PERFORM IN-PROGRESS/FINAL CLIENT INTERVIEW PASS FAIL NA

Note: Much of this will be repeated for In-Progress and Final

- Conduct announced or unannounced inspection on about 1/3 or 33% of total jobs
- Perform random sampling of Job Site documents for In-Progress Inspection (WO, MSDS, Certificates)
- Specifically ask about the professionalism of the workers.
- Determine homeowners final work satisfaction level:

Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
How would you rate the professionalism of the contractor and his work?						
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
What was your comfort level with the Contractor?						
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did they schedule the work appropriately, time wise?						
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did they clean up after themselves every day?						
- Record Client's answers and note for Client File.
- Inform Client about your QC inspection process and that you will share your results

IN-PROGRESS CONTRACTOR WORK ORDER REVIEW

PASS **FAIL** **NA**

- Observe worker’s installation skills, safety and professionalism.
 - Identify measures that would have required fall protection.
 - Identify appropriate respirator requirements for measures in WorkOrder.
 - Identify appropriate PPE in relation to work in confined spaces.
 - Identify appropriate PPE in relation to the measures in WorkOrder.
 - Identify any potential Jobsite Hazards or Health & Safety Hazards.
 - Random sample of job site documents: PMI, MSDS, and Worker Certifications.
 - Verify the installed measures listed on the work order
 - Review the work in-progress in relation to the work plan
 - Discuss whether there is a need to run additional diagnostic tests
 - Check whether there are any missed opportunities in the audit or work plan
 - Note any discrepancies with the audit
 - Note any damage to the house that may have been from the contractor
 - Document any non-conformances issues on the home or work order from audit so far
- Review Findings with homeowner, Discuss Call Backs - Return To Office - Review the Invoices**

PERFORM EXTERIOR AND INTERIOR INSPECTION IN-PROGRESS/FINAL

PASS **FAIL** **NA**

- Perform exterior inspection/walk around.
- Activate Gas Sniffer and Test Outside Meter/Lines While Outside
- Activate Personal CO Monitor before entering house.
- Test outdoor ambient CO level. **(35 PPM Max.) Document results:**
- Perform interior inspection/walk around.
- Test indoor ambient CO level. **(35 PPM Max.) Document results:**
- Activate Gas Sniffer Outside and Test Inside Appliances/Lines
- Utilize soap or other leak detection liquid/spray to verify leakage areas.

WH & FURNACE COMBUSTION SAFETY ACTION LEVELS

0 - 25 PPM = PASS PROCEED	100 - 400 OR FAIL STOP WORK FIX
26 - 100 & DRAFT OK = PASS SUGGEST GET FIXED	> 400 DRAFT OK = STOP WORK
26 - 100 DRAFT FAIL - SERVICE CALL	> 400 DRAFT FAIL = EMERGENCY SHUT DOWN

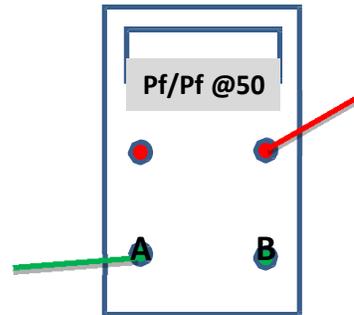

100 - 300 AS MEASURED MUST INSTALL CO DETECTOR AND RECOMMEND SERVICE

- Observe interior of gas oven and boiler for items or excessive debris.
- Turn Exhaust Fan On. Observe condition of burners and flame on gas stove range top.
- Fire stove top observe condition of burners and flame - then shut off
- Conduct CO test for oven. **Steady State 2-5 Min. Record Results:**
- Measure the Temperature of the Hot Water at the Faucet
- (Kitchen/bathroom/laundry). **Record Results:**
- Suggest owner to set Water Temperature to 120 degrees (Energy Saver)**

DIAGNOSTICS AND HEALTH & SAFETY TESTING

BLOWER DOOR DEPRESSURIZATION TEST

- Set combustion appliances to pilot or disable them.
- Prepare home like winter - open interior doors.
- Disable exhaust fans, remove 1 ceiling tile
- Set up the blower door frame/shroud/fan.
- Set manometer Pr/Flow @50
- Measure Baseline Pressure - then Zero Adjust
- Measure pressure at CFM 50** **Document Results:**
- Conduct walk through in home during test to identify any potential problem areas.

