

# **Teacher Evaluation Professional Learning Plan**

**2015 – 2016**

Norwalk Public Schools

## **Introduction**

The Norwalk teacher evaluation committee adopted the following area of SEED:

- Differentiation of levels of teacher experience in the evaluation process
- Strong connections between student learning and professional growth
- Collaboration in support of school improvement
- The ability to consider professional growth opportunities for teachers assessment opportunities for evaluators

### **Teacher Plan**

In the Norwalk Plan for Teacher Evaluation and Professional Development the term teacher refers to all certified staff (including, but not limited to classroom teachers, speech/language pathologists, social workers, school psychologists, counselors and resource teachers, etc. The term evaluator refers to a supervisor certified in administration and supervision who is employed under their 092 certification endorsement.

The Norwalk Plan for Teacher Evaluation and Professional Development has been implemented since 2012. As a pilot district, Norwalk administrators received training related to new SEED document in addition to receiving the state Common Core of Teaching domains. Training focused on the goal setting and assessment process to implement, collect evidence, and assess the varied goals required by the Plan. The training also focused on developing professional growth plans, including establishing program and school goals for improved student learning, facilitating collaborative and peer coaching activities, identifying indicators for evaluating success and collecting feedback from stakeholders.

Training for teachers was completed in two parts. The first part was an orientation to the plan for all teachers at the beginning of the 2012 school year per the state guidelines. In the second part, all teachers received information regarding how to develop the necessary goals, SLOs, IAGDs, focus areas etc., and collect artifacts that show evidence of growth. These sessions occurred during staff release time in 2012 – 2013. New teachers to the district receive training from principals on developing SLOs and IAGDs.

# Teacher Evaluation and Development Model

## Introduction

This document outlines the foundation for the Norwalk model for the evaluation and development of teachers. It is based on SEED which is Connecticut's System for Educator Evaluation and Development.

## Purpose and Rationale

When teachers succeed, students succeed. Research has shown that no school-level factor matters more to students' success than high-quality teachers. To support teachers, we need to clearly define excellent practice and results; give accurate, useful information about teachers' strengths and development areas; and provide opportunities for growth and recognition. The purpose of the new evaluation model is to fairly and accurately evaluate teacher performance and to help each teacher strengthen his/her practice to improve student learning.

## Core Design Principles

The following principles guided the design of the teacher evaluation model:

- Consider multiple standards-based measures of performance
- Emphasize teacher growth over time
- Promote both professional judgment and consistency
- Foster dialogue about student learning
- Encourage aligned professional learning, coaching and feedback to support teacher growth
- Ensure feasibility of implementation.

# Evaluation and Support System Overview

The evaluation and support system consists of multiple measures to paint an accurate and comprehensive picture of teacher performance. All teachers will be evaluated in four categories, grouped in two major focus areas: Teacher Practice and Student Outcomes.

**1. Teacher Practice Related Indicators:** An evaluation of the core instructional practices and skills that positively affect student learning. This focus area is comprised of two categories:

- (a) **Observation of teacher performance and practice (40%)** as defined in the Danielson Model, which for teacher evaluation, articulates four domains
- (b) **Parent feedback (10%)** on teacher practice through surveys

**2. Student Outcomes Related Indicators:** An evaluation of teachers' contribution to student academic progress, at the school and classroom level. There is also an option in this focus area to include student feedback.

- (a) **Student growth and development** as determined by the teacher's Student Learning Objectives (SLOs). One SLO is required with multiple Indicators of Academic Growth and Development (IAGD) (no more than four) or 2 SLOs with 1 IAGD for each.
- (b) **Whole-school measures of student learning** as determined by aggregate student learning indicators (5%) based on school performance index.

## \*Goals and Objectives Using Multiple Indicators of Growth and Development

The district will use Smarter Balanced testing results, or beginning of year (BOY) middle of year (MOY) and end of year (EOY) district assessments for the 2015 – 2016 school year. (45%) of the Indicators of Academic Growth and Developments used as evidence of whether goals/objectives are met shall not be determined by a single, isolated test score, but shall be determined through the comparison of data across assessments administered over time.

Scores from each of the four categories are combined to produce a summative performance rating of Exemplary, Proficient, Developing or Below Standard. The performance levels are defined as:

**Exemplary** – Substantially exceeding indicators of performance

**Proficient** – Meeting indicators of performance

**Developing** – Meeting some indicators of performance but not others

**Below Standard** – Not meeting indicators of performance

# Observation Process

Teacher Category	Requirements
First and Second Year Beginning Teachers	At least 3 formal in-class observations; 2 of which include a pre-conference and all of which include a post-conference
<i>Below Standard and Developing</i>	At least 3 formal in-class observations; 2 of which include a pre-conference and all of which must include a post-conference. Norwalk Focused Assistance and Intervention Plan if needed.
<i>Proficient and Exemplary</i>	Teachers who receive and maintain a performance evaluation designation of proficient or exemplary shall be evaluated with a minimum of 1 formal in-class observation no less frequent than every 3 years and 3 informal in-class observations in all other years. One review of practice shall be completed every year

The district will use the Danielson Rubric (see attachment A):

**Domain 1:** Planning and Preparation

**Domain 2:** The Classroom Environment

**Domain 3:** Instruction

**Domain 4:** Professional Responsibilities

- **Formal** Observations last at least 30 minutes and are followed by a post-observation conference, which includes timely written and verbal feedback.
- **Informal** Observations last at least ten minutes and are followed by written and/ or verbal feedback.
- **Non-classroom observations/reviews of practice include but are not limited to:** Observations of data team meetings, observations of coaching/mentoring other teachers, student work or other teaching artifacts.

## Parent Feedback

Feedback from parents will be used to help determine the remaining 10% of the Teacher Practice Indicators focus area. Provision is included for school governance council to assist in the development of whole-school surveys to align with school improvement goals.

The process for determining the parent feedback rating includes the following steps:

1. The school conducts a whole-school parent survey is aggregated at the school level
2. Administrators and teachers determine several school-level parent goals based on the survey feedback
3. The teacher and evaluator identify **one** related parent engagement goal and set improvement targets;
4. Evaluator and teacher measure progress on growth targets; and
5. Evaluator determines a teacher's summative rating, based on four performance levels.

### Administration of a Whole-School Parent Survey

Parent surveys should be conducted at the whole-school level as opposed to the teacher-level, meaning parent feedback will be aggregated at the school level. This is to ensure adequate response rates from parents.

Parent surveys must be administered in a way that allows parents to feel comfortable providing feedback without fear of retribution. Surveys should be confidential and survey responses should not be tied to parents' names. The parent survey should be distributed every spring and trends analyzed from year-to-year.

### Determining School-Level Parent Goals

Evaluators and teachers should review the parent survey results at the beginning of the school year to identify areas of need and set general parent engagement goals. Ideally, this goal-setting process would occur between the principal and teachers (possibly during faculty meetings) in late August or September so agreement can be reached on 2-3 improvement goals for the entire school/program.

### Selecting a Parent Engagement Goal and Improvement Targets

After these school-level goals have been set, teachers will determine through consultation and mutual agreement with their evaluators **one** related parent goal they would like to pursue as part of their evaluation. Possible goals include improving communication with parents, helping parents become more effective in support of homework, improving parent-teacher conferences, etc.

## Measuring Progress on Growth Targets

Teachers and their evaluators should use their judgment in setting growth/improvement targets for the parent feedback component. There are two ways teachers can measure and demonstrate progress on their growth targets. Teachers can (1) measure how successfully they implement a strategy to address an area of need (like the examples in the previous section), and/or (2) they can collect evidence directly from parents to measure parent-level indicators they generate. For example, teachers can conduct interviews with parents or a brief parent survey to see if they improved on their growth target.

