

CONNECTICUT STATE DEPARTMENT OF EDUCATION

The Early Indication Tool (EIT)

How to Interpret and Use the EIT Report

Presented by

Charles Martie, Ph.D.

David Alexandro

September 11, 2018

Goals for today's session

- EIT Overview
- Year in review: Pilot year for EIT Grades 1 to 6
- The year ahead:
 - Grades 7 to 9 EIT Model
 - Grades 10 to 12 EIT Model
 - 2018-19 rollout plan
- Getting the most out of the EIT Report
- Solicit feedback and suggestions
- Q&A

Primary Purpose of the EIT

To *allow for timely student interventions* by district/school staff with the ultimate goal of *improving student engagement and outcomes*

What does the EIT report?

- **Secure student-level data**
 - Demographics
 - Attendance Rates
 - Suspensions
 - Mobility
 - Achievement
 - Course performance
- **Targeted support level**
 - High, Medium, or Low

UChicago Consortium on School Research (CCSR)

Effective indicators are...

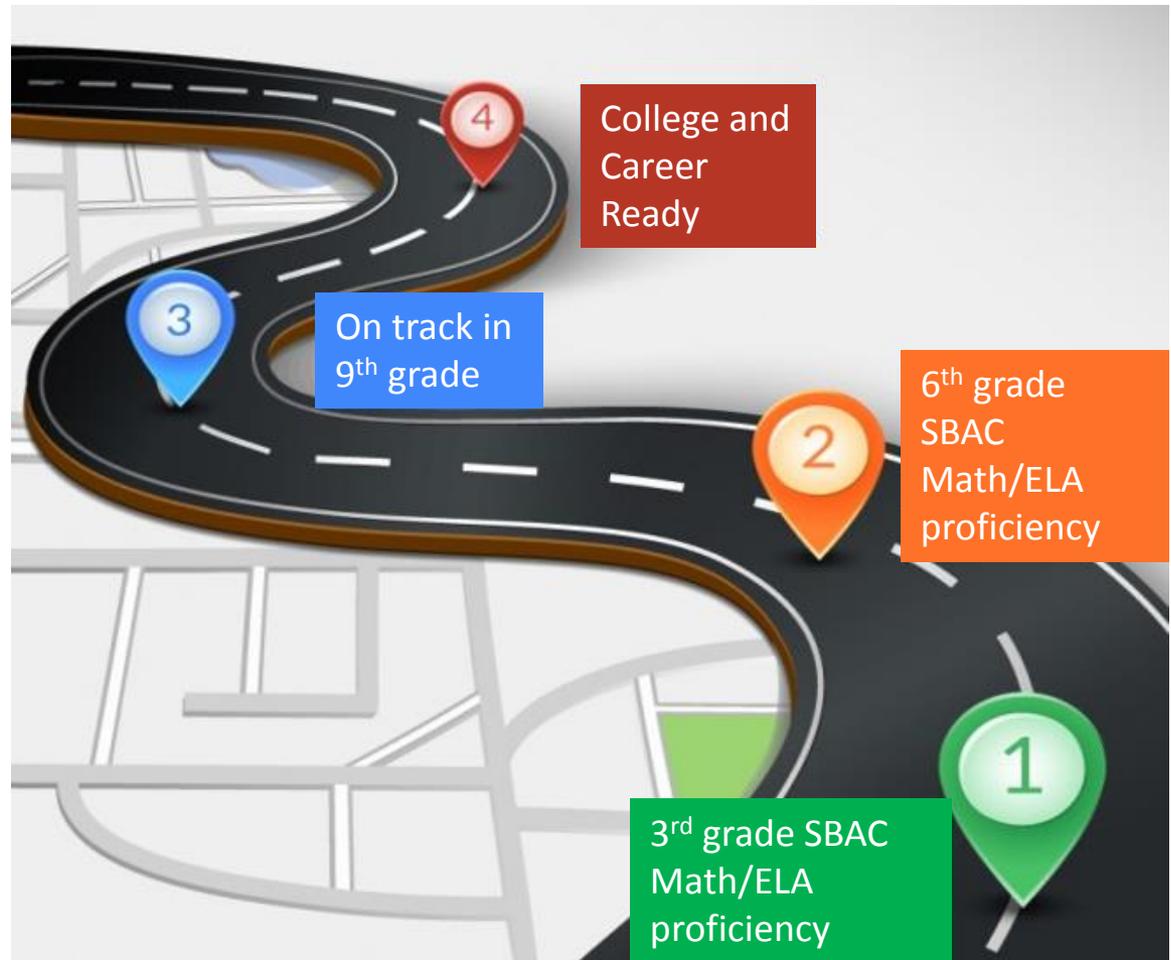

- Valid for the intended purpose
- Actionable by schools
- Meaningful and easily understood
- Aligned with district and school priorities

