

# Kent Bedrock Minor Fold and Slip Cleavage Map

Map

## NOTICE !

This document contains unpublished maps, cross- sections, and related information archived by the State Geological and Natural History Survey of Connecticut as part of the Survey Library Collection.

These materials have not been reviewed for accuracy, consistency, or completeness. For many geographic areas, more current information exists, either in published or unpublished form.

For the most part, these materials were developed under research and mapping agreements between the State Geological Survey and individual scientists, academic institutions, or graduate students. Some of these materials have been received by the State Geological Survey as donations. The veracity of the information contained within these documents is the responsibility of the authorship. The State Geological and Natural History Survey of Connecticut, does not promote or endorse this content, nor does the State Survey attest as to its level of accuracy.

These materials have been preserved under a cooperative agreement between the State Geological Survey and the US Geological Survey as part of the National Geological and Geophysical Data Preservation Program. [www.datapreservation.usgs.gov](http://www.datapreservation.usgs.gov)

These materials are offered in the spirit of open government. Reproduction of these manuscripts was conducted to the highest practical degree, within the parameters of the funding mechanism. Original documents are available for inspection by contacting the [Connecticut State Geologist](#).

PLATE 4 - MINOR FOLD AND SLIP CLEAVAGE MAP

EXPLANATION

MINOR FOLDS

Strike and dip of slip cleavage  
 Inclined Vertical

Relative age of slip cleavage  
 Bear Hill stage Late stage

Trend and plunge of minor fold axis

Attitude of axial plane and plunge of minor fold axis

Attitude of axial plane and shear sense of minor folds. Arrow indicates trend and plunge  
 dextral sinistral

Trend and plunge of crinkle axis

Attitude of axial plane and plunge of crinkle fold axis

Relative ages of minor folds and crinkle axes

Late stage Bear Hill stage Early Isoclinal stage Uncertain age