## Arriving at a Parent Feedback Rating.

The Parent Feedback rating should reflect the degree to which a teacher successfully reaches his/her parent goal and improvement targets. This is accomplished through a review of evidence provided by the teacher and application of the following scale:

Exemplary (4)	Proficient (3)	Developing (2)	Below Standard (1)
Exceeded the goal	Met the goal	Partially met the goal	Did not meet the goal

## **Teacher Evaluation Process and Timeline**

The annual evaluation process between a teacher and an evaluator (principal or designee) is anchored by three performance conversations at the beginning, middle and end of the year. The purpose of these conversations is to clarify expectations for the evaluation process, provide comprehensive feedback to each teacher on his/her performance, set development goals and identify development opportunities. These conversations are collaborative and require reflection and preparation by both the evaluator and the teacher in order to be productive and meaningful.

## Goal-Setting and Planning:

Timeframe: Target is October 15; must be completed by **November 15**

1. *Orientation on Process* – To begin the evaluation process, evaluators meet with teachers, in a group or individually, to discuss the evaluation process and their roles and responsibilities within it. In this meeting, they will discuss any school or district priorities that should be reflected in teacher practice goals and student learning objectives (SLOs), and they will commit to set time aside for the types of collaboration required by the evaluation process.

2. *Teacher Reflection and Goal-Setting* – The teacher examines student data, prior year evaluation and survey results and the Connecticut Common Core of Teaching Standards to draft a proposed performance and practice goal(s), a parent feedback goal, student learning objectives (SLOs). The teacher may collaborate in grade-level or subject-matter teams to support the goal-setting process.
3. *Goal-Setting Conference* – The evaluator and teacher meet to discuss the teacher’s proposed goals and objectives in order to arrive at mutual agreement about them. The teacher collects evidence about his/her practice and the evaluator collects evidence about the teacher’s practice to support the review. The evaluator may request revisions to the proposed goals and objectives if they do not meet approval criteria.

#### Mid-Year Check-In:

Timeframe: **January and February**

1. *Reflection and Preparation* – The teacher and evaluator collect and reflect on evidence to date about the teacher’s practice and student learning in preparation for the check-in.
2. *Mid-Year Conference* – The evaluator and teacher complete at least one mid-year check-in conference during which they review progress on teacher practice goals, student learning objectives (SLOs) and performance on each to date. The mid-year conference is an important point in the year for addressing review progress/ concerns and reviewing results for the first half of the year. Evaluators can deliver mid-year formative information on components of the evaluation framework for which evidence has been gathered and analyzed. If needed, teachers and evaluators can mutually agree to revisions on the strategies or approaches used and/or mid-year adjustment of SLOs to accommodate changes (e.g., student populations, assignment). They also discuss actions that the teacher can take and supports the evaluator can provide to promote teacher growth in his/her development areas.

#### End-of-Year Summative Review:

Timeframe: May and June; must be completed by **June 30**

1. *Teacher Self-Assessment* – The teacher reviews all information and data collected during the year and completes a self-assessment for review by the evaluator. This self-assessment may focus specifically on the areas for development established in the goal-setting conference.
2. *Scoring* – The evaluator reviews submitted evidence, self-assessments and observation data to generate category and focus area ratings. The category ratings generate the final, summative rating. After all data, including state test data, are available, the evaluator may adjust the summative rating if the state test data change the student-related indicators significantly to change the final rating. Such revisions should take place as soon as state test data are available and before September 15.

3. *End-of-Year Conference* – The evaluator and the teacher meet to discuss all evidence collected to date and to discuss category ratings. Following the conference, the evaluator assigns a summative rating and generates a summary report of the evaluation before the end of the school year or before June 30.

### **Primary Evaluators**

The primary evaluator for most teachers will be the school principal or assistant principal/house master, who will be responsible for the overall evaluation process, including assigning summative ratings. Primary evaluators will have sole responsibility for assigning final summative ratings and must achieve proficiency on the training modules provided.

### **Ensuring Fairness and Accuracy: Evaluator Training, Monitoring and Auditing**

All evaluators will be trained through CES on the state model. School based training will center on the Danielson model. Ongoing calibration is through Todd White at *Phocused on Learning, LLC*. All evaluators are engaged in an inter-rater process. All evaluators view an entire lesson [at either elementary, middle or high school level] and rate the lesson on all 26 indicators on the Norwalk framework. The ratings are then compared to a set of scores from a national norming committee. The norming committee is a group of 8 people who work with teacher effectiveness. All evaluators' must receive a proficient score in order to evaluate our teachers. If a proficient score is not received the evaluator must continue with professional learning.

## **SUPPORT AND DEVELOPMENT**

As a standalone, evaluation cannot hope to improve teaching practice and student learning. However, when paired with effective, relevant and timely support, the evaluation process has the potential to help move teachers along to exemplary practice.

### **Evaluation-Based Professional Learning**

In any sector, people learn and grow by honestly co-assessing current performance, setting clear goals for future performance, and outlining the supports they need to close the gap. Throughout the Norwalk model, every teacher will be identifying their professional learning needs in mutual agreement between the teacher and his/her evaluator. This will serve as the foundation for ongoing conversations about the teacher's practice and impact on student outcomes. The professional learning opportunities identified for each teacher should be based on the individual strengths and needs that are identified through the evaluation process. The process may also reveal areas of common need among teachers, which can then be targeted with school-wide professional development opportunities.

### **Improvement and Remediation Plans**

If a teacher's performance is rated as *developing* or *below standard*, it signals the need for the administrator to create an individual teacher improvement and remediation plan. The improvement and remediation plan should be developed in consultation with the teacher and

his/her exclusive bargaining representative. Norwalk will use a Focused Assistance Model and/or an intervention model:

- Identify resources, support and other strategies to be provided to address documented deficiencies.
- Indicate a timeline for implementing such resources, support and other strategies, in the course of the same school year as the plan is issued.
- Include indicators of success including a summative rating of *proficient* or better at the conclusion of the improvement and remediation plan.

## **Career Development and Growth**

Rewarding exemplary performance identified through the evaluation process with opportunities for career development and professional growth is a critical step in both building confidence in the evaluation system itself and in building the capacity of all teachers.

Examples of such opportunities include, but are not limited to: peers modeling; mentoring early-career teachers; participating in development of teacher improvement and remediation plans for peers whose performance is *developing* or *below standard*; leading Professional Learning Communities; differentiated career pathways; and focused professional development based on goals for continuous growth and development.

### Pre-Conferences and Post-Conferences

Pre-conferences are valuable for giving context for the lesson and information about the students to be observed and for setting expectations for the observation process. A pre-conference can be held with a group of teachers, where appropriate.

Post-conferences provide a forum for reflecting on the observation against the Danielson Model for generating action steps that will lead to the teacher's improvement. A good post-conference:

- begins with an opportunity for the teacher to share his/her self-assessment of the lesson observed;
- cites objective evidence to paint a clear picture for both the teacher and the evaluator about the teacher's successes, what improvements will be made, and where future observations may focus;
- involves written and verbal feedback from the evaluator; and
- occurs within two days of the observation.

### Non-Classroom

Because the new evaluation model aims to provide teachers with comprehensive feedback on their practice as defined by the four domains of the Danielson Model, all interactions with teachers that are relevant to their instructional practice and professional conduct may contribute to their performance evaluations. These interactions may include, but are not limited to, reviews of lesson/unit plans and assessments, planning meetings, data team meetings, professional learning community meetings, call-logs or notes from parent-teacher meetings, observations of

coaching/mentoring other teachers, and attendance records from professional development or school-based activities/events.

## Feedback

The goal of feedback is to help teachers grow as educators and become more effective with each and every one of their students. With this in mind, evaluators should be clear and direct, presenting their comments in a way that is supportive and constructive. Feedback should include:

- specific evidence and ratings, where appropriate, on observed components of the Danielson Model.
- prioritized commendations and recommendations for development actions.
- next steps and supports the teacher can pursue to improve his/her practice.
- a timeframe for follow up.

## **Teacher Performance and Practice Focus Area**

As described in the Evaluation Process and Timeline section, teachers develop one performance and practice focus area that is aligned to the Danielson Model. The focus area will guide observations and feedback conversations throughout the year.

Each teacher will work with his or her evaluator to develop a practice and performance focus area through mutual agreement. All focus areas should have a clear link to student achievement and should move the teachers towards *proficient* or *exemplary*. Schools may decide to create school-wide or grade-specific focus areas aligned to a particular indicator.