Source: CCSR (2014)

MILE MARKER APPROACH

Markers serve as **targets** for students, and as **dependent variables** in the EIT model

Attendance

Behavior

Demographics

Mobility

**Achievement
Tests**

**School
Indices**

**Course
Performance**

**District
Indices**

EIT Predictors (grade-invariant)

The following are included in all EIT models:

- **Attendance**
- **Behavior**
- **Mobility**
- **High Needs status**
- **Retention**

EIT Predictors (grade-dependent)

Variable	Model for Grades			
	1-3	4-7	8-9	10-12
<i>Assessments</i>				
Kindergarten Entry Inventory (KEI; Language, Literacy, Numeracy)	X			
SBAC ELA and Math		X	X	X
PSAT/SAT				X
CTAA		X	X	X
Course performance			X	X

Grades 1 to 6: Person-centered approach

- Describes **similarities and differences among individuals** with respect to *how variables relate to each other*
- Assumes that the population is *heterogeneous* with respect to the relationships between variables

Grades 1 to 6 EIT: Results

Relative to students in lower support levels, students in higher support levels* *on average* had:

- Lower Exam Scores
- Higher rates of:
 - Absenteeism
 - Discipline events
 - Mobility
 - Repetition

* *In ascending order, the support levels are Low, Medium, and High*

Grades 1 to 6 EIT: Results (continued)

Relative to students identified for Low support, students in need of High or Medium support were more likely to be:

- High Needs students
- Students with Disabilities
- English Learners
- Males

EIT Pilot Year Feedback

District users:

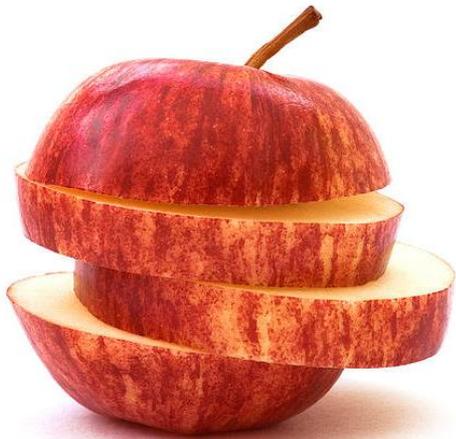

- Appreciated having a tool that allowed them to view and export two years of student data
- Found Support Level designations to be accurate
- Requested additional years of attendance data
- Would prefer to have the updated report available prior to course scheduling and student placements

LOOKING AHEAD

State of Connecticut

- 87.8% On-track to Graduate
- 87.4% 4-year Graduation Rate
(All Students; 2016 Cohort)
- Target: 94%

Getting
Focused

Criteria for *On-track in 9th grade* indicator

- **No more than one semester F in core courses (English, math, social studies, science)**
- **At least five full-year credits earned across all courses in Grade 9**

