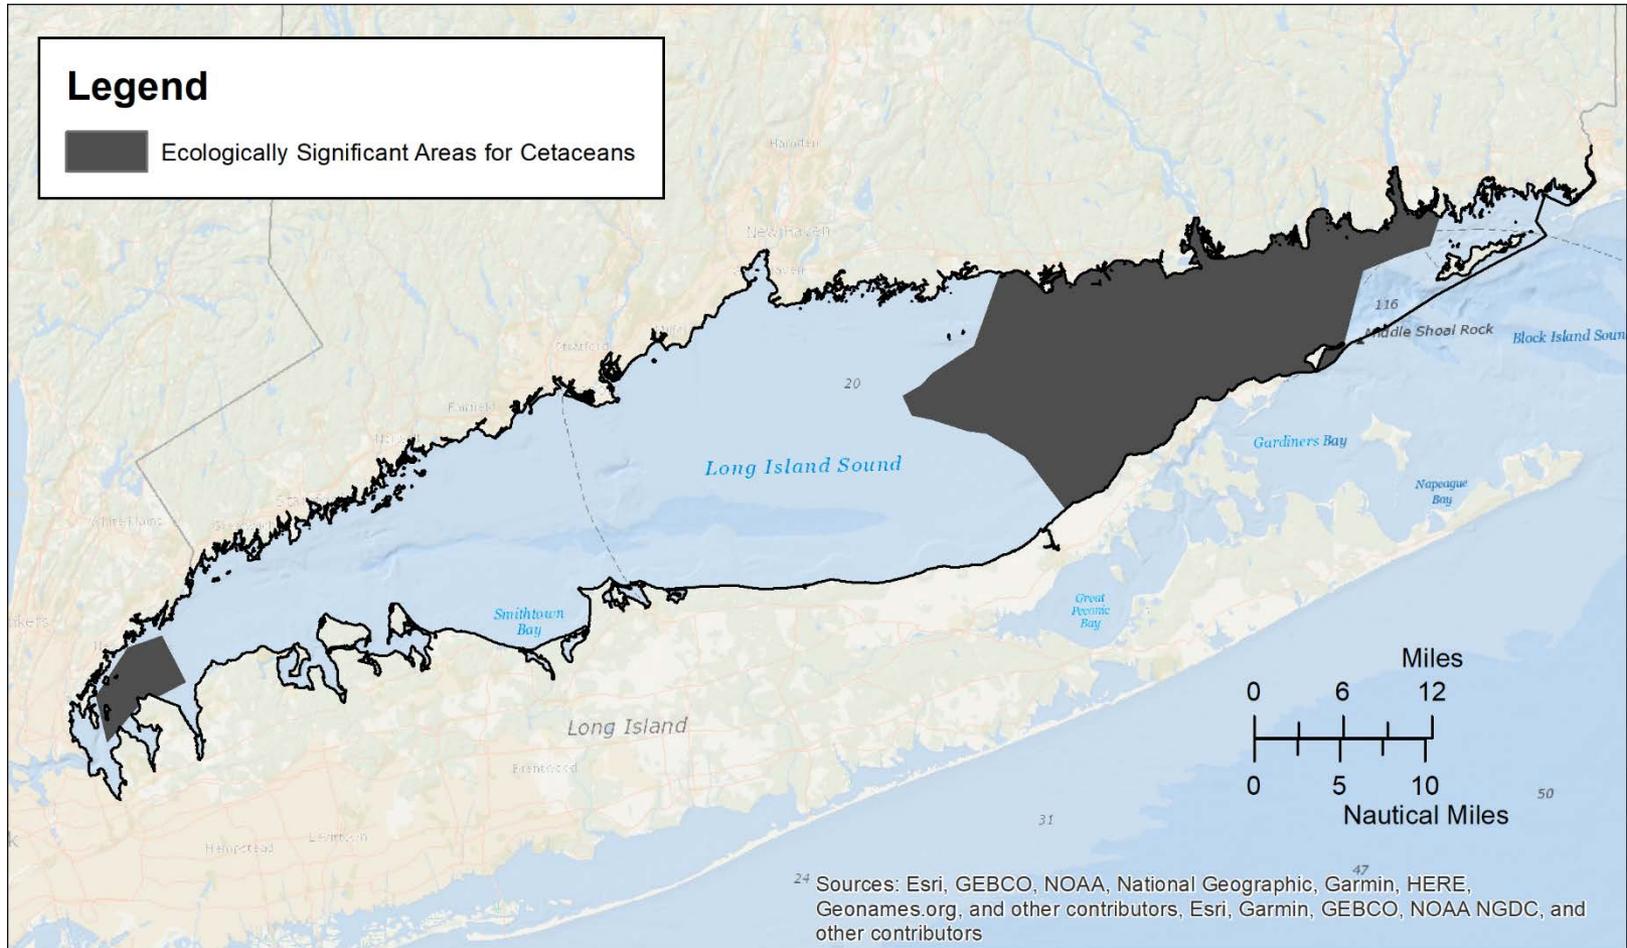

DRAFT Ecologically Significant Area Map: Cold Water Corals

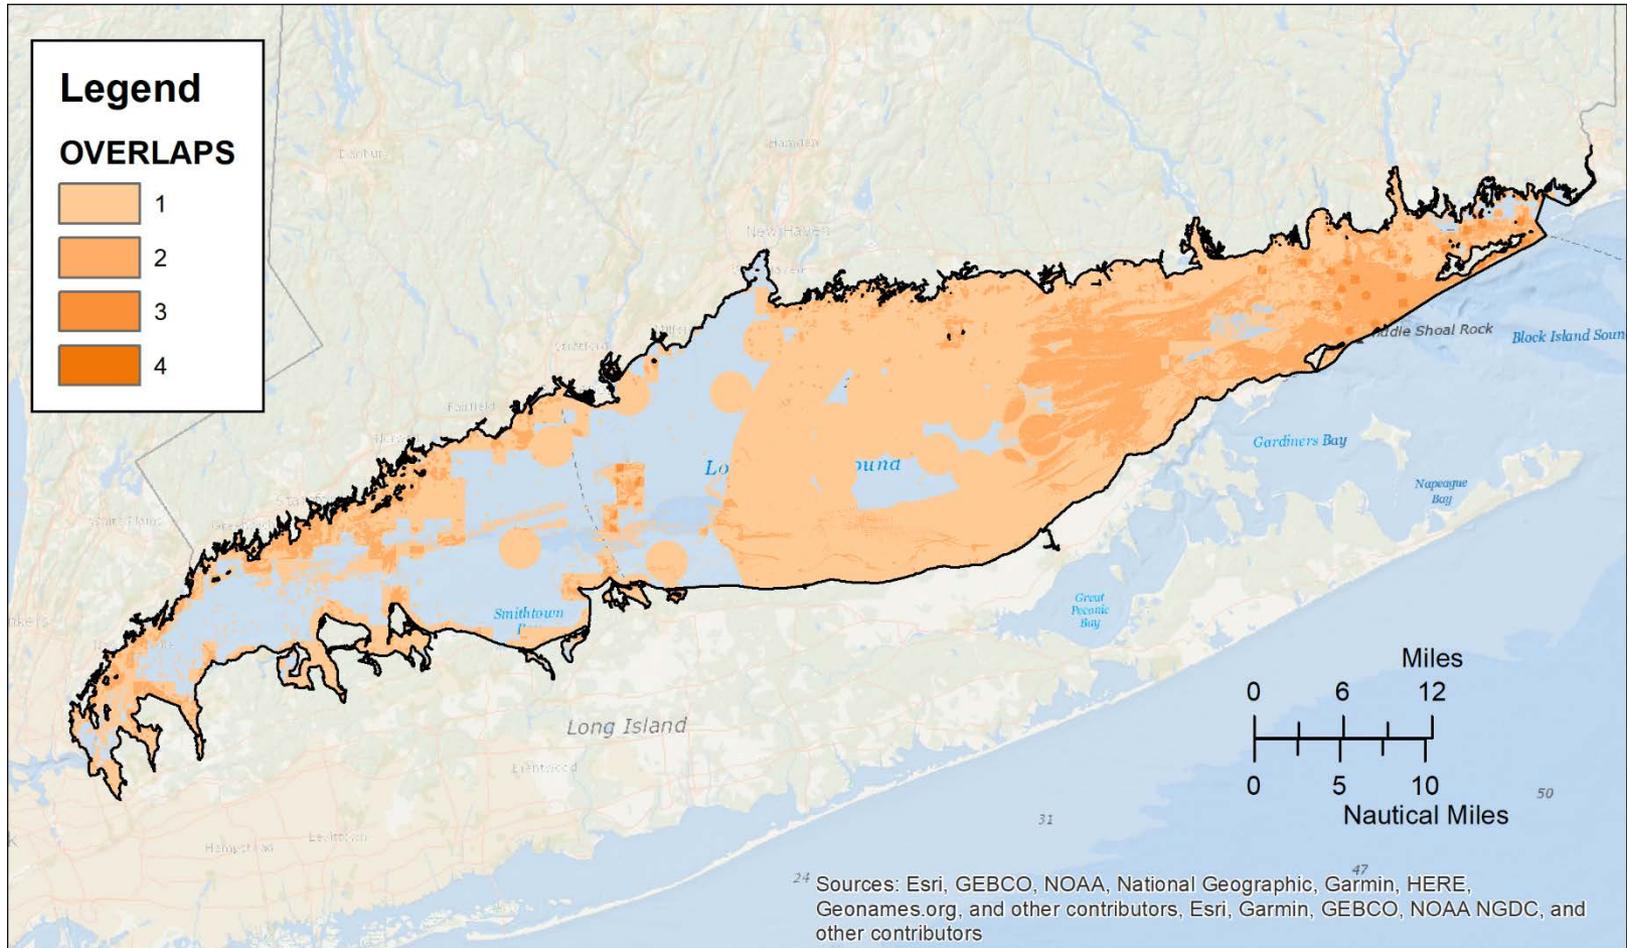

DRAFT Ecologically Significant Area Map: Coastal Wetlands

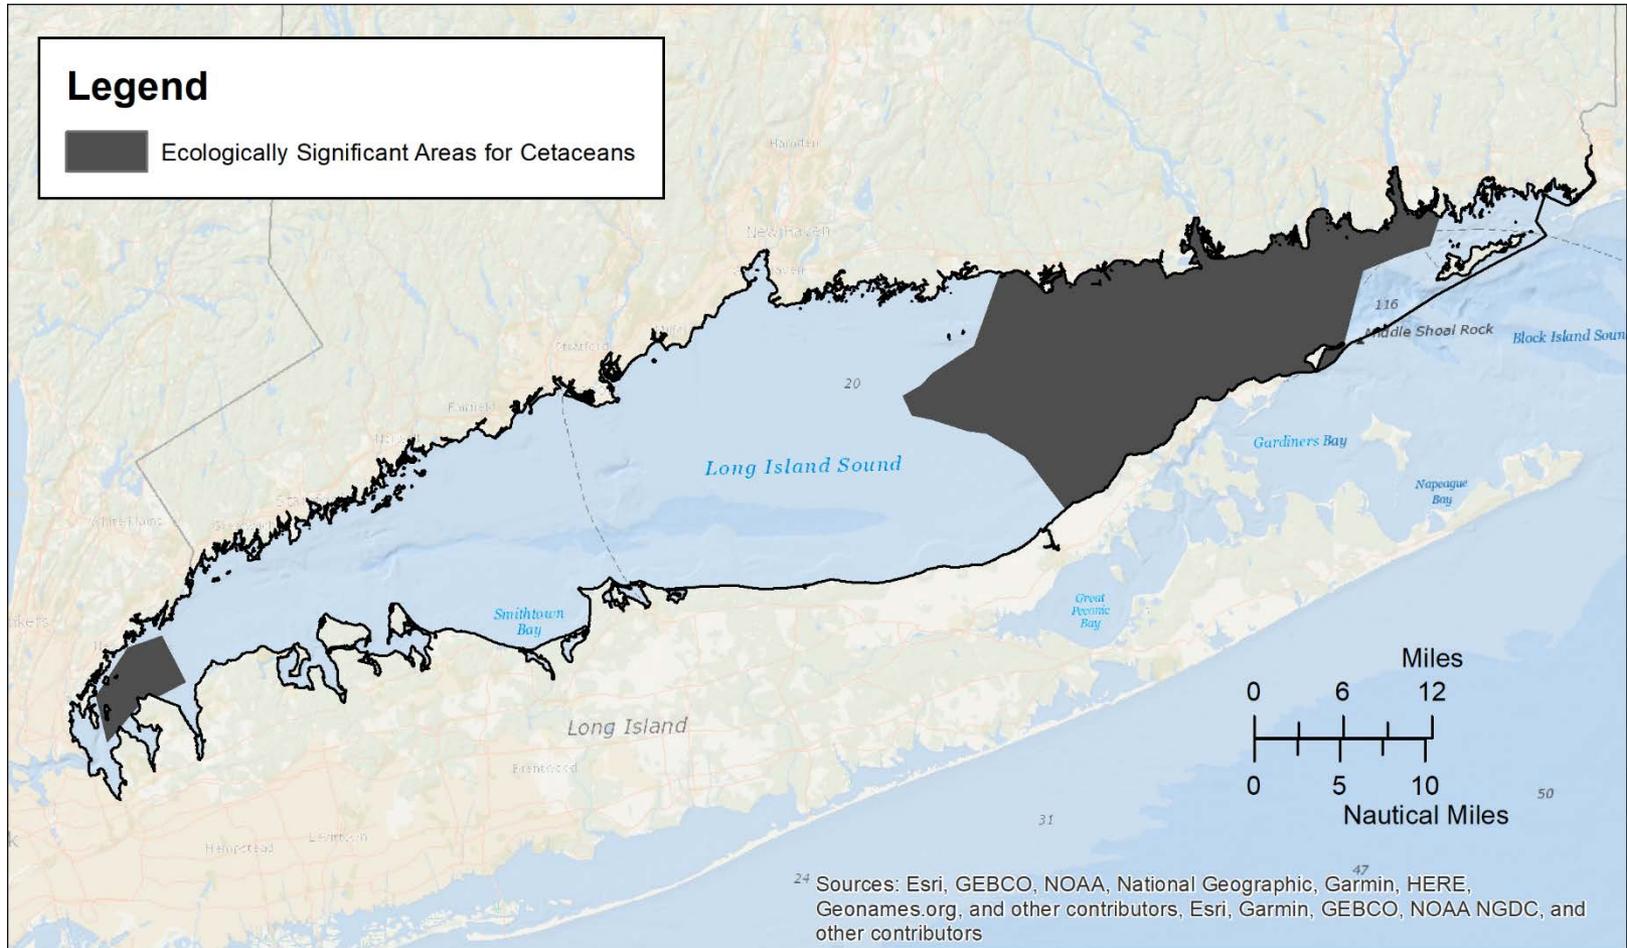

DRAFT Ecologically Significant Area Map: Cetaceans (e.g., whales, dolphins, porpoises)