Growth related to the focus areas should be referenced in feedback conversations throughout the year. The focus area and action steps should be formally discussed during the Mid-Year Conference and the End-of-Year Conference. Although performance and practice focus areas are not explicitly rated as part of the Teacher Performance and Practice component, growth related to the focus area will be reflected in the scoring of Teacher Performance and Practice evidence.

## **Teacher Performance and Practice Scoring**

### Individual Observations

Evaluators are not required to provide an overall rating for each observation, but they should provide ratings and evidence for the Rubric indicators that were observed. During observations, evaluators should take evidence-based, scripted notes, capturing specific instances of what the teacher and students said and did in the classroom. Evidence-based notes are factual (e.g., the teacher asks: Which events precipitated the fall of Rome?) and not judgmental (e.g., the teacher asks good questions). Once the evidence has been recorded, the evaluator can align the evidence with the appropriate indicator(s) on the rubric and then make a determination about which performance level the evidence supports.

## **Summative Observation of Teacher Performance and Practice Rating**

Primary evaluators must determine a final teacher performance and practice rating and discuss this rating with teachers during the End-of-Year Conference. Within the Norwalk Plan, each domain of the Danielson Rubric carries equal weight in the final rating. The final teacher performance and practice rating will be calculated by the evaluator in a three-step process:

1. Evaluator holistically reviews evidence collected through observations and interactions (e.g., team meetings, conferences) and uses professional judgment to determine indicator ratings for each of the 17 indicators.
2. Evaluator averages indicators within each domain to a tenth of a decimal to calculate domain-level scores of 1.0-4.0.
3. Evaluator averages domain scores to calculate an overall Observation of Teacher Performance and Practice rating of 1.0-4.0.

Each step is illustrated below:

1. Evaluator holistically reviews evidence collected through observations and interactions and uses professional judgment to determine indicator ratings for each of the 17 indicators.
2. By the end of the year, evaluators should have collected a variety of evidence on teacher practice from the year's observations and interactions. Evaluators then analyze the consistency, trends, and significance of the evidence to determine a rating for each of the 17 indicators. Some questions to consider while analyzing the evidence include:

**Consistency:** What rating have I seen relatively uniform, homogenous evidence for throughout the semester? Does the evidence paint a clear, unambiguous picture of the teacher's performance in this area?

**Trends:** Have I seen improvement over time that overshadows earlier observation outcomes? Have I seen regression or setbacks over time that overshadows earlier observation outcomes?

**Significance:** Is some data more valid than others? (Do I have notes or ratings from "meatier" lessons or interactions where I was able to better assess this aspect of performance?)

3. The summative Teacher Performance and Practice category rating and the indicator ratings will be shared and discussed with teachers during the End-of-Year Conference. This process can also be followed in advance of the Mid-Year Conference to discuss progress toward Teacher Performance and Practice goals/outcomes.

### **Teacher Summative Rating**

45% - Student Growth and Development

5% - Whole-School Student Learning Indicators

40% - Observations

10% - Parent feedback

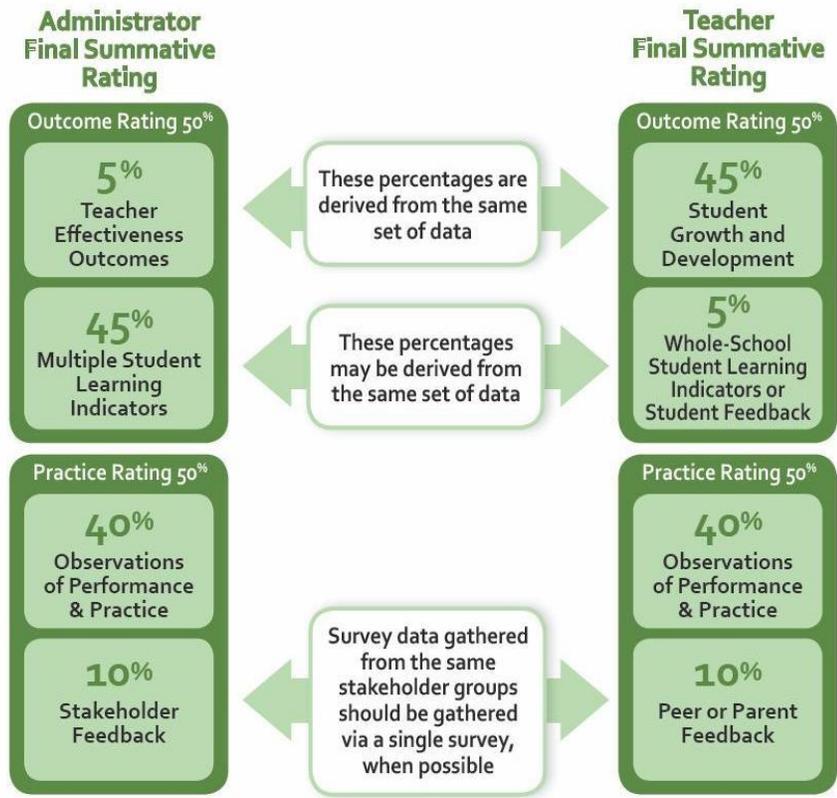

### **Definition of Effectiveness and Ineffectiveness**

New teachers shall generally be deemed effective if said educator receives at least two sequential *proficient* ratings, one of which must be earned in the fourth year of a novice teacher's career. A *below standard* rating shall only be permitted in the first year of a novice teacher's career, assuming a pattern of growth of *developing* in year two and two sequential *proficient* ratings in years three and four. Superintendents shall offer a contract to any educator he/she deems effective at the end of year four. This shall be accomplished through the specific issuance to that effect.

A post-tenure educator shall generally be deemed ineffective if said educator receives at least two sequential *developing* ratings or one *below standard* rating at any time.

### **Dispute-Resolution Process**

A panel, composed of Director of Human Services, teachers union president and a neutral third person, shall resolve disputes where the evaluator and teacher cannot agree on objectives/goals, the evaluation period, feedback on performance and practice, or final summative rating. Resolutions must be topic-specific and timely. Should the process established not result in resolution of a given issue, the determination regarding that issue will be made by the Superintendent.

## Evidence of Teaching

### Domain 1: Planning and Preparation

Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>1a Demonstrating Knowledge of Content and Pedagogy</b>	The teacher's plans and practice display little knowledge of the content, prerequisite relationships between different aspects of the content, or the instructional practices specific to that discipline.	The teacher's plans and practice reflect some awareness of the important concepts in the discipline, prerequisite relationships between them, and instructional practices specific to that discipline.	The teacher's plans and practice reflect solid knowledge of the content, prerequisite relationships between important concepts, and the instructional practices specific to that discipline.	The teacher's plans and practice reflect extensive knowledge of the content and the structure of the discipline. The teacher actively builds on knowledge of prerequisites and misconceptions when describing instruction or seeking causes for student misunderstanding.

<b>1c Setting Instructional Outcomes</b>	Instructional outcomes are unsuitable for students, represent trivial or low-level learning, or are stated only as activities. They do not permit viable methods of assessment.	Instructional outcomes are of moderate rigor and are suitable for some students, but consist of a combination of activities and goals, some of which permit viable methods of assessment. They reflect more than one type of learning, but the teacher makes no attempt at coordination or integration.	Instructional outcomes are stated as goals reflecting high-level learning and curriculum standards. They are suitable for most students in the class, represent different types of learning, and can be assessed. The outcomes reflect opportunities for coordination.	Instructional outcomes are stated as goals that can be assessed, reflecting rigorous learning and curriculum standards. They represent different types of content, offer opportunities for both coordination and integration, and take account of the needs of individual students.

<b>1d Demonstrating Knowledge of Resources</b>	The teacher demonstrates little or no familiarity with resources to enhance own knowledge, to use in teaching, or for students who need them. The teacher does not seek such knowledge.	The teacher demonstrates some familiarity with resources available through the school or district to enhance own knowledge, to use in teaching, or for students who need them. The teacher does not seek to extend such knowledge.	The teacher is fully aware of the resources available through the school or district to enhance own knowledge, to use in teaching, or for students who need them.	The teacher seeks out resources in and beyond the school or district in professional organizations, on the Internet, and in the community to enhance own knowledge, to use in teaching, and for students who need them.