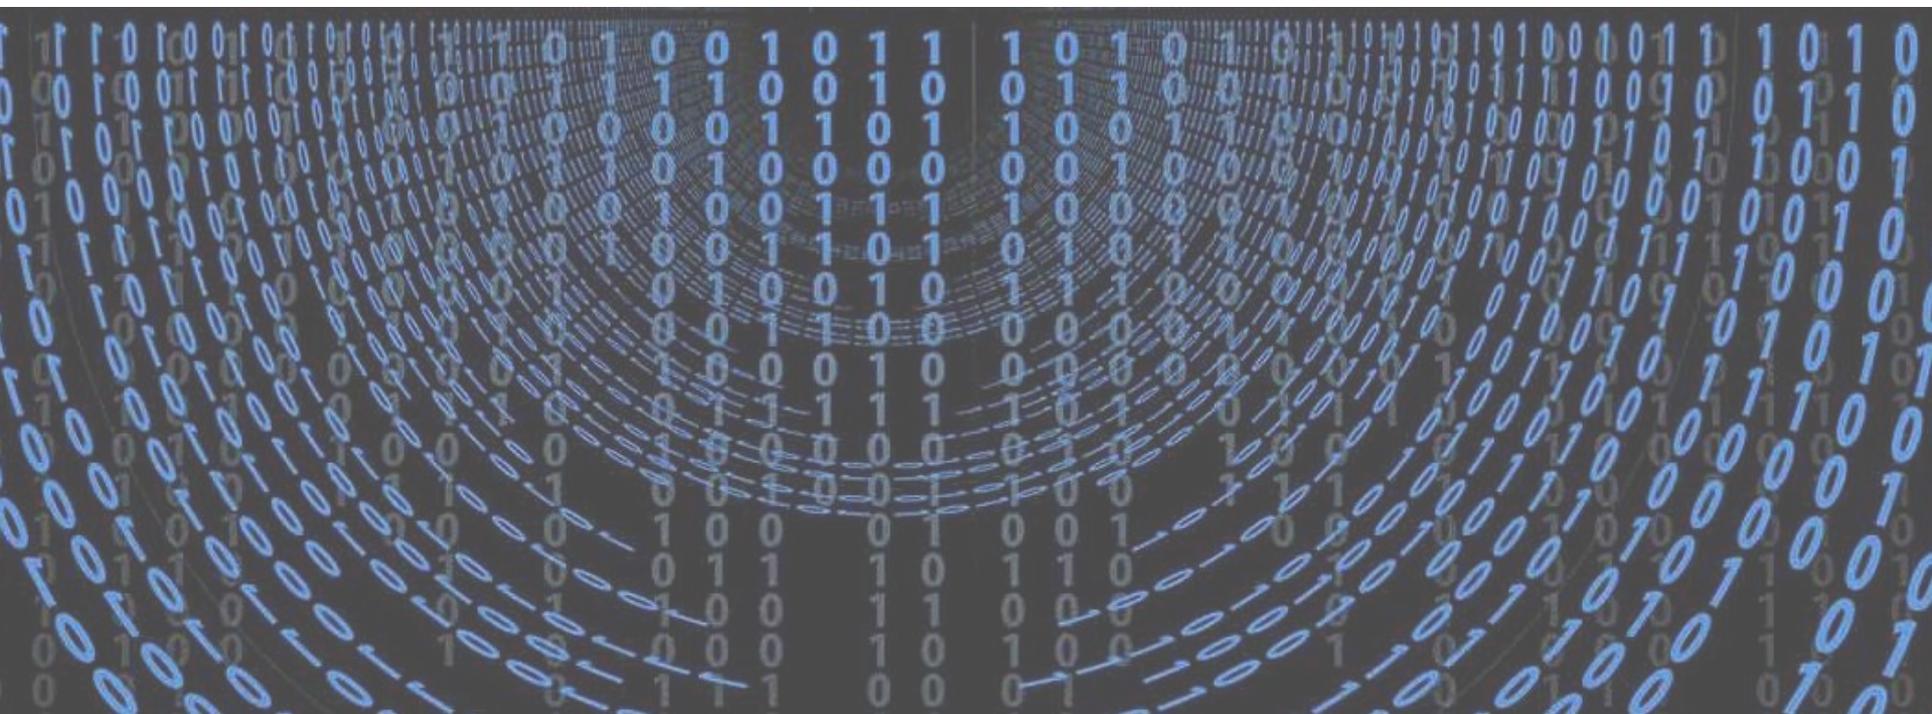

Off-track

Machine Learning

Data mining techniques and computer algorithms to understand patterns in data to solve problems