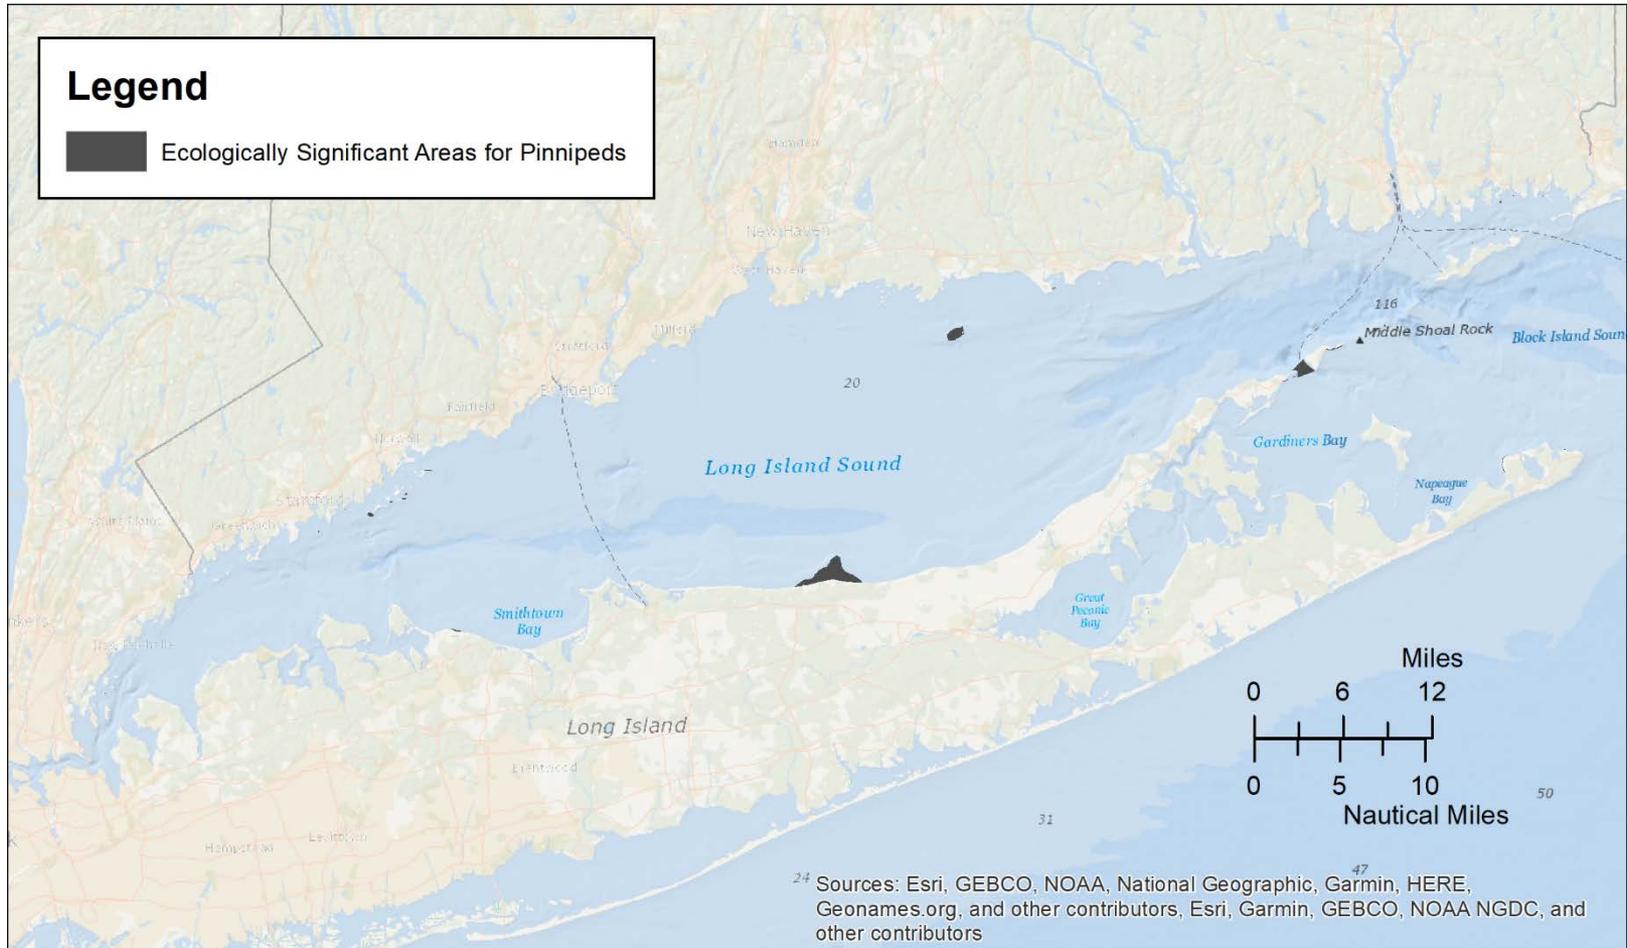

DRAFT Ecologically Significant Area Map: Overlap areas with rare, sensitive, or vulnerable species, communities or habitats (Pillar 1)

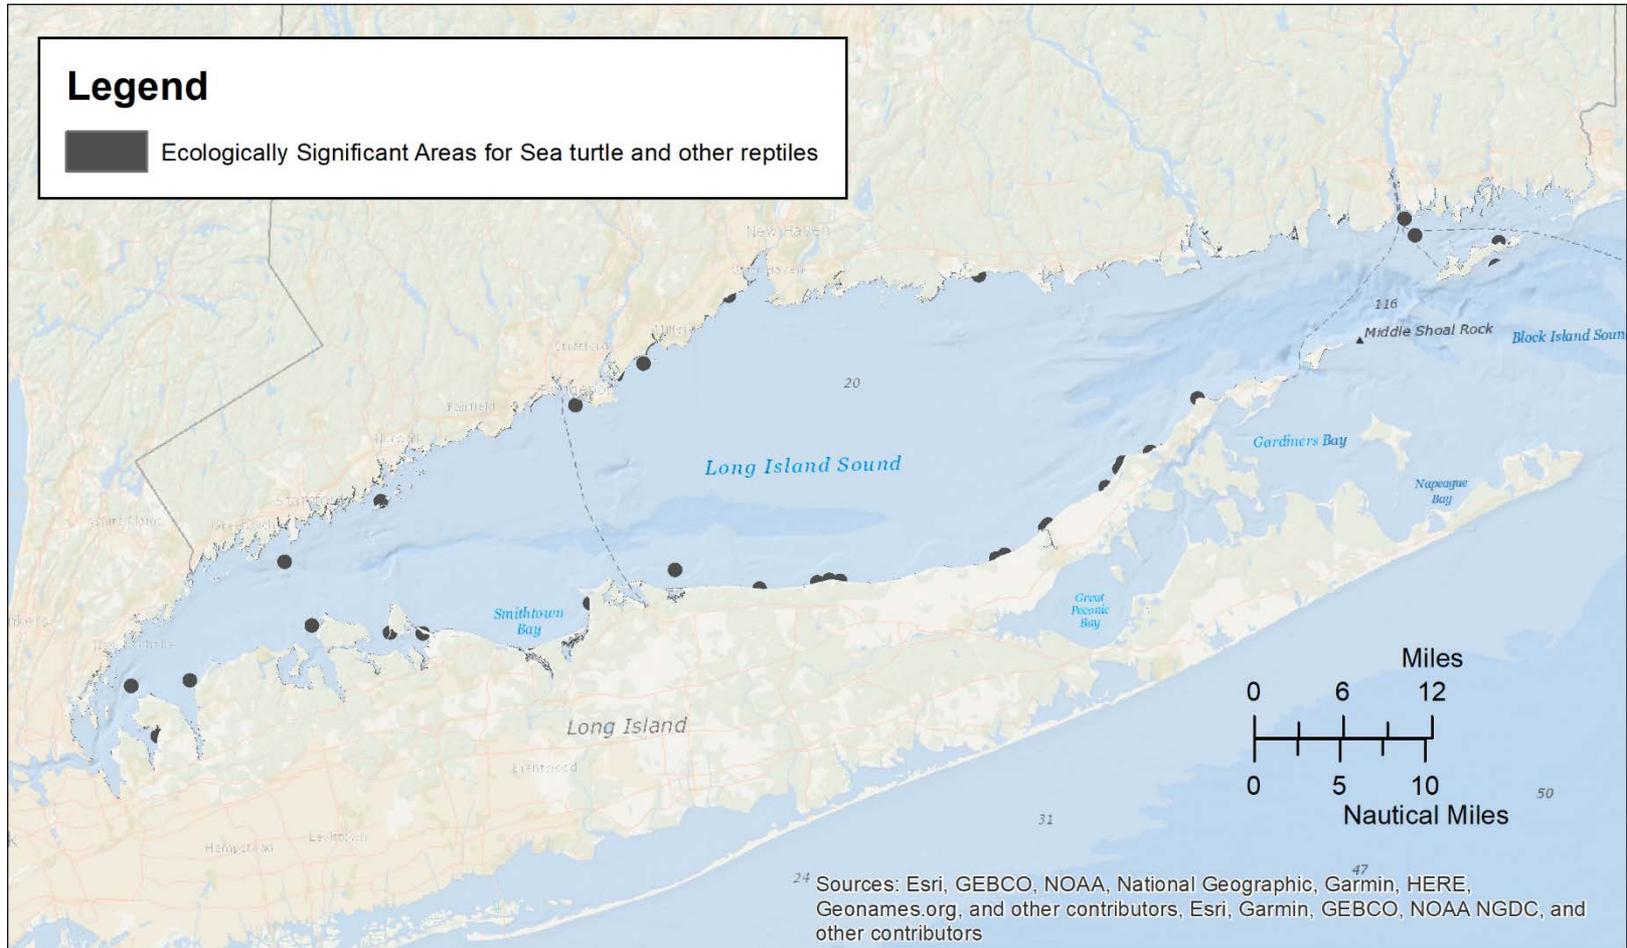

DRAFT Ecologically Significant Area Map: Cetaceans (e.g., whales, dolphins, porpoises)

