

Pharmaceutical Universal Waste Stakeholders Group
Public Comment Session
April 9th, 4-6 p.m.
Phoenix Auditorium, DEEP Offices, 79 Elm Street, Hartford, CT

The Connecticut Department of Energy and Environmental Protection (DEEP) has established a [Pharmaceutical Universal Waste Stakeholders Group](#) comprised of professionals with broad pharmaceutical expertise to assist in the development of the regulations to propose hazardous pharmaceutical wastes to be managed as a Connecticut universal waste. Designation as a Connecticut universal waste would be a less stringent regulatory framework than is currently required under the existing hazardous waste management regulations. All Stakeholder documents are accessible online at [Pharmaceutical Universal Waste Stakeholders Group Information and Meeting Schedule](#).

DEEP welcomes public comments related to the development of the regulations to allow hazardous pharmaceutical wastes to be managed as a Connecticut universal waste. Your comments will assist the stakeholder's group in carrying out its mission.

Each speaker may be limited to three minutes; however the stakeholder's group will also accept and review written comments. Please submit written comments to Michele DiNoia at michele.dinoia@ct.gov.

For questions about the comment session, please contact Michele DiNoia at 860-424-3816, or at michele.dinoia@ct.gov.
