Specializing in Full Service Waste Removal & Recycling

USA Hauling & Recycling is a family owned and operated company that has served residential, commercial, industrial and construction industry's waste removal needs for the past 40 years. Our extensive experience and capabilities are the basis for the best service available in our industry. In addition to a current truck fleet and well maintained containers, we keep current with the latest industry trends and regulations. In fact, we provide a superior level of service to the industry standard.

Topics of Discussion

- *Facilities*
- *C & D Recycling*
- *Demolition*

Facilities

Facilities

- C & D Recycling

- East Windsor
- Hartford
- New Haven
- Portland
- South Windsor
- Stratford
- Suffield
- Waterbury
- Waterford
- Winsted

- Paper Processing

- Berlin-Single Stream
- Bridgeport
- Hartford
- Waterbury

C & D Recycling

C & D Recycling

- Construction and Demolition (C&D) activities generate enormous quantities of solid waste
- Commercial construction generates approximately 2 to 2.5 pounds of solid waste per square foot.
- The composition of C&D debris is highly variable and depends on the type of activity, i.e. new construction, renovations, demolition.

C & D Recycling

- Recycling of Construction and Demolition Debris reduces demand for virgin resources, and in turn reduces the environmental impacts associated with resource extraction processing and transportation.
- Through effective Construction Waste management, it is possible to extend the lifetime of existing landfills and avoid the need for expansion or new landfill sites.

Establishing A Waste Management Plan

- Identify Materials

Asphalt, Brick, Concrete (ABC)

Cardboard, Paper, Plastic

Food Waste, Organics

Metal

Single Stream

Wood

Other-Ceiling Tiles, Gypsum,
Asphalt Shingles

- Training and Compliance

- Site Monitor

Demolition

A large, 3D-rendered pencil tip is shown in the upper right corner of the page. The pencil is blue and silver, with a sharp point. It is positioned diagonally, pointing towards the bottom right. The background behind the pencil tip consists of horizontal red and white stripes, similar to the American flag.

Introduction

Green building design includes all players in an integrated design development process, from the design team (building owners, architects, engineers and consultants) , the construction team (materials manufacturers, CONTRACTORS and WASTE HAULERS) , maintenance staff, and building occupants. The green building process results in a high-quality product that maximizes the owner's return on investment.

Summary

- Experienced and Innovative
- Multiple Transfer Stations and Volume Reduction Facilities
- Conforming to LEED Requirement per US Green Building Council
- Superior Safety and Service Record