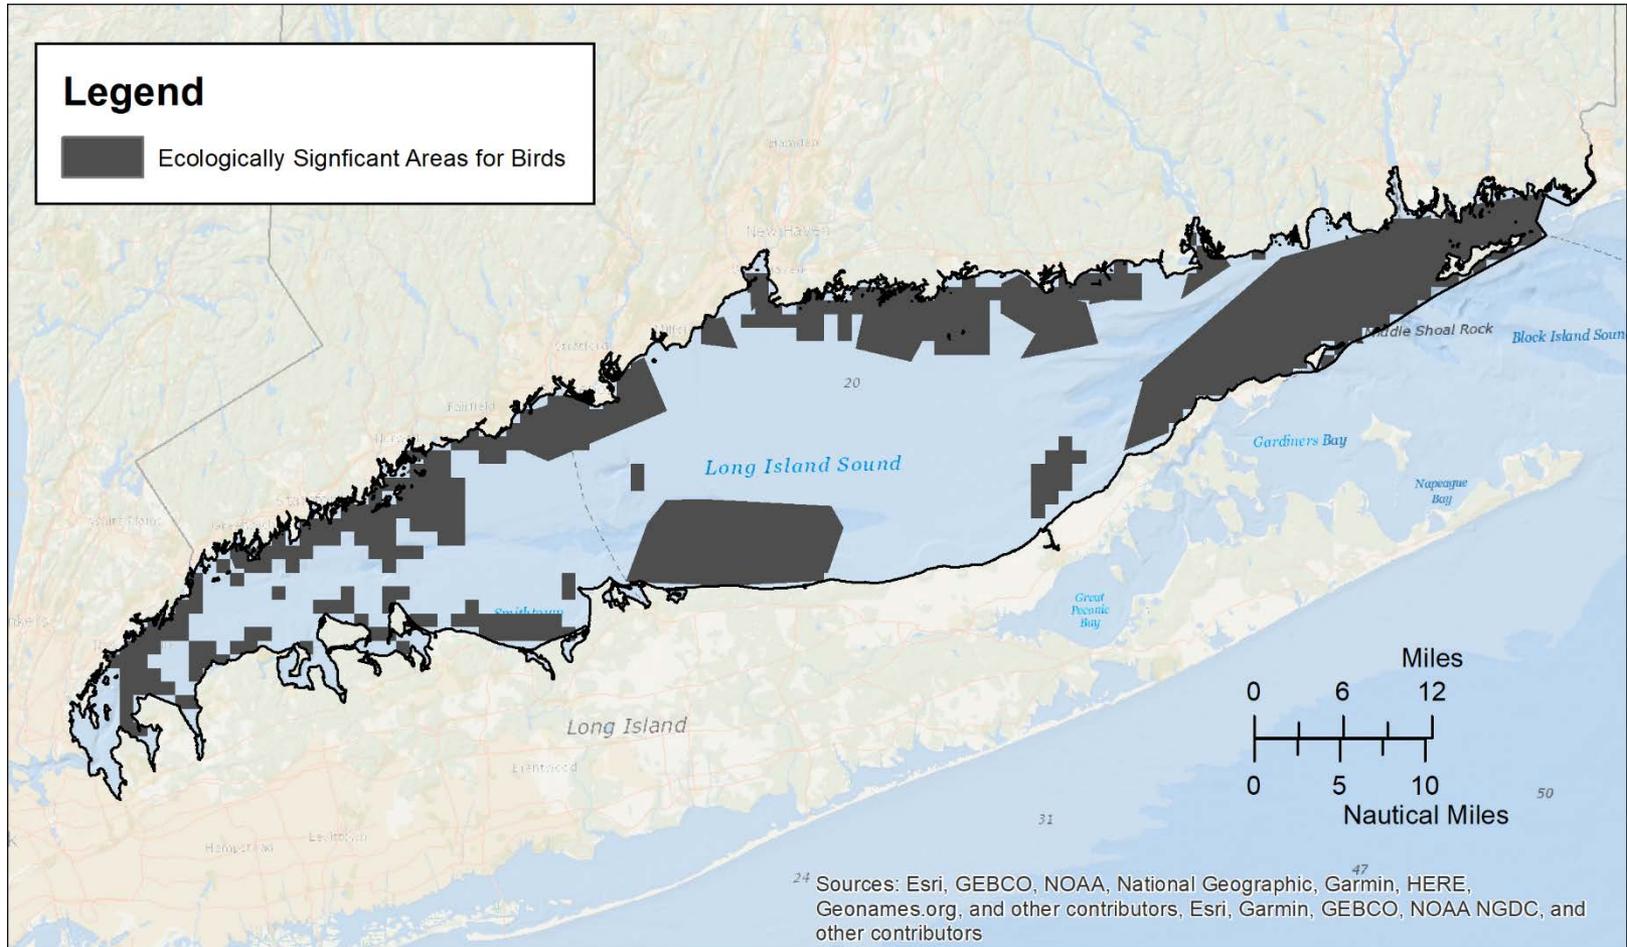

DRAFT Ecologically Significant Area Map: Pinnipeds (e.g., seals)