<b>1e Designing Coherent Instruction</b>	The series of learning experiences is poorly aligned with the instructional outcomes and does not represent a coherent structure. The experiences are suitable for only some students.	The series of learning experiences demonstrates partial alignment with instructional outcomes, some of which are likely to engage students in significant learning. The lesson or unit has a recognizable structure and reflects partial knowledge of students and resources.	The teacher coordinates knowledge of content, students, and resources to design a series of learning experiences aligned to instructional outcomes and suitable to groups of students. The lesson or unit has a clear structure and is likely to engage students in significant learning.	The teacher coordinates knowledge of content, students, and resources to design a series of learning experiences aligned to instructional outcomes, differentiated where appropriate to make them suitable for all students and likely to engage them in significant learning. The lesson or unit's structure is clear and allows for different pathways according to student needs.

Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>1f Designing Student Assessments</b>	The teacher's plan for assessing student learning contains no clear criteria or standards, is poorly aligned with the instructional outcomes, or is inappropriate for many students. The results of assessment have minimal impact on the design of future instruction.	The teacher's plan for student assessment is partially aligned with the instructional outcomes, without clear criteria, and inappropriate for at least some students. The teacher intends to use assessment results to plan for future instruction for the class as a whole.	The teacher's plan for student assessment is aligned with the instructional outcomes, uses clear criteria, and is appropriate for the needs of students. The teacher intends to use assessment results to plan for future instruction for groups of students.	The teacher's plan for student assessment is fully aligned with the instructional outcomes, with clear criteria and standards that show evidence of student contribution to their development. Assessment methodologies may have been adapted for individuals, and the teacher intends to use assessment results to plan future instruction for individual students.

## Domain 2: The Classroom Environment

Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>2a Creating an Environment of Respect and Rapport</b>	Classroom interactions, both between the teacher and students and among students, are negative, inappropriate, or insensitive to students' cultural backgrounds, and characterized by sarcasm, put-downs, or conflict.	Classroom interactions, both between the teacher and students and among students, are generally appropriate and free from conflict, but may be characterized by occasional displays of insensitivity or lack of responsiveness to cultural or developmental differences among students.	Classroom interactions, both between teacher and students and among students, are polite and respectful, reflecting general warmth and caring, and are appropriate to the cultural and developmental differences among groups of students.	Classroom interactions among the teacher and individual students are highly respectful, reflecting genuine warmth and caring and sensitivity to students' cultures and levels of development. Students themselves ensure high levels of civility among members of the class.
<i>Evidence</i>				
Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>2b Establishing a Culture for Learning</b>	The classroom environment conveys a negative culture for learning, characterized by low teacher commitment to the subject, low expectations for student achievement, and little or no student pride in work.	The teacher's attempts to create a culture for learning are partially successful, with little teacher commitment to the subject, modest expectations for student achievement, and little student pride in work. Both teacher and students appear to be only "going through the motions."	The classroom culture is characterized by high expectations for most students and genuine commitment to the subject by both teacher and students, with students demonstrating pride in their work.	High levels of student energy and teacher passion for the subject create a culture for learning in which everyone shares a belief in the importance of the subject and all students hold themselves to high standards of performance—for example, by initiating improvements to their work.

<b>2c Managing Classroom Procedures</b>	Much instructional time is lost because of inefficient classroom routines and procedures for transitions, handling of supplies, and performance of noninstructional duties.	Some instructional time is lost because classroom routines and procedures for transitions, handling of supplies, and performance of noninstructional duties are only partially effective.	Little instructional time is lost because of classroom routines and procedures for transitions, handling of supplies, and performance of noninstructional duties, which occur smoothly.	Students contribute to the seamless operation of classroom routines and procedures for transitions, handling of supplies, and performance of noninstructional duties.
<i>Evidence</i>				
Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>2d Managing Student Behavior</b>	There is no evidence that standards of conduct have been established, and little or no teacher monitoring of student behavior. Response to student misbehavior is repressive or disrespectful of student dignity.	It appears that the teacher has made an effort to establish standards of conduct for students. The teacher tries, with uneven results, to monitor student behavior and respond to student misbehavior.	Standards of conduct appear to be clear to students, and the teacher monitors student behavior against those standards. The teacher response to student misbehavior is appropriate and respects the students' dignity.	Standards of conduct are clear, with evidence of student participation in setting them. The teacher's monitoring of student behavior is subtle and preventive, and the teacher's response to student misbehavior is sensitive to individual student needs. Students take an active role in monitoring the standards of behavior.
<i>Evidence</i>				

Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>2e Organizing Physical Space</b>	The physical environment is unsafe, or some students don't have access to learning. There is poor alignment between the physical arrangement and the lesson activities.	The classroom is safe, and essential learning is accessible to most students; the teacher's use of physical resources, including computer technology, is moderately effective. The teacher may attempt to modify the physical arrangement to suit learning activities, with partial success.	The classroom is safe, and learning is accessible to all students; the teacher ensures that the physical arrangement is appropriate for the learning activities. The teacher makes effective use of physical resources, including computer technology.	The classroom is safe, and the physical environment ensures the learning of all students, including those with special needs. Students contribute to the use or adaptation of the physical environment to advance learning. Technology is used skillfully, as appropriate to the lesson.

<b>3a Communicating with Students</b>	Expectations for learning, directions and procedures, and explanations of content are unclear or confusing to students. The teacher's use of language contains errors or is inappropriate for students' cultures or levels of development.	Expectations for learning, directions and procedures, and explanations of content are clarified after initial confusion; the teacher's use of language is correct but may not be completely appropriate for students' cultures or levels of development.	Expectations for learning, directions and procedures, and explanations of content are clear to students. Communications are appropriate for students' cultures and levels of development.	Expectations for learning, directions and procedures, and explanations of content are clear to students. The teacher's oral and written communication is clear and expressive, appropriate to students' cultures and levels of development, and anticipates possible student misconceptions.
<i>Evidence</i>				
Component	BELOW STANDARD	DEVELOPING	PROFICIENT	EXEMPLARY
<b>3b Using Questioning and Discussion Techniques</b>	The teacher's questions are low-level or inappropriate, eliciting limited student participation, and recitation rather than discussion.	Some of the teacher's questions elicit a thoughtful response, but most are low-level, posed in rapid succession. The teacher's attempts to engage all students in the discussion are only partially successful.	Most of the teacher's questions elicit a thoughtful response, and the teacher allows sufficient time for students to answer. All students participate in the discussion, with the teacher stepping aside when appropriate.	Questions reflect high expectations and are culturally and developmentally appropriate. Students formulate many of the high-level questions and ensure that all voices are heard.

<b>3c Engaging Students in Learning</b>	Activities and assignments, materials, and groupings of students are inappropriate for the instructional outcomes or students' cultures or levels of understanding, resulting in little intellectual engagement. The lesson has no structure or is poorly paced.	Activities and assignments, materials, and groupings of students are partially appropriate for the instructional outcomes or students' cultures or levels of understanding, resulting in moderate intellectual engagement. The lesson has a recognizable structure but is not fully maintained.	Activities and assignments, materials, and groupings of students are fully appropriate for the instructional outcomes and students' cultures and levels of understanding. All students are engaged in work of a high level of rigor. The lesson's structure is coherent, with appropriate pace.	Students, throughout the lesson, are highly intellectually engaged in significant learning and make material contributions to the activities, student groupings, and materials. The lesson is adapted as needed to the needs of individuals, and the structure and pacing allow for student reflection and closure.

<b>3d Using Assessment in Instruction</b>	Assessment is not used in instruction, either through monitoring of progress by the teacher or students, or feedback to students. Students are not aware of the assessment criteria used to evaluate their work.	Assessment is occasionally used in instruction, through some monitoring of progress of learning by the teacher and/or students. Feedback to students is uneven, and students are aware of only some of the assessment criteria used to evaluate their work.	Assessment is regularly used in instruction, through self-assessment by students, monitoring of progress of learning by the teacher and/or students, and high-quality feedback to students. Students are fully aware of the assessment criteria used to evaluate their work.	Assessment is used in a sophisticated manner in instruction, through student involvement in establishing the assessment criteria, self-assessment by students, monitoring of progress by both students and the teacher, and high-quality feedback to students from a variety of sources.

