RREC Report: January 2016

Highlights

- According to data provided by the CT DOC, **670** offenders discharged their sentences in January 2016; **563** had been awarded at least one day of RREC.
- The amount of RREC awarded ranged from **1** day to **581** days. The average discharged offender was awarded **79.7** days. **350** or **62%** of offenders awarded RREC were awarded fewer than 60 days.
- Discharges are trending down. The total number of offenders discharged in the month of January 2016 was 27% lower than January 2012 (919 vs 670). The number of offenders discharged with RREC declined even more over the same period, by 31% (814 vs 563). See Table 1. To further emphasize this point, compare total discharges the year before RREC's implementation, 2010, (11,035) to 2015 (9,063), a difference of 1,972 discharges and an 18% drop, see Table 2.
- Offenders who were discharged with awarded RREC had served time for a wide range of offenses. There are **82** controlling offenses associated with these discharges, see Table 3.
- This report builds on the initial summary report published in February 2016 by this office. That report is available at the link below.