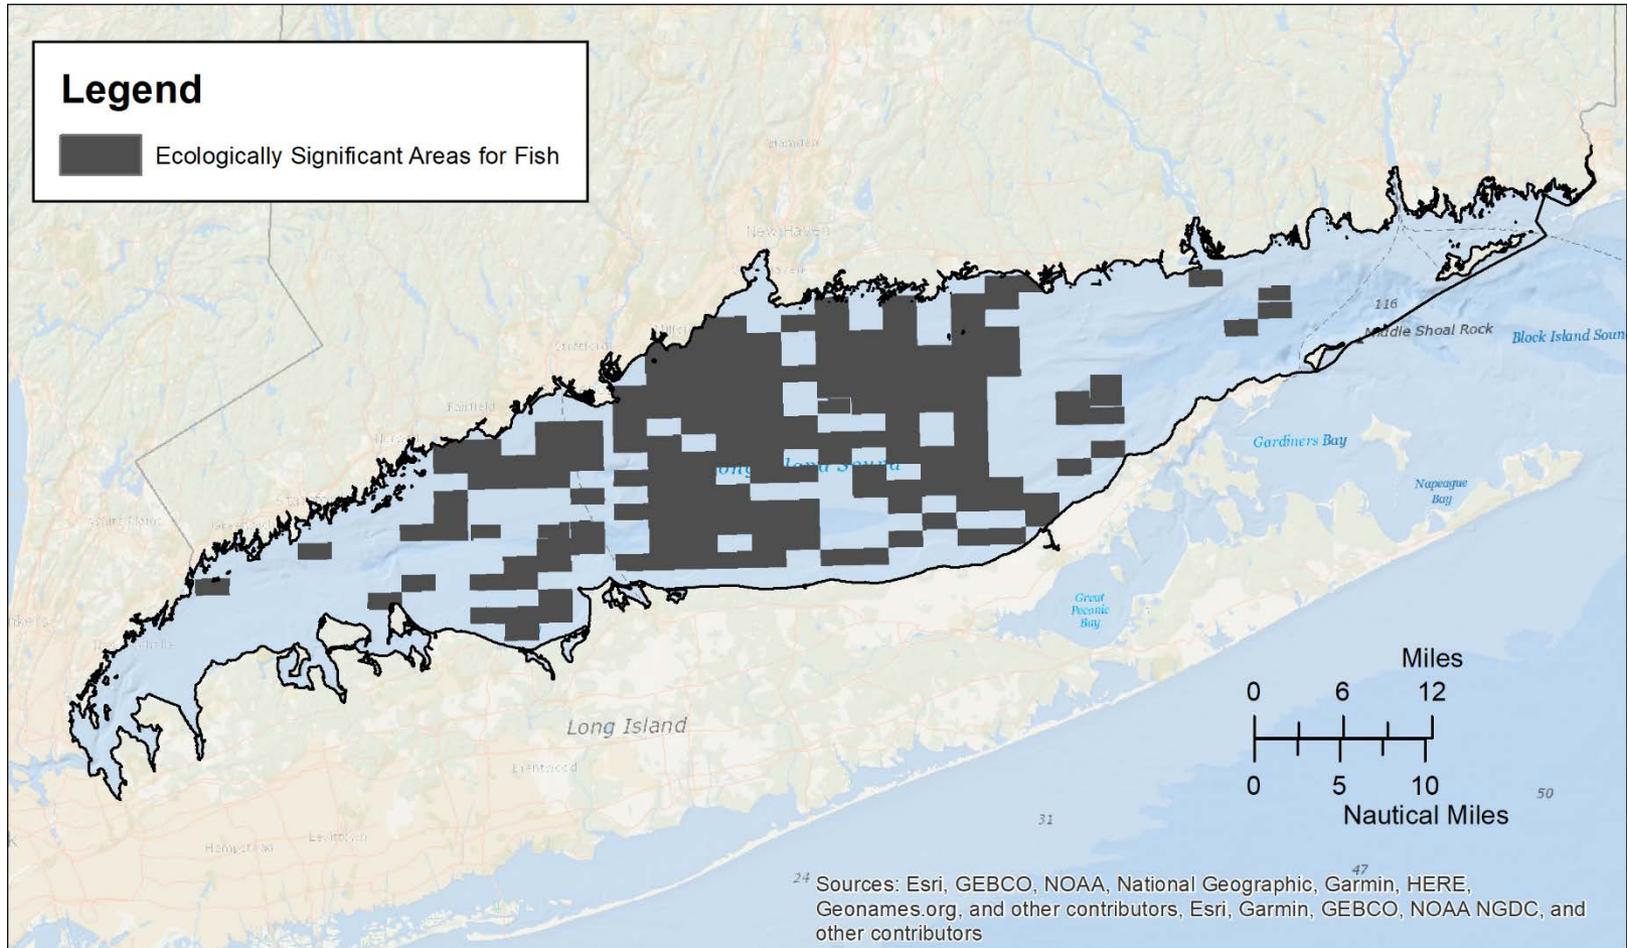

DRAFT Ecologically Significant Area Map: Sea Turtles and other reptiles

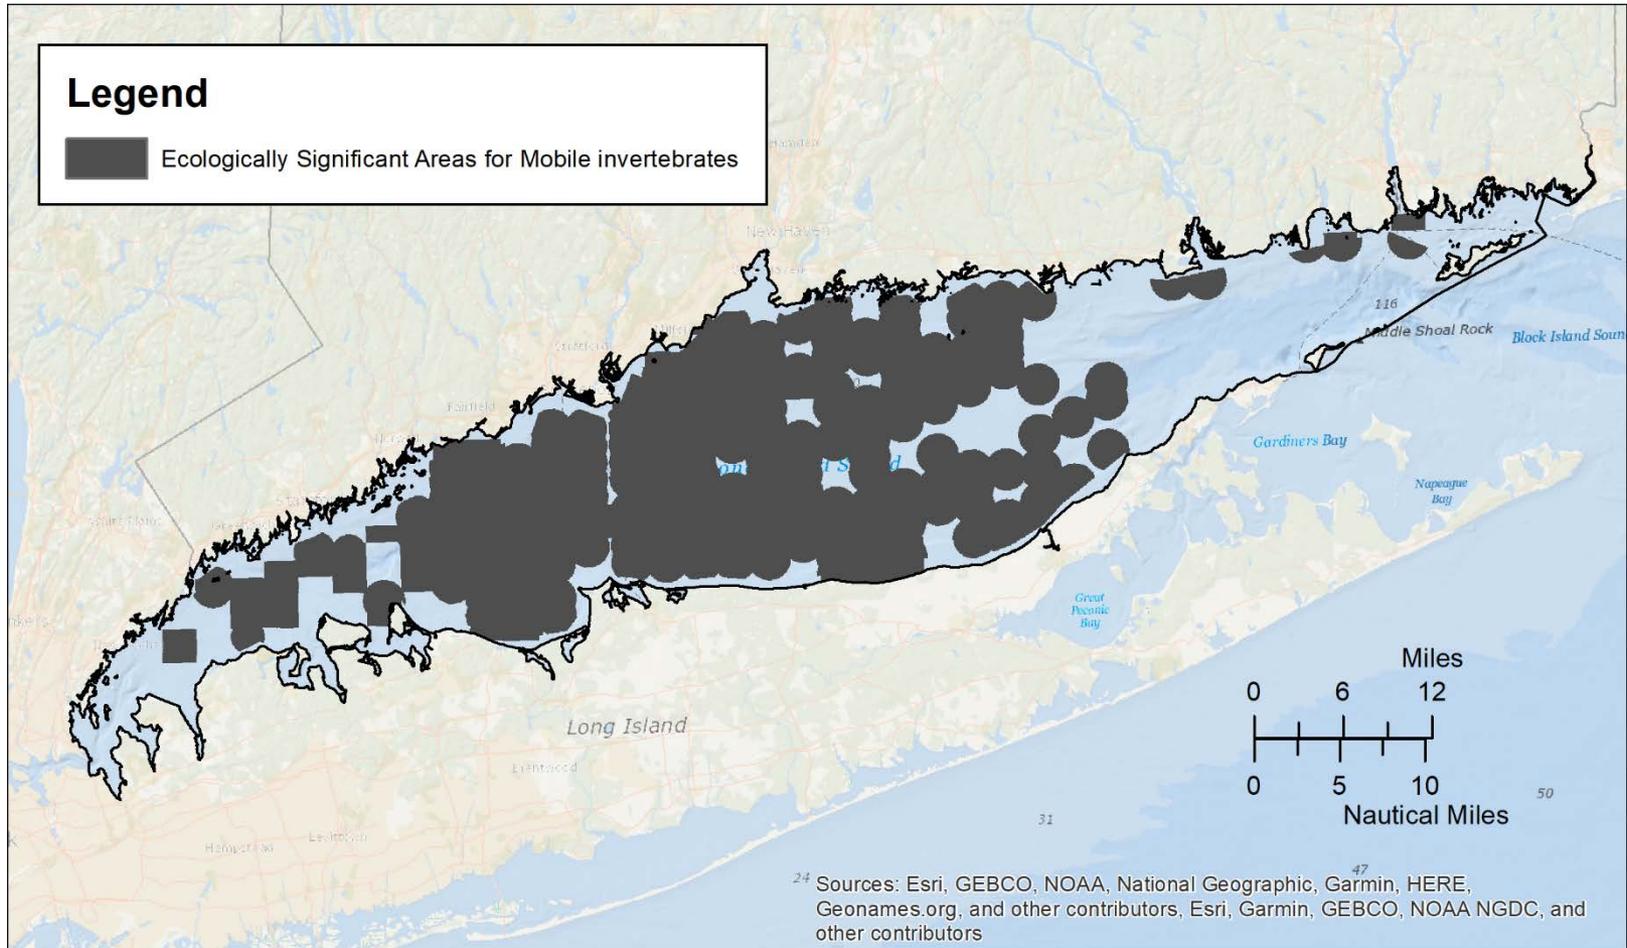

DRAFT Ecologically Significant Area Map: Birds