<b>3e Demonstrating Flexibility and Responsiveness</b>	The teacher adheres to the instruction plan, even when a change would improve the lesson or address students' lack of interest. The teacher brushes aside student questions; when students experience difficulty, the teacher blames the students or their home environment.	The teacher attempts to modify the lesson when needed and to respond to student questions, with moderate success. The teacher accepts responsibility for student success but has only a limited repertoire of strategies to draw upon.	The teacher promotes the successful learning of all students, making adjustments as needed to instruction plans and accommodating student questions, needs, and interests.	The teacher seizes an opportunity to enhance learning, building on a spontaneous event or student interests. The teacher ensures the success of all students, using an extensive repertoire of instructional strategies.

<b>4c Communicating with Families</b>	The teacher's communication with families about the instructional program or about individual students is sporadic or culturally inappropriate. The teacher makes no attempt to engage families in the instructional program.	The teacher adheres to school procedures for communicating with families and makes modest attempts to engage families in the instructional program. But communications are not always appropriate to the cultures of those families.	The teacher communicates frequently with families and successfully engages them in the instructional program. Information to families about individual students is conveyed in a culturally appropriate manner.	The teacher's communication with families is frequent and sensitive to cultural traditions; students participate in the communication. The teacher successfully engages families in the instructional program, as appropriate.

<b>4f Showing Professionalism</b>	The teacher has little sense of ethics and professionalism and contributes to practices that are self-serving or harmful to students. The teacher fails to comply with school and district regulations and time lines.	The teacher is honest and well intentioned in serving students and contributing to decisions in the school, but the teacher's attempts to serve students are limited. The teacher complies minimally with school and district regulations, doing just enough to get by.	The teacher displays a high level of ethics and professionalism in dealings with both students and colleagues and complies fully and voluntarily with school and district regulations.	The teacher is proactive and assumes a leadership role in making sure that school practices and procedures ensure that all students, particularly those traditionally underserved, are honored in the school. The teacher displays the highest standards of ethical conduct and takes a leadership role in seeing that colleagues comply with school and district regulations.

**Norwalk Public Schools**

# Norwalk Public Schools ADMINISTRATOR EVALUATION

## **Orientation**

The evaluator provides the administrator with materials outlining the evaluation process, including the rubric, the instruments to be used to gather feedback from stakeholders and their alignment to the rubric, and the process and calculation by which all evaluation elements will be integrated into the overall rating. A timeline for the full cycle of the evaluation process, including general timing of each step throughout the year is also provided.

All steps must conclude by the end of the school year. All administrator evaluators received training as a pilot district.

## **Evaluation Process**

The Norwalk Public Schools Administrator Evaluation designed model for the evaluation and support of administrators, is based on the Connecticut School Leadership Standards. Administrator evaluation and support model defines administrator effectiveness in terms of (1) administrator practice (the actions taken by administrators that have been shown to impact key aspects of school life); (2) the results that come from this leadership (teacher effectiveness and student achievement); and (3) the perceptions of the administrator's leadership among key stakeholders in his/her community.

**The Norwalk model describes four levels of performance for administrators and focuses on the practices and outcomes for effective school and district leaders. These administrators can be characterized as:**

- Meeting expectations as an instructional leader;
- Meeting expectations in at least 3 other areas of practice;
- Meeting 1 target related to stakeholder feedback;
- Meeting state accountability growth targets on tests of core academic subjects (2015);
- Meeting and making progress on 2 Student Learning Objectives aligned to school and district priorities; and
- Having more than 60% of teachers proficient on the student growth portion of their evaluation.

This model for administrator evaluation has several benefits for participants and for the broader community. It provides a structure for the ongoing development of principals and other administrators to establish a basis for assessing their strengths and growth areas so they have the feedback they need to get better. It also serves as a means for districts to hold themselves accountable for ensuring that every child in their district attends a school with effective leaders.

## **Administrator Evaluation and Steps in the Norwalk Model**

The evaluation and support system consists of multiple measures to paint an accurate and comprehensive picture of administrator performance. All administrators will be evaluated in four components, grouped into two major categories: Leadership Practice and Student Outcomes.

1. **Leadership Practice Related Indicators:** An evaluation of the core leadership practices and skills that positively affect student learning. This category is comprised of two components:
  - a) **Observation of Leadership Performance and Practice (40%)** as defined in the Common Core of Leading (CCL): Connecticut School Leadership Standards.
  - b) **Stakeholder Feedback (10%)** on leadership practice through surveys.
2. **Student Outcomes Related Indicators:** An evaluation of an administrator's contribution to student academic progress, at the school and classroom level. This category is comprised of two components:
  - a) **Student Learning (45%)** assessed in equal weight by: (a) progress on the academic learning measures in the state's accountability system for schools and (b) performance and growth on locally-determined measures.
  - b) **Teacher Effectiveness Outcomes (5%)** as determined by an aggregation of teachers' success with respect to Student Learning Objectives (SLOs)

Scores from each of the four components will be combined to produce a summative performance rating of *Exemplary*, *Proficient*, *Developing* or *Below Standard*. The performance levels are defined as:

- ***Exemplary*** – Substantially exceeding indicators of performance
- ***Proficient*** – Meeting indicators of performance
- ***Developing*** – Meeting some indicators of performance but not others
- ***Below Standard*** – Not meeting indicators of performance

## Process and Timeline

This section describes the process by which administrators and their evaluators collect evidence about practice and results over the course of a year, culminating with a final rating and recommendations for continued improvement. The annual cycle allows for flexibility in implementation and lends itself well to a meaningful and doable process. Often the evaluation process can devolve into a checklist of compliance activities that do little to foster improvement and leave everyone involved frustrated. To avoid this, the model encourages two things:

1. That evaluators prioritize the evaluation process, spending more and better time in schools observing practice and giving feedback; and
2. That both administrators and evaluators focus on the depth and quality of the interactions that occur in the process, not just on completing the steps.

Each administrator participates in the evaluation process as a cycle of continuous improvement. The cycle is the centerpiece of state guidelines designed to have all educators play a more active, engaged role in their professional growth and development. For every administrator, evaluation begins with goal-setting for the school year, setting the stage for implementation of a goal-driven plan. The cycle continues with a Mid-Year Formative Review, followed by continued implementation. The latter part of the process offers administrators a chance to self-assess and reflect on progress to date, a step that informs the summative evaluation. Evidence from the summative evaluation and self-assessment become important sources of information for the administrator's subsequent goal setting, as the cycle continues into the subsequent year.

Superintendents can determine when the cycle starts. For example, many will want their principals to start the self-assessment process in the spring in order for goal-setting and plan development to take place prior to the start of the next school year. Others may want to concentrate the first steps in the summer months.

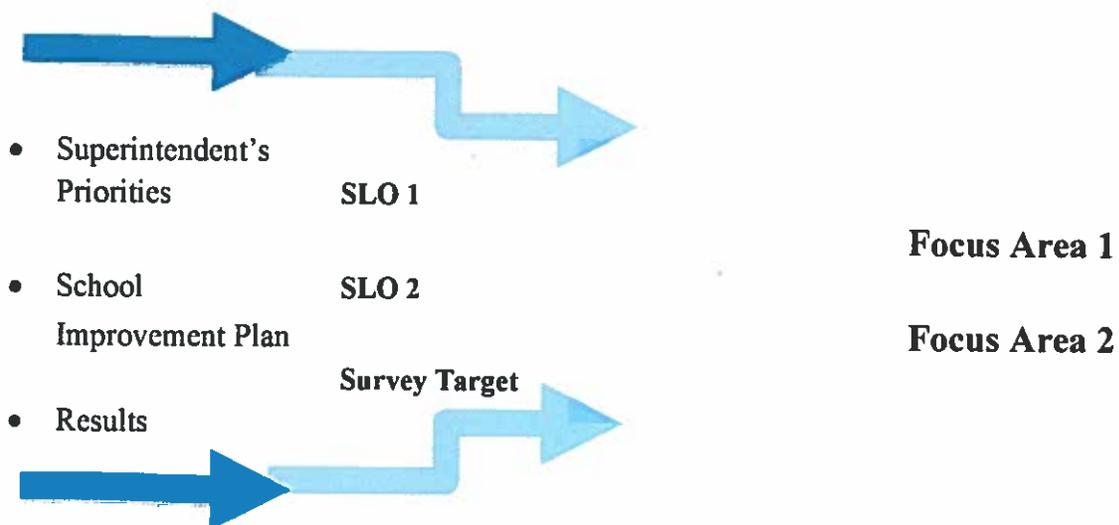

## Step 1: Orientation and Context-Setting

To begin the process, the administrator needs five things to be in place:

1. Student assessments data such as Smarter Balanced and/or beginning of year (BOY), middle of year (MOY) or end of year (EOY) district evaluations are available for review by the administrator and the state has assigned the school a School Performance Index (SPI) (2016).
2. Stakeholder survey data are available for review by the administrator.
3. The superintendent has communicated his/her student learning priorities for the year.
4. The administrator has developed a school improvement plan that includes student learning goals.
5. The evaluator has provided the administrator with this document in order to orient her/ him to the evaluation process. Only #5 is required by the approved Guidelines for Educator Evaluation, but the data from #1-4 are essential to a robust goal-setting process.

## Step 2: Goal-Setting and Plan Development

Before a school year starts, administrators identify two Student Learning Objectives (SLOs) and one survey target, drawing on available data, the superintendent's priorities, their school improvement plan and prior evaluation results (where applicable). They also determine two areas of focus for their practice. This is referred to as "3-2-1 goal-setting."

### **Locally-Determined Measures (Student Learning Objectives)**

Administrators establish two Student Learning Objectives (SLOs) on measures aligned to the district goals. In selecting measures, certain parameters apply:

- All measures must align to Common Core State Standards and Connecticut Content Standards. In instances where there are no such standards that apply to a subject/grade level, administrators must provide evidence of alignment to research-based learning standards.
- At least one of the measures must focus on student outcomes from subjects and/or grades not assessed on state-administered assessments.
- For administrators in high school, one measure must include the cohort graduation rate and the extended graduation rate, as defined in the State's approved application for flexibility under the Elementary and Secondary Education Act. All protections related to the assignment of school accountability ratings for cohort graduation rate and extended graduation rate shall apply to the use of graduation data for principal evaluation.
- For administrators assigned to a school in "review" or "turnaround" status, indicators will align with the performance targets set in the school's mandated improvement plan.

### **Step 3: Plan Implementation and Evidence Collection**

As the administrator implements the plan, he/she and the evaluator both collect evidence about the administrator's practice. For the evaluator, this must include at least two and preferably more, school site visits. Periodic, purposeful school visits offer critical opportunities for evaluators to observe, collect evidence and analyze the work of school leaders. At a minimum, fall, winter and spring visits to the school leader's work site will provide invaluable insight into the school leader's performance and offer opportunities for ongoing feedback and dialogue.

Administrator's evaluator may want to consult the following sources of evidence to collect information about the administrator in relation to his or her focus areas and goals:

- Data systems and reports for student information
- Artifacts of data analysis and plans for response
- Observations of teacher team meetings
- Observations of administrative/leadership team meetings
- Observations of classrooms where the administrator is present
- Communications to parents and community
- Conversations with staff
- Conversations with students
- Conversations with families

#### **Step 4: Mid-Year Formative Review**

Midway through the school year (especially at a point when interim student assessment data are available for review) is an ideal time for a formal check-in to review progress. In preparation for meeting:

- The administrator analyzes available student achievement data and considers progress toward outcome goals.
- The evaluator reviews observation and feedback forms to identify key themes for discussion.
- The administrator and evaluator hold a Mid-Year Formative Conference, with explicit discussion of progress toward student learning targets, as well as any areas of performance related to standards of performance and practice. The meeting is also an opportunity to surface any changes in the context (e.g., a large influx of new students) that could influence accomplishment of outcome goals; goals may be changed at this point. Mid-Year Conference Discussion Prompts are available on the SEED website.

#### **Step 5: Self-Assessment**

In the spring, the administrator takes an opportunity to assess his/her practice on all 18 elements of the CCL: Connecticut School Leadership Standards. For each element, the administrator determines whether he/she:

- Needs to grow and improve practice on this element;
- Has some strengths on this element but needs to continue to grow and improve;
- Is consistently effective on this element; or
- Can empower others to be effective on this element.

#### **Step 6: Summative Review and Rating**

The administrator and evaluator meet in the late spring to discuss the administrator's self-assessment and all evidence collected over the course of the year. While a formal rating follows this meeting, it is recommended that evaluators use the meeting as an opportunity to convey strengths, growth areas and their probable rating. After the meeting, the evaluator assigns a rating based on all available evidence.

#### **Ensuring Fairness and Accuracy: Evaluator Training, Monitoring and Auditing**

All evaluators are required to complete training on the SEED evaluation and support model. The purpose of training is to provide evaluators of administrators with the tools that will result in evidence-based school site observations; professional learning opportunities tied to evaluation feedback, improved teacher effectiveness and student performance. Norwalk has adopted the state rubric.

## Leadership Practice Related Indicators

The Leadership Practice Related Indicators evaluate the administrator's knowledge of a complex set of skills and competencies and how these are applied in leadership practice. It is comprised of two components:

Observation of Leadership Practice, which counts for 40%; and

Stakeholder Feedback, which counts for 10%.

### **Component #1: Observation of Leadership Practice (40%)**

An assessment of an administrator's leadership practice – by direct observation of practice and the collection of other evidence – is 40% of an administrator's summative rating.

Leadership practice is described in the Common Core of Leading (CCL) Connecticut School Leadership Standards adopted by the Connecticut State Board of Education in June of 2012.

- 1. Vision, Mission and Goals:** Education leaders ensure the success and achievement of all students by guiding the development and implementation of a shared vision of learning, a strong organizational mission and high expectations for student performance.
- 2. Teaching and Learning:** Education leaders ensure the success and achievement of all students by monitoring and continuously improving teaching and learning.
- 3. Organizational Systems and Safety:** Education leaders ensure the success and achievement of all students by managing organizational systems and resources for a safe, high-performing learning environment.
- 4. Families and Stakeholders:** Education leaders ensure the success and achievement of all students by collaborating with families and stakeholders to respond to diverse community interests and needs and to mobilize community resources.
- 5. Ethics and Integrity:** Education leaders ensure the success and achievement of all students by being ethical and acting with integrity.
- 6. The Education System:** Education leaders ensure the success and achievement of all students and advocate for their students, faculty and staff needs by influencing systems of political, social, economic, legal and cultural contexts affecting education.

As such, **Performance Expectation 2 (Teaching and Learning)** comprises approximately half of the leadership practice rating and the other five performance expectations are equally weighted.

## OBSERVATION PROTOCOL/SCHEDULE

Performance ratings will be based on evidence collected about leadership practice as described in the Common Core of Leading: Connecticut School Leadership Standards.

Performance ratings distinguish among at least four levels of performance and clearly identify administrator leadership actions related to improving teacher effectiveness, including conducting teacher evaluations.

Observation protocol distinguishes between observations required for principals, assistant principals and central office administrators in alignment with Guidelines and include the following requirements:

1. At least two school site observations for any administrator
2. At least four school site observations for administrators who are new to their district, school, the profession, or who have received ratings of developing or below standard.
3. Evaluators of assistant principals will conduct at least four observations.

For principals, the district weights the Teaching and Learning Standard at least twice as much as any other standard.

The other standards of practice have a weighting of at least 5% of the overall evaluation.

The plan requires weights to be determined at the goal-setting conference.

The evaluator is required to provide feedback on administrator performance during the mid-year conference and end-of-year conference.

Figure 3: Leadership Practice – 6 Performance Expectations

These weightings should be consistent for all principals and central office administrators. For assistant principals and other school-based 092 certificate holders in non-teaching roles, the six

performance expectations are weighed equally, reflecting the need for emerging leaders to develop the full set of skills and competencies in order to assume greater responsibilities as they move forward in their careers. While assistant principals' roles and responsibilities vary from school to school, creating a robust pipeline of effective principals depends on adequately preparing assistant principals for the principalship.