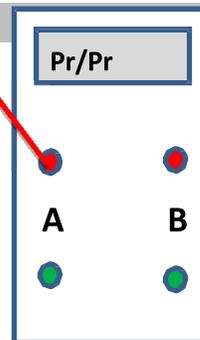

- PASS FAIL NA**
- -
 -
 -
 -
 -
 -
 -

PRESSURE PAN TEST

Pressure Pan

- Identify Supply/Return ducts contained in unconditioned areas.
- Disable furnace and remove filter, tape filter slot.
- Open grills, registers, and dampers
- Depressurize Home to - 50 Pa - Verify Manometer Setup
- Measure registers/grills in unconditioned areas. Record Results
- Identify needed corrective actions/measures.

- PASS FAIL NA**
- -
 -
 -
 -

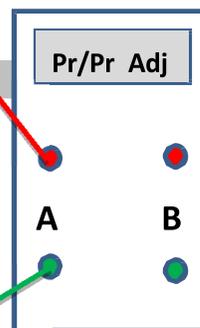

No more than half of the readings shall be higher than 4.0 and Pressure reading shall be greater than 8.0

ZONE TESTING

(WRTO 0-5 GOOD)

- Identify any unconditioned zones in home.
- Verify manometer setup for zone testing. Adjust Baseline
- Depressurize Home to - 50 Pa - Verify Manometer Setup
- Measure zone pressure and compare results to QCI Standards Table.
- Identify needed corrective actions/measures.

To Zone

- PASS FAIL NA**
- -
 -
 -

ATTIC

CRAWL

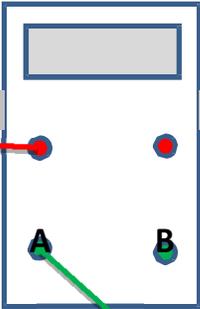

GARAGE

0 - 5 45 - 50

Zone Max - Attic, Knee Walls, Crawl Space, Garages, Basement Walls

WRTO WRTI

CAZ TEST - (Check Furnace Filter and Dryer Lint Screen)

CAZ Zone 

		PASS	FAIL	NA
<input type="checkbox"/>	Identify CAZ. Disable Appliances	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Prepare home setup for winter (natural) conditions.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Verify manometer setup for CAZ testing. Pr/Pr	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Measure baseline pressure. Record Reading: Adjust	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Initiate all exhaust fans/dryer Record Reading:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Initiate HVAC air handler. Record Reading:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Position interior doors to place home in Worst Case Draft (WCD) condition.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Measure worst-case CAZ depressurization. Record Reading:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

COMBUSTION SAFETY AND EFFICIENCY TESTS

		PASS	FAIL	NA
<input type="checkbox"/>	Conduct visual inspection of flue system for problems.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Identify any pre-test HVAC System component safety concerns.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Identify any pre-test Water Heater (DWH) system components safety concerns.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Monitor Ambient CO Levels in the CAZ During All Test Procedures. Record:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	FIRE-UP WATER HEATER FOR TESTING	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Observe Water Heater for Spillage Under WCD conditions.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Measure waterheater spillage (60 Sec BPI/2 MinSWS) Record Time:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CAZ LIMITS

Orphaned Natural Draft Waterheater - 2.0 Pa		
Natural Draft Waterheater vented with a Natural Draft Furnace or Boiler - 3.0 Pa		
Stand Alone Natural Draft Waterheater or Vented with Fan Assisted Furnace - 5.0 Pa		
Natural Draft Wood Stove - 7.0 PA		
ACCEPTABLE DRAFT TEST RANGES - AT TEMPERATURES		OUTSIDE TEMPERATURE?
<10	-2.5	F
10-90	(Outside Temp/40) - 2.75	CALCULATE IT: Pa
>90	-0.5	

		PASS	FAIL	NA
<input type="checkbox"/>	MEASURE WATER HEATER WORST CASE DRAFT. RECORD READING:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	MEASURE CO IN WH FLUE GAS (200 PPM) RECORD CO:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	Identify corrective actions/measures if HW does not PASS spillage, draft, or CO test.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	PERFORM COMBUSTION TEST AT STEADY STATE ON WATER HEATER	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- FIRE-UP FURNACE FOR TESTING**
- Observe heating system for spillage under WCD conditions (natural draft only).
- Measure time for heating system spillage: **60 Sec If Applicable** Sec
- MEASURE FURNACE DRAFT - (existing weather conditions) -RECORD:** Pa
- MEASURE CO IN FURNACE (200 PPM) - RECORD LEVEL:** CO
- Identify corrective actions if heating system does not PASS spillage, draft, or CO test.
- RE-TEST WATERHEATER DRAFT WHILE FURNACE IS RUNNING RECORD:** Pa
- Measure Heat Rise Delta T in Heating System - **Record Number** F