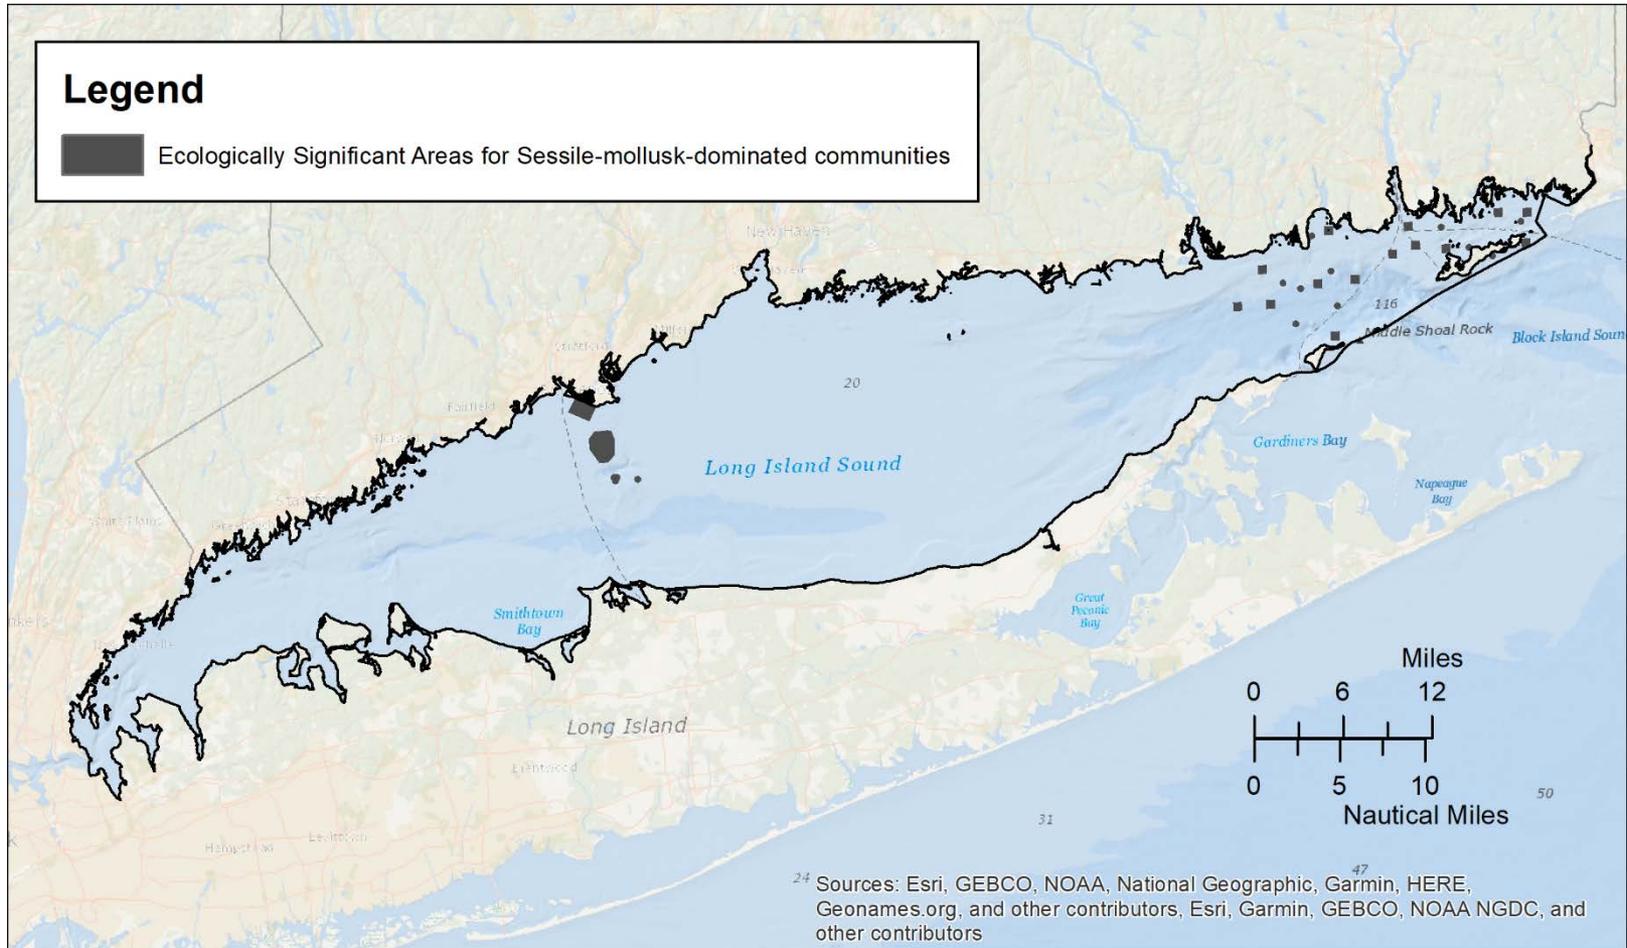

DRAFT Ecologically Significant Area Map: Fish

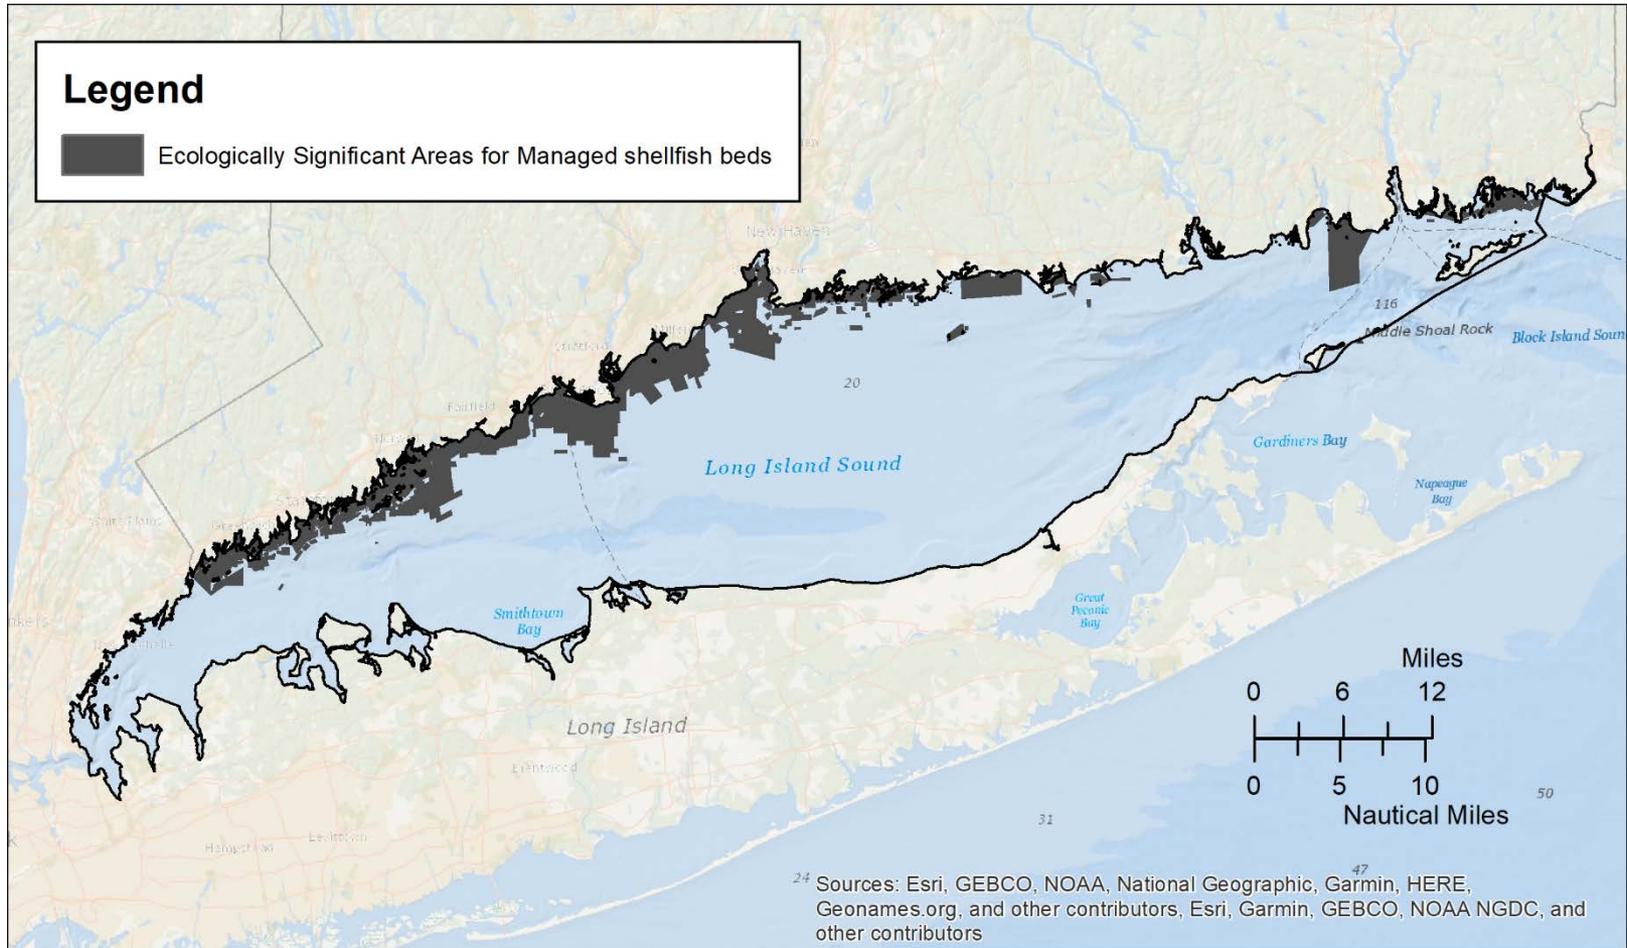

DRAFT Ecologically Significant Area Map: Mobile