In order to arrive at these ratings, administrators are measured against the CCL Leader Evaluation Rubric which describes leadership actions across four performance levels for each of the six performance expectations and associated elements. The four performance levels are:

**Exemplary**: The Exemplary Level focuses on the concepts of developing capacity for action and leadership beyond the individual leader. Collaboration and involvement from a wide range of staff, students and stakeholders is prioritized as appropriate in distinguishing Exemplary performance from Proficient performance.

**Proficient**: The rubric is anchored at the Proficient Level using the indicator language from the Connecticut School Leadership Standards. The specific indicator language is highlighted in bold at the Proficient level.

**Developing**: The Developing Level focuses on leaders with a general knowledge of leadership practices but most of those practices do not necessarily lead to positive results.

**Below Standard**: The Below Standard Level focuses on a limited understanding of leadership practices and general inaction on the part of the leader.

Two key concepts, indicated by bullets, are often included as indicators. Each concept demonstrates a continuum of performance across the row, from below standard to exemplary.

Examples of Evidence are provided for each element of the rubric. While these Examples of Evidence can be a guide for evaluator training and discussion, they are only examples and should not be used as a checklist. As evaluators learn and use the rubric, they should review these Examples of Evidence and generate additional examples from their own experience that could also serve as evidence of Proficient practice.

Strategies for Using the CCL Leader Evaluation Rubric:

**Helping administrators get better**: The rubric is designed to be developmental in use. It contains a detailed continuum of performance for every indicator within the CCL: Connecticut School Leadership Standards in order to serve as a guide and resource for school leaders and evaluators to talk about practice, identify specific areas for growth and development, and have language to use in describing what improved practice would be.

**Making judgments about administrator practice:** In some cases, evaluators may find that a leader demonstrates one level of performance for one concept and a different level of performance for a second concept within a row. In those cases, the evaluator will use judgment to decide on the level of performance for that particular indicator.

**Assigning ratings for each performance expectation:** Administrators and evaluators will not be required to complete this rubric at the Indicator level for any self-assessment or evaluation process. Evaluators and administrators will review performance and complete evaluation detail at the Performance Expectation level and may discuss performance at the Element level, using the detailed Indicator rows as supporting information as needed. As part of the evaluation process, evaluators and school leaders should identify a few specific areas for ongoing support and growth.

**Assessing the practice of administrators other than principals:** All indicators of the evaluation rubric may not apply to assistant principals or central office administrators. Districts may generate ratings using evidence collected from applicable indicators in the CCL: Connecticut School Leadership Standards<sup>8</sup>.

**Performance Expectation 1: Vision, Mission and Goals**

Education leaders ensure the success and achievement of all students by guiding the development and implementation of a shared vision of learning, a strong organizational mission and high expectations for student performance.

**Element A: High Expectations for All**

Leaders\* ensure that the creation of the vision, mission and goals establishes high expectations for all students and staff\*\*.

## The Leader...

Indicator	Below Standard	Developing	Proficient	Exemplary
1. Information & analysis shape vision, mission and goals	relies on their own knowledge and assumptions to shape school-wide vision, mission and goals.	uses data to set goals for students, shapes a vision and mission based on basic data and analysis.	uses varied sources of information and analyzes data about current practices and outcomes to shape a vision, mission and goals.	uses a wide range of data to inform the development of and to collaboratively track progress toward achieving the vision, mission and goals.
2. Alignment to policies	does not align the school's vision, mission and goals to district, state or federal policies.	establishes school vision, mission and goals that are partially aligned to district priorities.	aligns the vision, mission and goals of the school to district, state and federal policies.	builds the capacity of all staff to ensure the vision, mission and goals are aligned to district, state and federal policies.

\*Leader: Connecticut School Leaders who are employed under their immediate administrator oga certificate (e.g., curriculum coordinator, principal, assistant principal, department head and other supervisory positions.)  
 \*\*Staff: All educators and non-certified staff

## **Arriving at a Leadership Practice Summative Rating**

Summative ratings are based on the evidence for each performance expectation in the CCL Leader Evaluation Rubric. Evaluators collect written evidence about and observe the administrator's leadership practice across the six performance expectations described in the rubric. Specific attention is paid to leadership performance areas identified as needing development.

This is accomplished through the following steps, undertaken by the administrator being evaluated and by the evaluator completing the evaluation:

The administrator and evaluator meet for a Goal-Setting Conference to identify focus areas for development of the administrator's leadership practice.

1. The administrator collects evidence about his/her practice and the evaluator collects evidence about administrator practice with a particular emphasis on the identified focus areas for development. Evaluators of administrators must conduct at least two school site observations for any administrator and should conduct at least four school site observations for administrators who are new to their district, school, the profession or who have received ratings of developing or below standard.
2. The administrator and evaluator hold a Mid-Year Formative Conference with a focused discussion of progress toward proficiency in the focus areas identified as needing development.
3. Near the end of the school year, the administrator reviews all information and data collected during the year and completes a summative self-assessment for review by the evaluator, identifying areas of strength and continued growth, as well as progress on the focus areas.
4. The evaluator and the administrator meet to discuss all evidence collected to date. Following the conference, the evaluator uses the preponderance of evidence to assign a summative rating of exemplary, proficient, developing or below standard for each performance expectation. Then the evaluator assigns a total practice rating based on the criteria in the chart below and generates a summary report of the evaluation before the end of the school year.
5. Central office administrators will create two goals and objectives aligned with CCSS or district assessments implementation and professional learning activities.

## Principals and Central Office Administrators:

Exemplary	Proficient	Developing	Below Standard
<i>Exemplary on Teaching and Learning</i> +	<i>At least Proficient on Teaching and Learning</i> +	<i>At least Developing on Teaching and Learning</i> +	<i>Below Standard on Teaching and Learning</i>  or
<i>Exemplary on at least 2 other performance expectations</i> +	<i>At least Proficient on at least 3 other performance expectations</i> +	<i>At least Developing on at least 3 other performance expectations</i>	<i>Below Standard on at least 3 other performance expectations</i>
No rating below <i>Proficient</i> on any performance expectation	No rating below <i>Developing</i> on any performance expectation		

## Assistant Principals and Other School-Based Administrators:

Exemplary	Proficient	Developing	Below Standard
<i>Exemplary on at least half of measured performance expectations</i> +	<i>At least Proficient on at least a majority of performance expectations</i> +	<i>At least Developing on at least a majority of performance expectations</i>	<i>Below Standard on at least half of performance expectations</i>
No rating below <i>Proficient</i> on any performance expectation	No rating below <i>Developing</i> on any performance expectation		

### Component #2: Stakeholder Feedback (10%)

Feedback from stakeholders – assessed by administration of a survey with measures that align to the CCL: Connecticut School Leadership Standards – is 10% of an administrator’s summative rating.

For each administrative role, the stakeholders surveyed should be those in the best position to provide meaningful feedback. For school-based administrators, stakeholders solicited for feedback must include teachers and parents, but may include other stakeholders (e.g., other staff, community members, students, etc.).

**Leadership practice surveys** focus directly on feedback related to a leader’s performance and the impact on stakeholders. Leadership Practice Surveys for principals and other administrators are available and there are also a number of instruments that are not specific to the education sector, but rather probe for information aligned with broader leadership competencies that are also

relevant to Connecticut administrators' practice. Typically, leadership practice surveys for use in principal evaluations collect feedback from teachers and other staff members.

**School climate surveys** cover many of the same subjects as school practice surveys but are also designed to probe for perceptions from stakeholders on the school's prevailing attitudes, standards and conditions. They are typically administered to all staff as well as to students and their family members.

**Component #3: Student Learning (45%)**

22.5% of the administrator's evaluation must be based only on student performance and/or growth on the state-administered assessments in core content areas that are part of the state's school accountability system and includes:

1) School Performance Index (SPI) progress from year to year

2) SPI progress for student subgroups

**NOTE:** For the 2015-16 academic year, the required use of state test data is suspended, pending federal approval.

22.5% of the administrator's evaluation is based on at least two locally-determined indicators of student learning. At least one of which includes student outcomes from subjects and/or grades not assess on state administered assessments.

