Connecticut Department of Energy and Environmental Protection

In The Beginning...

- When the Solid Waste Management Advisory Committee was established in 2007 to assist with the implementation of the State Solid Waste Management Plan (Amended 2006)
- As part of this process, a number of subcommittees were created.

The First Five

- Construction and Demolition
- Database Management System
- Increasing Source Reduction and Recycling Rates
- Organics Recycling and Composting
- Solid Waste Statutes and Regulation Reform
- These committees originally met 2007-2008 and then disbanded once workplans were developed.

Newer Additions

- Materials Reuse Network
- Gypsum Wallboard Recycling
- Recycling Market Development Council
- Regional “Roundtable”

Newer Additions

- Materials Reuse Network
- Gypsum Wallboard Recycling
- Recycling Market Development Council
- Regional “Roundtable”

Next steps?

- New Subcommittees?
 - One suggestion to form group to discuss needs of cities/towns with municipally-provided collection
 - New subcommittee to meet needs of proposed SB 816 (regarding Regional Composting Facility Siting) ?
- Revitalization of Dormant Subcommittees?
 - C&D and Organics have been suggested, but might the Recycling Markets Development Council subcommittee fit that need?

Discussion