Invertebrates (e.g., lobsters, crabs, squid, etc.)

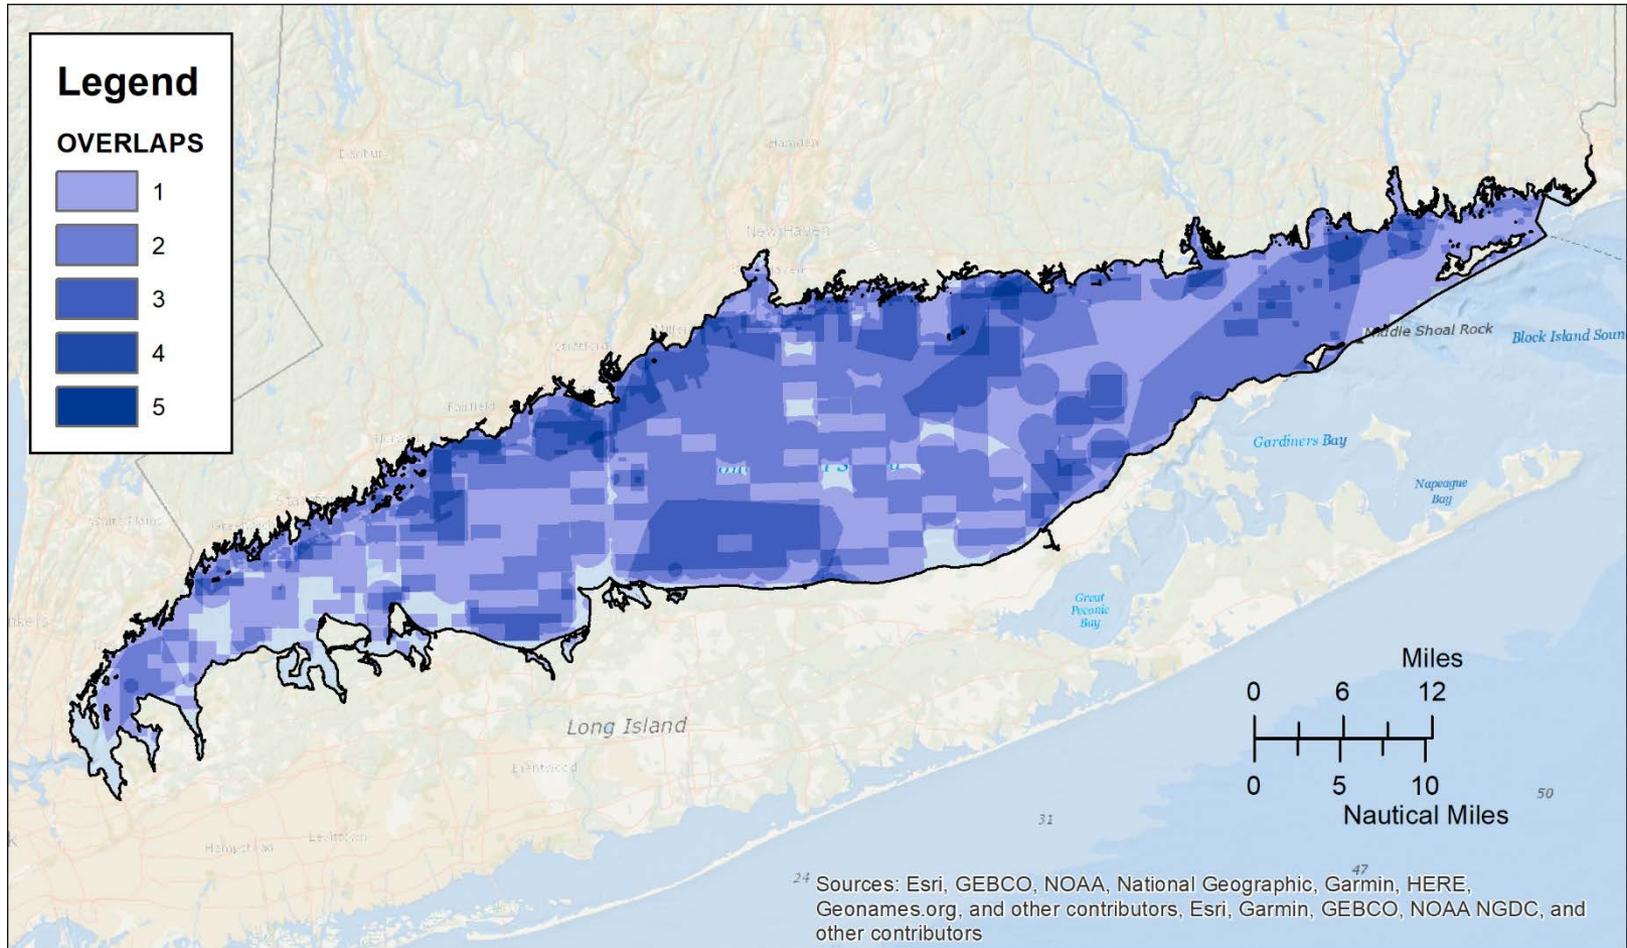

DRAFT Ecologically Significant Area Map: Sessile/Mollusk Communities (e.g., mussels, clams, etc.)