Locally determined indicators are required to align to CT learning standards.

For administrators in high schools, selected indicators include the cohort graduation rate and the extended graduation rate.

For all school-based administrators, selected indicators are required to be relevant to the student population served by the administrator's school.

Turnaround schools or schools in review, indicators used for administrator evaluation are required to align with the performance targets set out in this school's mandated improvement plan.

**Component #4: Teacher Effectiveness Outcomes (5%)**

It is evident that 5% of the an administrator's summative rating is based on teacher effectiveness outcomes as measured by: (a) improving the percentage (or meeting a target of a high percentage) of teachers who meet the student learning objectives outlined in their performance evaluations (If this approach is used, district should ensure that the process for setting student learning objectives is rigorous); and/or (b) other locally-determined measures of teacher effectiveness.

## Improvement and Remediation Plans

If an administrator's performance is rated as *developing* or *below standard*, it signals the need for focused support and development. Improvement and remediation plans are developed during consultation with the administrator and his/her exclusive bargaining representative, when applicable. The plans are differentiated by the level of identified need and/or stage of development.

Norwalk has developed a system of stages or levels of support. For example:

**1. Structured Support:** An administrator would receive structured support when an area(s) of concern is identified during the school year. This support is intended to provide short-term assistance to address a concern in its early stage.

**2. Special Assistance:** An administrator would receive special assistance when he/she earns an overall performance rating of *developing* or *below standard* and/or has received structured support. An educator may also receive special assistance if he/she does not meet the goal(s) of the structured support plan. This support is intended to assist an educator who is having difficulty consistently demonstrating proficiency.

**3. Intensive Assistance:** An administrator would receive intensive assistance when he/she does not meet the goal(s) of the special assistance plan. This support is intended to build the staff member's competency.

An administrator may be moved into an improvement plan if any Connecticut School Leadership Standard needs improvement.

## Definition of Effectiveness and Ineffectiveness

Norwalk defines effectiveness and ineffectiveness as utilizing a pattern of summative ratings derived from the evaluation system. A pattern may consist of a pattern of one rating.

Novice administrators shall generally be deemed effective if said administrator receives at least two sequential proficient ratings, one of which must be earned in the fourth year of a novice administrator's career. A *below standard* rating shall only be permitted in the first year of a novice administrator's career, assuming a pattern of growth of developing in year two and two sequential proficient ratings in years three and four.

An experienced administrator shall generally be deemed ineffective if said administrator receives at least two sequential *developing* ratings or one *below standard* rating at any time.

## Dispute-Resolution Process

A panel, composed of the director of human services, administrators union president and a neutral third person, shall resolve disputes where the evaluator and teacher cannot agree on objectives/goals, the evaluation period, feedback on performance and practice, or final summative rating. Resolutions must be topic-specific and timely. Should the process established not result in resolution of a given issue, the determination regarding that issue will be made by the Superintendent.

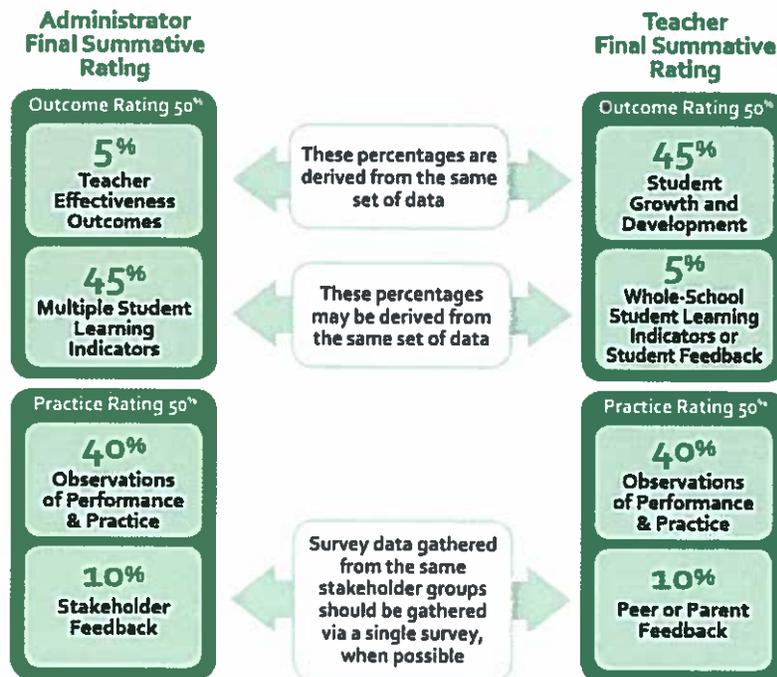

## Career Development and Growth

Rewarding exemplary performance identified through the evaluation process with opportunities for career development and professional growth is a critical step in both building confidence in the evaluation and support system itself and in building the capacity and skills of all leaders.

Examples of such opportunities include, but are not limited to: observation of peers; mentoring aspiring and early-career administrators; participating in development of administrator improvement and remediation plans for peers whose performance is *developing* or *below standard*; leading Professional Learning Communities; differentiated career pathways; and focused professional learning based on goals for continuous growth and development.

## Informed Professional Learning

Learning opportunities are clearly linked to the specific outcomes of the evaluation process as it relates to student learning results, observations of professional practice and/or the results of stakeholder feedback. This is linked to district mission and goals as outlined in each school growth plan.

## Overview of the Performance Expectations, Elements and Indicators

### **PERFORMANCE EXPECTATION 1: Vision, Mission, and Goals**

*Education leaders ensure the success and achievement of all students by guiding the development and implementation of a shared vision of learning, a strong organizational mission, and high expectations for student performance.*

**Element A. High Expectations for All:** Leaders ensure that the creation of the vision, mission and goals establish high expectations for all students and staff.

**Element B. Shared Commitments to Implement the Vision, Mission, and Goals:** Leaders ensure that the process of implementing and sustaining the vision, mission, and goals is inclusive, building common understandings and commitment among all stakeholders.

**Narrative**

Education leaders are accountable and have unique responsibilities for developing and implementing a shared vision of learning to guide organizational decisions and actions. The shared vision assists educators and students to continually develop the knowledge, skills and dispositions to live and succeed as global citizens. Education leaders guide a process for developing, monitoring, and refining a shared vision, strong mission, and goals that are high and achievable for every student when provided with effective learning opportunities.

The vision, mission, and goals include a global perspective and become the beliefs of the school community in which all students achieve. The vision, mission, and goals become the touchstone for decisions, strategic planning, and change processes. They are regularly reviewed and refined, using varied sources of information and ongoing data analysis.

To be effective, processes of establishing vision, mission, and goals incorporate diverse perspectives in the broader school community and create consensus to which all can commit. While leaders engage others in developing and implementing the vision, mission, and goals, it is undeniably their responsibility to also advocate for and act to increase equity and social justice.

## Sec. 10-145d-400a. Code of Professional Responsibility for Educators

### (a) Preamble

The Code of Professional Responsibility for Educators is a set of principles which the education profession expects its members to honor and follow. These principles set forth, on behalf of the education profession and the public it serves, standards to guide conduct and the judicious appraisal of conduct in situations that have professional and ethical implications. The Code adheres to the fundamental belief that the student is the foremost reason for the existence of the profession.

The education profession is vested by the public with a trust and responsibility requiring the highest ideals of professionalism. Therefore, the educator accepts both the public trust and the responsibilities to practice the profession according to the highest possible degree of ethical conduct and standards. Such responsibilities include the commitment to the students, the profession, the community and the family.

Consistent with applicable law, the Code of Professional Responsibility for Educators shall serve as a basis for decisions on issues pertaining to certification and employment. The code shall apply to all educators holding, applying or completing preparation for a certificate, authorization, or permit or other credential from the State Board of Education. For the purposes of this section, "educator" includes superintendents, administrators, teachers, special services professionals, coaches, substitute teachers, and paraprofessionals.

### PROFESSIONAL CONDUCT
