# CR05 – Not a “One Size Fits All” approach

- Diverse Category of Wastes
- Generator’s Preferences
- Volume, Frequency
- Mode of Transportation

# Step One - Know Your Waste

- Know the process generating
- MSDS or SDS for process
- Generator knowledge
- Analytical testing
- Profile

# Online Services

- Create, view, edit and submit profiles
- Schedule pick up of drummed waste
- View and print tracking reports and certificates of disposal
- View and print signed manifest images
- Create and manage drum, lab pack and rolloff inventory

# Local Management Option

- Centrally located in Bristol, CT
- RCRA Part B and CWA Permits
- Truck-To-Truck
- Wastewater treatment
- Bulking, solidification and stabilization

# CR05 Specific Management

- Bulk and consolidate into larger containers for off-site management
  - Recycling
  - Energy recovery
  - Incineration
  - Landfill
- Truck-To-Truck for material not suitable for processing in Bristol
  - Shredding for destruction or energy recovery

# Conclusion

- Due to a large disposal network and transportation infrastructure, Clean Harbors can efficiently manage diverse waste including Connecticut Regulated Wastes
- Technology infrastructure has enabled prompt, accurate service with tools to aid in waste reporting and tracking requirements
- Clean Harbor's is fully permitted by CT DEEP to accept "CR05" waste – DEEP/HWM-017-004
- In state offerings are price competitive!!!!