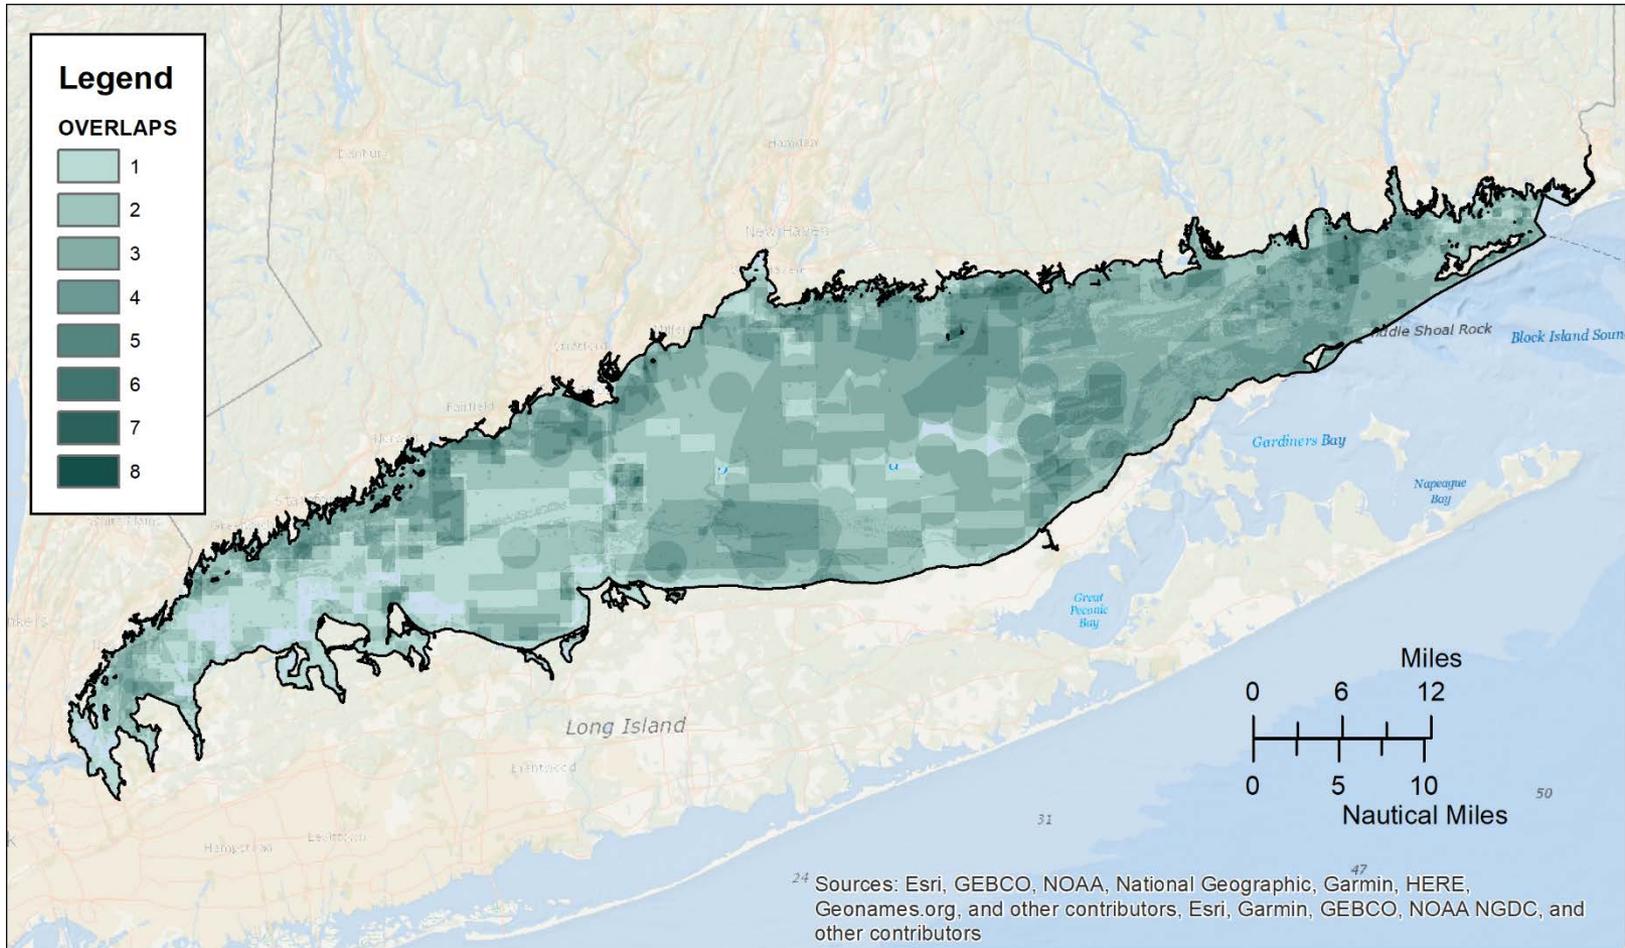

DRAFT Ecologically Significant Area Map: Managed Shellfish Beds

DRAFT Ecologically Significant Area Map: Overlap Areas of high natural productivity, biological persistence, diversity and abundance (Pillar 2)

DRAFT Ecologically Significant Area Map: All ESA Overlaps (Pillar 1 & Pillar 2)

Significant Human Use Area Definitions

Criteria	Supporting Data	Description
(3) Areas with features of historical, cultural, educational, or research significance	<i>Datasets from the Significant Human Use Characterization that relate to each sub-criterion</i>	<i>A narrative that describes how the SHUA criterion is defined</i>
Areas associated with lighthouses and other historic areas	<ul style="list-style-type: none"> CT & NY Historic Districts (poly) LIS Lighthouses (pts) 	Lighthouses, waterfront historic districts, or in-water structures of historical significance, excluding wrecks, and areas of Long Island Sound immediately adjacent to such resources.
Shipwrecks	<ul style="list-style-type: none"> LIS Shipwrecks (pts) 	Wrecks of historical or cultural significance.
Visual and Scenic Resources	<ul style="list-style-type: none"> CT & NY Open Space and Parklands 	Views of Long Island Sound's scenic resources from publicly accessible coastal land.
Submerged and Coastal Archaeological Areas	<ul style="list-style-type: none"> CT SHPO & OSA Upland Sites (pts) CT SHPO & OSA Underwater Sites (pts) CT OSA Potential Holocene Underwater Sites (polys) 	Submerged or coastal locations of archaeological sensitivity and/or significance.
Areas of Tribal Significance	<i>No available data</i>	Submerged or coastal locations recognized by Tribes as having historical or cultural significance.
Discrete Areas for Research, Education, and Monitoring	<ul style="list-style-type: none"> LIS Water Quality Sampling Sites (pts) LISICOS Sites (pts) 	Areas actively and consistently used for research activities, including but not limited to long term monitoring sites, and Sound-dependent experiential educational programming.
Criteria	Supporting Data	Description
(4) Areas of substantial recreational and/or "quality of life" value		
Sailing or Rowing Races	<ul style="list-style-type: none"> LIS Sailing Areas (poly) LIS Sailing Routes (lines) 	Areas consistently used by organized clubs and associations. Including but not limited to racing and training areas, and long-distance sailing race routes.