Classification

And

Regression

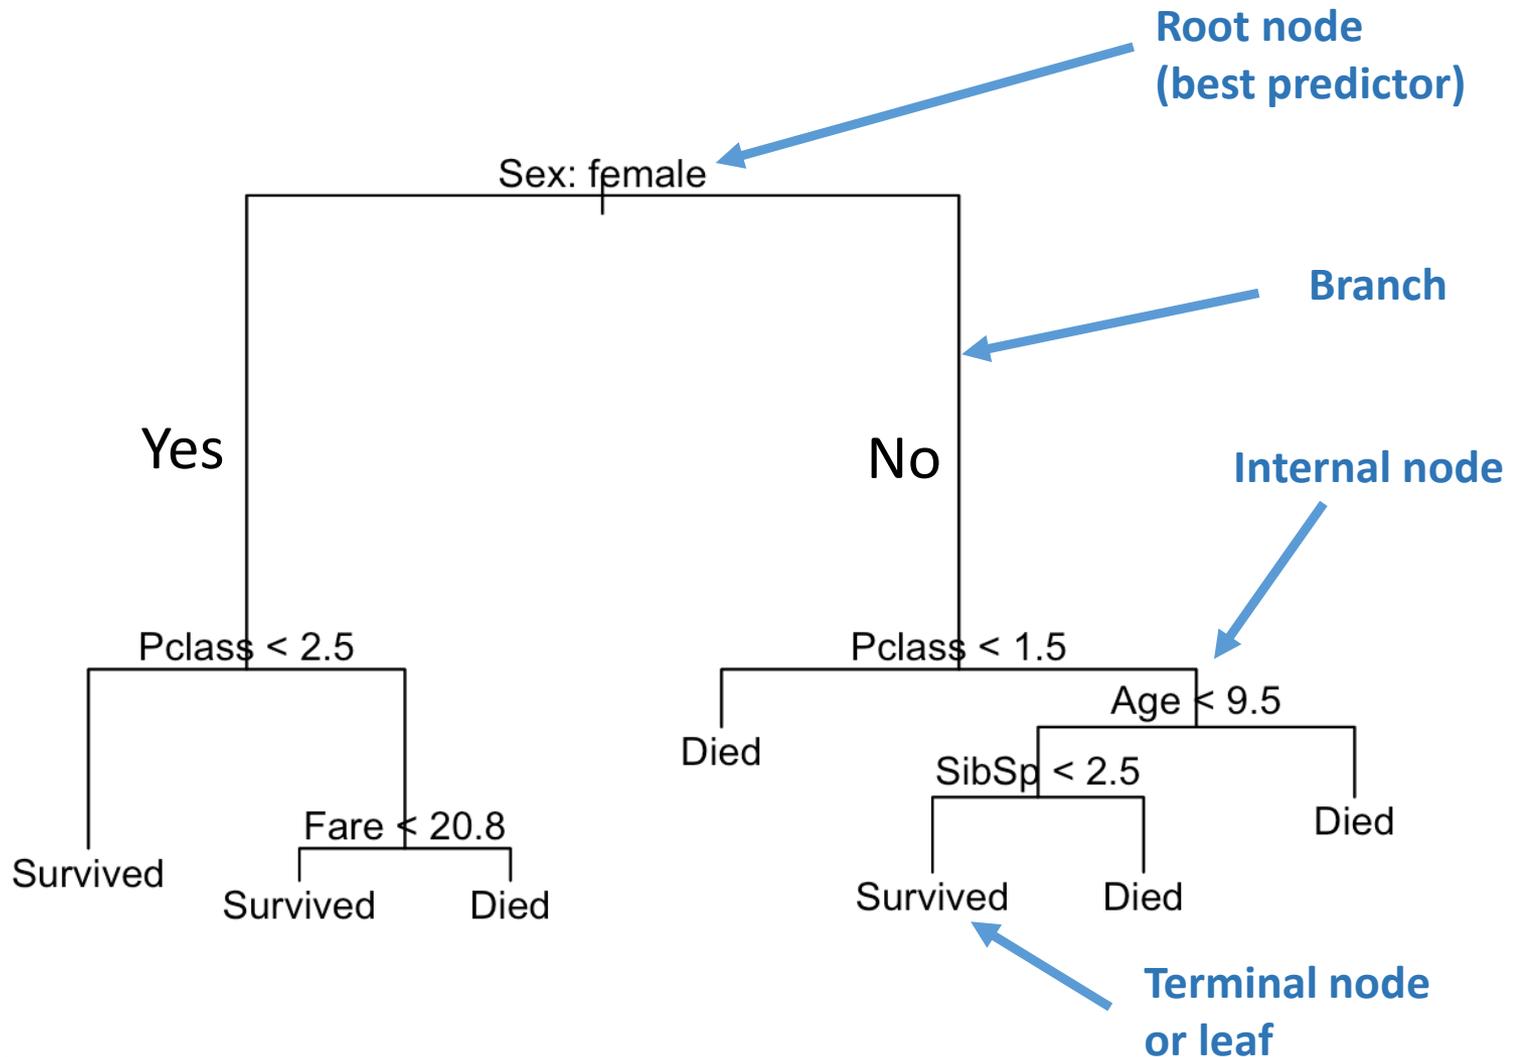

Trees

Classification (or Decision) Trees

- Supervised learning algorithm that predicts a categorical outcome (e.g., on-track)
- Only uses those predictors necessary to create the optimal decision tree
- Can report predicted class probabilities

Sample Tree: Titanic Survival

Random Forests

Random Forests

- Supervised learning algorithm that predicts a categorical outcome
- Ensemble method: Aggregates predictions of a “forest” of decision trees created using many random samples of **observations** and **predictors** from the training data
- Class probabilities = Proportion of “votes”

ADVANTAGES of Random Forests

- Decorrelates the decision trees
- Impressive predictive accuracy—even with large number of correlated predictors
- Not constrained by assumptions
- Can handle large numbers of variables and complex interactions
- All variables get a chance to shine

Graduation Rates

SWD

Subgroup	Four-Year Graduation Rate	Five-Year Graduation Rate
Students without Identified Disabilities	67.10%	69.60%
Two+ Years below Grade Level	45.50%	49.00%
Learning Disability	47.80%	52.70%
Mild Cognitive Disability	41.70%	47.20%
Emotional Disturbance	18.70%	23.50%
Speech/Language Disabilities	58.10%	63.50%
Physical/Sensory Disabilities	75.00%	77.50%

Source: Gwynne, J., Lesnick, J., Hart, H. M., & Allensworth, E. M. (2009)