Inadequate Heat Rise Condensation Corrosion 20 - 40	Heat Rise Good For Both 40 - 70	Heat Rise Excessive, Check Fan, Air Flow, Fan Speed 70 - 95
---	------------------------------------	---

DUCT PRESSURIZATION TEST (DUCT BLASTER)

Hose to Duct
Hose to Blaster Fan

- Turn Furnace Off/**Remove Filter/Fans Off**
- Open Window or Door To Allow WRT Outside
- Seal All Supply Registers
- Attach Flex to Return with Template Attach
- Flex Hose to Fan No Rings ALL OPEN
- Verify manometer setup for Duct Pressurization
- CONDUCT DUCT PRESSURIZATION TEST - RECORD:**

25 CFM TEST

PASS **FAIL** **NA**

CONDITIONED SQUARE FEET /100 X 8 = TOTAL DUCT LEAKAGE LIMIT

- Identify needed corrective actions/measures.

ASHRAE 62.2 and EXHAUST FAN FLOW TESTING **PASS** **FAIL** **NA**

Mode 1x - Device 5x - Config for Opening Size

- Complete ASHRAE Spreadsheet with final BD readings, determine final fan settings.
- Set manometer to EX and Config for Flow H **Pr/CFM**
- Verify manometer setup for fan flow testing.
- Measure fan flow and adjust fan to required ventilation flow.
- FAN HIGH** **FAN LOW** **FAN TIME**

Hose To Flow Meter

Evaluate Installed Weatherization Measures	PASS	FAIL	NA
<input type="checkbox"/> Review all installed measures against those listed on Work Order.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Verify installed measures listed on Work Order	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Document any assessment/energy audit discrepancies or missed opportunities.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Document any damage potentially caused by workers.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Compare work completed to Weatherization Standards, SWS or state and local codes.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Document any non-conformances to WX Standards, SWS or State and Local Codes.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Determine if any problems were Material or Work related.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Document any work problems that FAIL for quality, quantity, or non-conformance.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Create (if needed) a Callback/Rework Punch List for any required corrections.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Determine PASS/FAIL of the Work - Identify Work Problems	PASS	FAIL	NA
<input type="checkbox"/> Review the results of your inspection observations and documents.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Compare original assessment/energy audit diagnostic tests with your QCI results.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Make a determination of PASS or FAIL of the work based on the QCI results.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Complete any addition items on the Callback/Rework Punch List.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Turn Furnace and Water Heater Back to Pre-Inspection Settings			

Final Client Interview	PASS	FAIL	NA																								
<input type="checkbox"/> Interview Client regarding the level of satisfaction with the Program.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>																								
<table border="1"> <tr> <td>Excellent <input type="checkbox"/></td> <td>Good <input type="checkbox"/></td> <td>Fair <input type="checkbox"/></td> <td>Poor <input type="checkbox"/></td> </tr> <tr> <td colspan="4">Were you satisfied with the overall Weatherization Program?</td> </tr> <tr> <td>Excellent <input type="checkbox"/></td> <td>Good <input type="checkbox"/></td> <td>Fair <input type="checkbox"/></td> <td>Poor <input type="checkbox"/></td> </tr> <tr> <td colspan="4">Do you notice any comfort changes or lower utility Bills?</td> </tr> <tr> <td>Excellent <input type="checkbox"/></td> <td>Good <input type="checkbox"/></td> <td>Fair <input type="checkbox"/></td> <td>Poor <input type="checkbox"/></td> </tr> <tr> <td colspan="4">Is there anything we could do to improve the Program?</td> </tr> </table>	Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	Were you satisfied with the overall Weatherization Program?				Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	Do you notice any comfort changes or lower utility Bills?				Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>	Is there anything we could do to improve the Program?				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>																								
Were you satisfied with the overall Weatherization Program?																											
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>																								
Do you notice any comfort changes or lower utility Bills?																											
Excellent <input type="checkbox"/>	Good <input type="checkbox"/>	Fair <input type="checkbox"/>	Poor <input type="checkbox"/>																								
Is there anything we could do to improve the Program?																											
<input type="checkbox"/> Share a summary of your inspection results with the Client.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>																								
<input type="checkbox"/> Explain the operation and maintenance smoke/CO detectors, furnace filters, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>																								
<input type="checkbox"/> Ensure client has all information, operation manuals, for measures installed.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>																								
<input type="checkbox"/> Obtain the Client's signature and comments on the required documentation.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