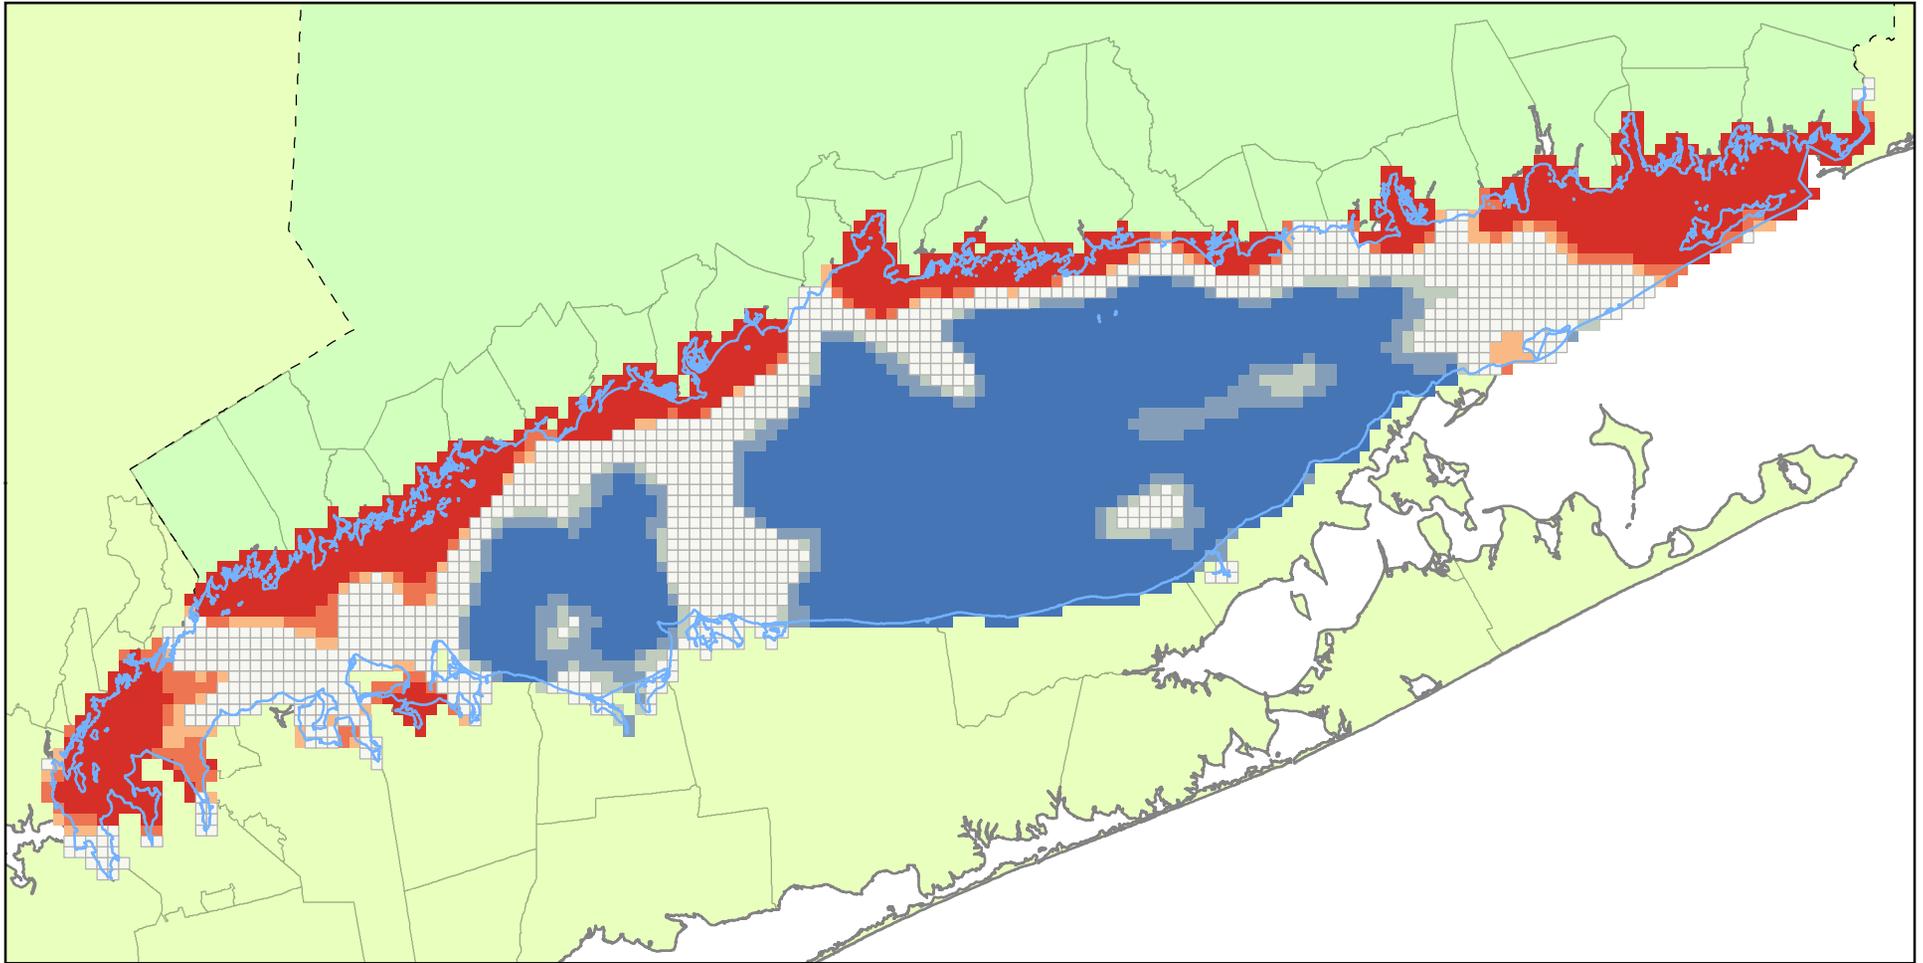

Marine Events	<i>Data available in USCG weekly Notice to Mariners and 33 CFR 100.100 table.</i>	Recurring marine events including those described in 33 CFR 100.100 Table.
High Activity Recreational Boating Areas	<ul style="list-style-type: none"> LIS Boating Density (Top 2/5 Quantity Classes) 	Approximate areas where the density of recreational boating is substantially higher than the overall mean for LIS.
Mooring Fields and Anchorage Areas	<ul style="list-style-type: none"> LIS Observed Boat Clusters (poly) NOAA ENC Anchorages (poly) 	Formally designated or traditional mooring fields and anchorages, as designated or managed by NOAA, municipal Harbor Management, or other organizations.
Marinas, Yacht Clubs, and Boat Launches	<ul style="list-style-type: none"> CT & NY Marinas and Yacht Clubs (pts) LIS Boat Launches (pts) 	Locations of marinas, yacht clubs, and boat launches that are within the Blue Plan planning area.
Waterfowl Hunting	<ul style="list-style-type: none"> CT Waterfowl Hunting (poly) 	Areas in Long Island Sound important for waterfowl hunting, including sea duck habitat.
Dive Sites	<ul style="list-style-type: none"> LIS Dive Sites (pts) MARCOS LIS Dive Areas (poly) NEODP Dive Areas (poly) 	Locations in Long Island Sound important for SCUBA activities.
Coastal Public Use Areas	<ul style="list-style-type: none"> CT Coastal Access Sites (pts) NEODP Individual Ocean Uses (pts) CT & NY Open Space Parkland (poly) NEODP Water Trails (lines) CT Waterfowl Concentration Areas (poly) CT & NY NWI Beaches 	Areas important for public access and use of Long Island Sound for recreational activities including but not limited to swimming, paddling, and wildlife watching.
Criteria	Supporting Data	Description
(5) Areas important for navigation, transportation, infrastructure, and economic activity		
Working Waterfronts, Ports, and Marine Commercial Areas	<ul style="list-style-type: none"> LIS Working Waterfronts (pts) Offshore Terminals (pts) 	Commercial facilities that are water dependent, or service water dependent uses on Long Island Sound, including but not limited to onshore and offshore terminals and port facilities.

Designated Navigational Channels, Fairways, and Basins	<ul style="list-style-type: none"> • LIS ENC Fairways & Navigational Channels (poly) • Squid Dredge Footprint 	Designated and maintained navigational channels as they appear on the NOAA-published charts and USACE management plans. Also includes authorized privately maintained navigational channels, fairways, and basins, excluding facilities for individual residential use.
Designated Anchorage Areas	<ul style="list-style-type: none"> • LIS ENC Anchorages (poly) 	Anchorage areas as they appear on the NOAA charts, and are generally used by commercial vessels.
Security Zones and other Designated Areas	<ul style="list-style-type: none"> • LIS ENC Restricted Areas (poly) 	Security zones and other operational zones, as designated by the Coast Guard or other appropriate authority.
Areas of Lightering Activity	<ul style="list-style-type: none"> • LIS ENC Lightering Zones (poly) 	Areas designated by the Coast Guard for ship-to-ship transfer (lightering), and other areas regularly used for such transfers.
Vessel Traffic Areas	<ul style="list-style-type: none"> • 2016 AIS All Vessel Transit Counts 	Areas of high traffic use by vessels with AIS transponders including but not limited to ferries and commercial ships. High traffic use is defined by areas that exceed the mean value of transit counts.
Dredged Material Disposal Areas (Active and Historic)	<ul style="list-style-type: none"> • LIS Disposal Sites (poly) 	Material disposal sites as they appear on the NOAA charts, in the LIS DMMP, or designated by EPA. Includes areas currently and historically used. Also includes confined aquatic disposal (CAD) cells.
Cables, Pipelines, and Cable/Pipeline Areas	<ul style="list-style-type: none"> • LIS Submarine Cables (lines) • LIS Cable and Pipeline Areas (poly) 	Submerged cable and pipeline infrastructure areas, including but not limited to those indicated on NOAA navigational charts.
Coastal Energy Generating and Transmission Facilities	<ul style="list-style-type: none"> • LIS Coastal Energy Facilities (pts) 	Coastal energy generating and transmission facilities and associated infrastructure, including

		areas of Long Island Sound adjacent thereto.
Criteria	Supporting Data	Description
(6) Areas important to Fishing and Aquaculture		
Recreational Fishing	<ul style="list-style-type: none"> LIS Popular Places to Fish (poly) 	Areas significant for recreational fishing, as identified by DEEP Fisheries and the recreational fishing community of Long Island Sound.
Commercial Fishing	<ul style="list-style-type: none"> 2000-2010 NOAA Vessel Trip Report Landings 	Areas of substantial value to the commercial fishing community in Long Island Sound.
Charter and Party Boat Fishing	<i>No available data</i>	Areas of substantial value to the charter and party boat industry in Long Island Sound.
Recreational Shellfish Areas	<ul style="list-style-type: none"> CT Recreational Shellfish Beds 	Town and/or state managed recreational shellfishing areas.
Commercial Aquaculture Locations	<ul style="list-style-type: none"> CTDABA Aquaculture Operations CTDABA Seaweed Licenses CTDABA Aquaculture Gear areas CTDABA Town/State Shellfish Lease beds NYDEC Aquaculture Sites 	Shellfish leases, seaweed leases, gear areas, designated natural beds, and any other type of authorized aquaculture venture in CT and NY as applicable.