Special Education K-12 Connecticut 2016-17

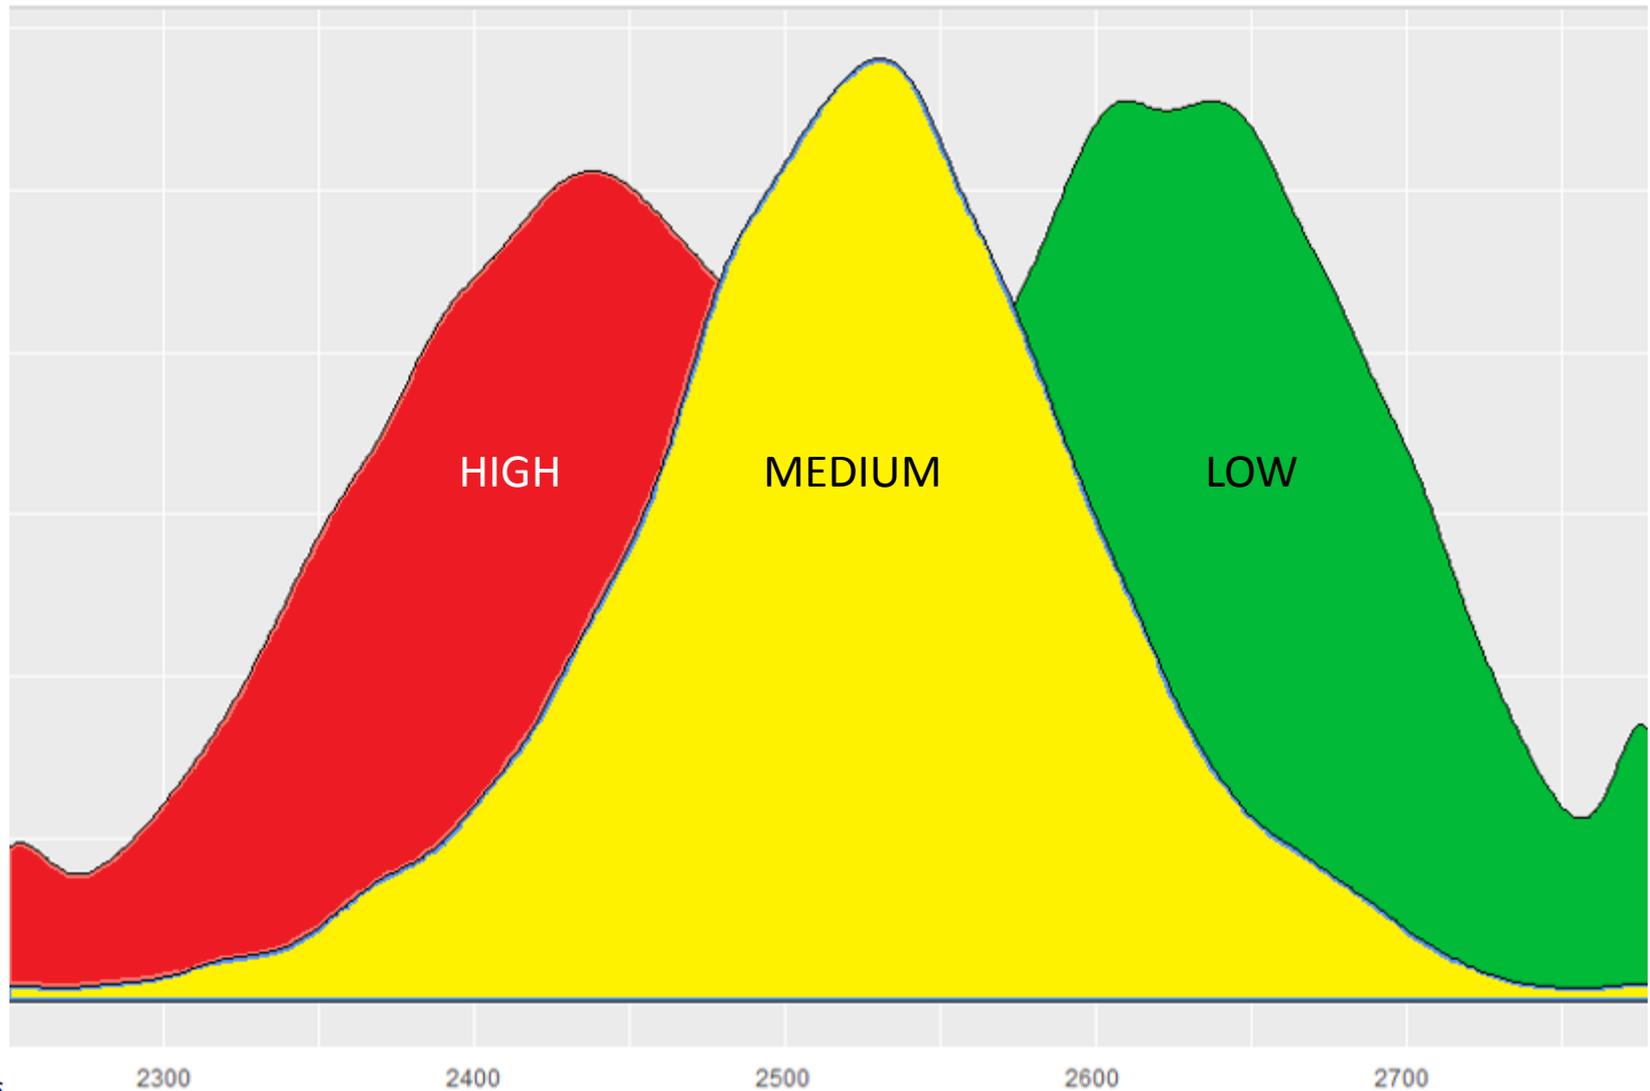

Disability	Overall Prevalence Rate (%)	Within Special Education Prevalence Rate (%)
All Disabilities	13.9	100.0
Autism	1.7	11.9
Emotional Disturbance	1.0	7.5
Intellectual Disability	0.5	3.5
Learning Disability	4.9	35.4
Other Disabilities	1.1	7.7
Other Health Impairment	2.9	20.9
Speech Language Impairment	1.8	12.9

ROLLOUT

- Timeline: Grades 1 to 12 will “go live” in November 2018
- Training webinars
- Encourage district feedback and input
- Continuous improvement of models and reports
- Expand the Targeted Support Library

- Feedback & Suggestions
- Questions

THANK YOU!

Charles.Martie@ct.gov

860-713-6809
