Connecticut Department of Energy and Environmental Protection

Transformation Goals and Strategies

Transformation goals

Faster

More effective

More efficient

More responsive

More predictable

More transparent

Immediate next steps

- Investing in information technology solutions to achieve efficiencies
- Identify statutory and regulatory obstacles to change
- Pursue shift from a “command and control” focus toward market based approaches
- Developing core metrics with measurable environmental and programmatic improvements

Promote an Integrated, Balanced Approach to Compliance Assurance

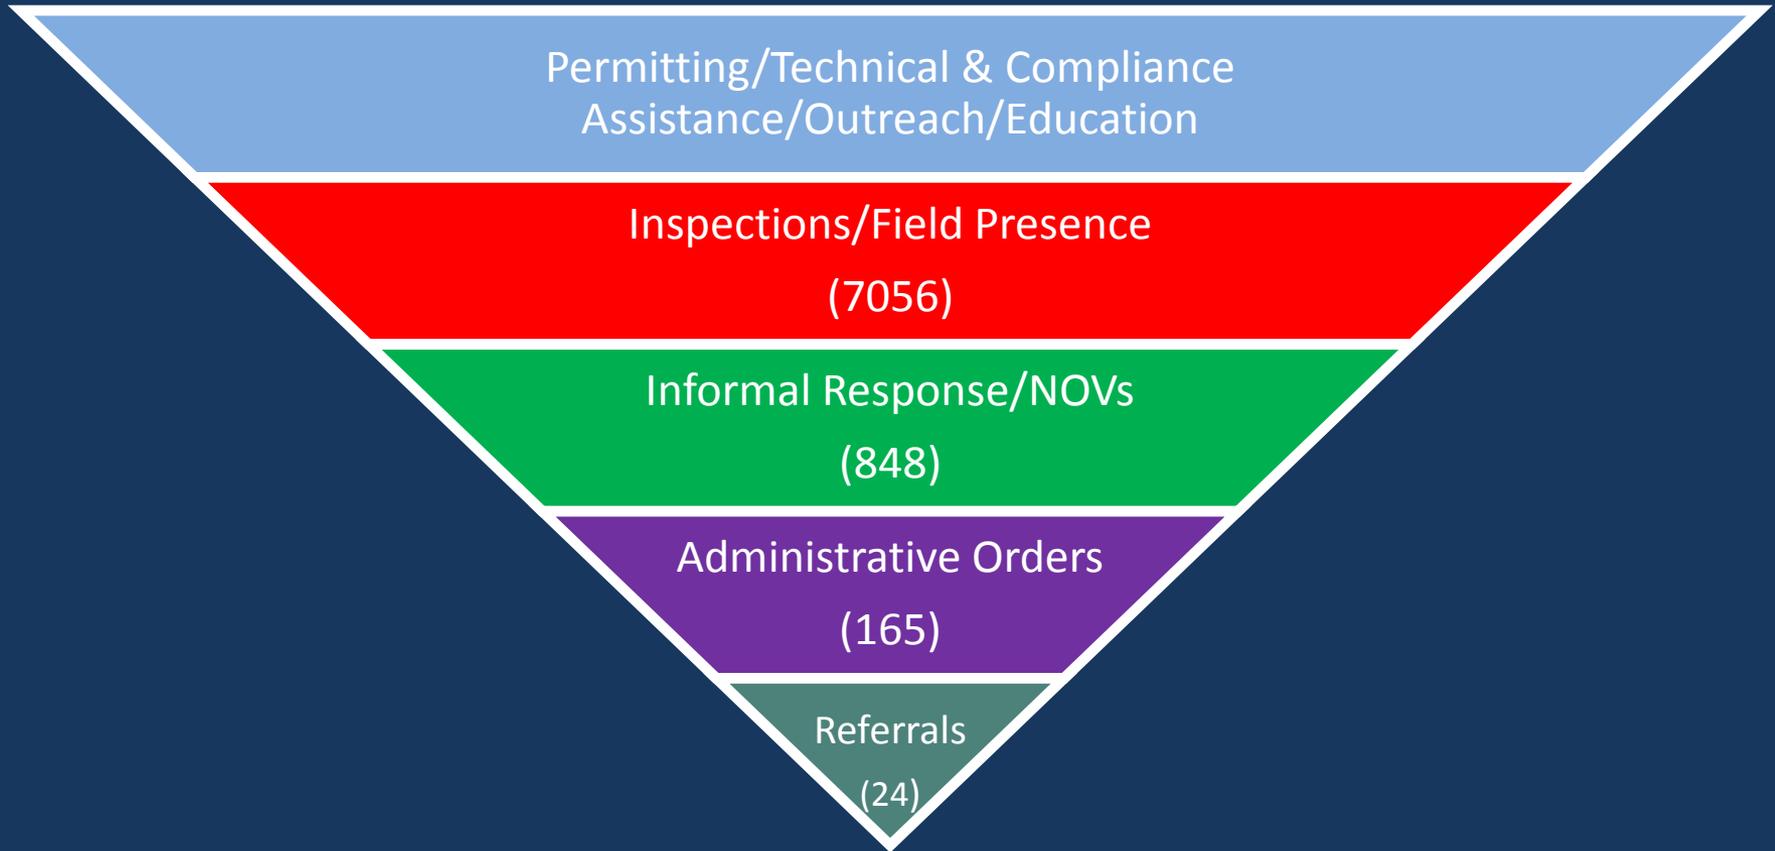

Maximize protection of the environmental and public health and safety by

- using permit, compliance assistance and enforcement tools and resources in an integrated, balanced manner
- to solve environmental problems identified as priorities.

Progressive Compliance Assurance

Preferred Path to Compliance- Five Year Average FY2007-2011

Connecticut Department of Energy and Environmental Protection

Tailoring Our Compliance Tools to Evolving Regulated Population

- Identify sectors or geographic areas where there are environmental problems and high non compliance
- Develop new tools or tailor existing tools to appropriately address areas of non compliance
- Recognize how small businesses now comprise a large portion of our regulated universe - DEEP needs to adapt tools to accommodate this evolving regulated population
