## Introduction

In spring 2011, the Connecticut State Department of Education (CSDE), Bureau of Special Education, conducted a statewide survey of parents of students receiving special education services, ages 3 through 21. The statewide survey is the continuation of an ongoing collaborative effort between the Bureau of Special Education and the Connecticut Parent Advisory Work Group to collect information on family satisfaction and parents' involvement in their child's special education program. The 2010-2011 statewide survey represents the final year of the six-year sampling protocol for the State Performance Plan (SPP).

The 2010-2011 CT Special Education Parent Survey Summary Report (expected to be available on the Department website by the end of 2011) will provide a comprehensive summary of findings from the statewide survey. This document is intended to provide supplementary district-level information to that report.

## Methods

District-level data in this report is presented in two formats; survey response tables and box-and-whisker charts. A summary description of both methods is presented below.

### Survey Response Tables

The survey response tables provide a district summary of survey responses organized by the six topic areas established on the survey questionnaire. For each survey item, the number of respondents (n) includes all parents who selected a survey response option other than “not applicable.” Confidentiality edits were applied to all survey items with five or fewer respondents per item. In addition, survey responses from six districts (Canaan, Eastford, Hampton, Hartland, Marlborough, and Regional School District 11) were aggregated into a single survey response table in order to meet the CSDE standard for confidential reporting of district-level data. This standard prohibits district-level data from being publicly reported if fewer than 20 survey responses are received from an individual district.

Across the 29 districts that received the 2010-2011 survey, there was considerable variation in the total number of surveys received; while at the same time, within districts, there was also considerable variation in the number of parents to respond to particular survey statements (most notably on statements regarding translation services, transportation, and transition planning). As such, comparisons of survey results, both across individual survey items and across participating districts, should be considered within this context. (See Appendix A for the survey response rate per district, and Appendix B for the overall distribution of survey responses.)

### Box-and-Whisker Charts

The box-and-whisker charts provide a visual snapshot (by survey item) of a district’s mean (average) score relative to the mean score of all other districts participating in the survey. The mean district score represents the average parent response scaled from 1 (strongly disagree) or dissatisfied to 6 (strongly agree) or satisfied.<sup>1</sup> The response options “not applicable” and “don’t know” were not included in the calculation of the mean score, as there is no intuitive ordering for these responses.

An illustration of how to interpret the box-and-whisker charts is provided in the diagram on the next page. A box for each survey item represents the middle 50% of districts and the middle (median) district score is represented by a black line within the box. The “whiskers” on the box represent the minimum and maximum mean scores across all districts and an individual district is represented by a round dot (●). Thus, if the district mean score was inside the box, it would be considered an average rating; if the district mean score was in the lower “whisker,” it would be considered a below average rating; and if the district mean score was in the upper “whisker,” it would be considered an above average rating.

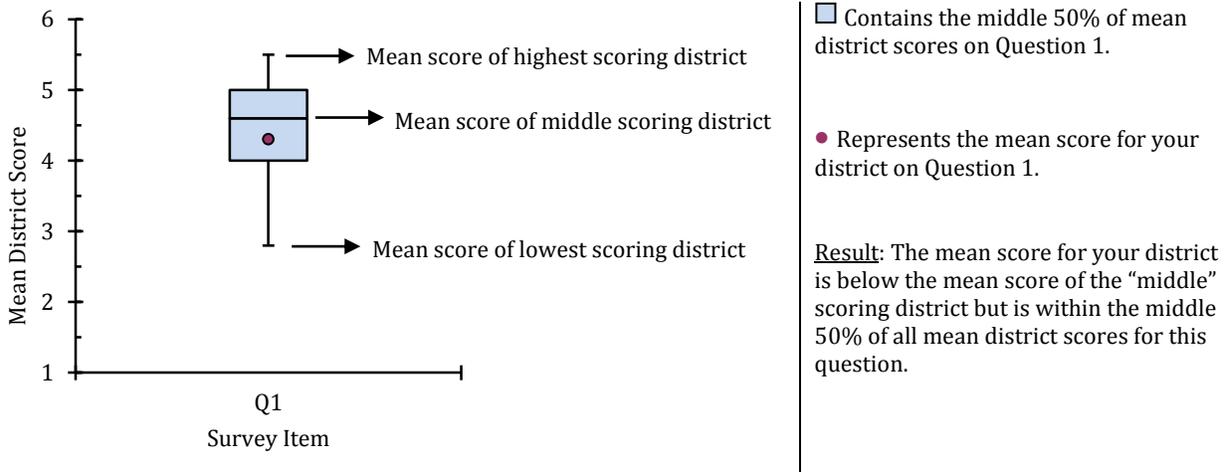

Any district with five or fewer respondents to a particular survey item was not included in the overall mean score for that item. If the round dot (●) representing a district is missing from a box-and-whisker chart, then this confidentiality edit was applied to that district for the respective survey statement. The responses of six districts (Canaan, Eastford, Hampton, Hartland,

---

<sup>1</sup> Survey items Q3, Q4, and Q26 are negatively keyed (6=strongly agree is equivalent to a high level of dissatisfaction); therefore, responses to these items were reverse-coded to maintain a consistent interpretation of mean scores.

Marlborough, and Regional School District 11) were aggregated into one box-and-whisker chart in order to meet the CSDE standard for confidential reporting of district-level data.

### How to Interpret Your Box-and-Whisker Chart

Note: The mean district score represents the average response scaled from 1 (strongly disagree) to 6 (strongly agree).

As stated previously, all comparisons (across survey items and across individual districts) should be examined with consideration given to the total number of survey respondents.<sup>2</sup> Although the number of survey respondents per item is not available on the box-and-whisker charts, it can be obtained (along with the wording of each survey item) from the response tables provided for each district.

<sup>2</sup> Two survey items (Q21 and Q22) were excluded from the analysis altogether due to the overall low number of parents to respond to these statements.

## District Survey Responses

### Brooklyn

The 2010-2011 survey was sent to 140 parents of children receiving special education services in the Brooklyn School District. A total of 42 surveys were returned for a response rate of 30.0%, above the overall survey response rate of 20.2% (n=1,870). (See Appendix A for the survey response rate per district.)

Note: The number of respondents (n) excludes those who selected "not applicable."

± Not a response option for this survey item.

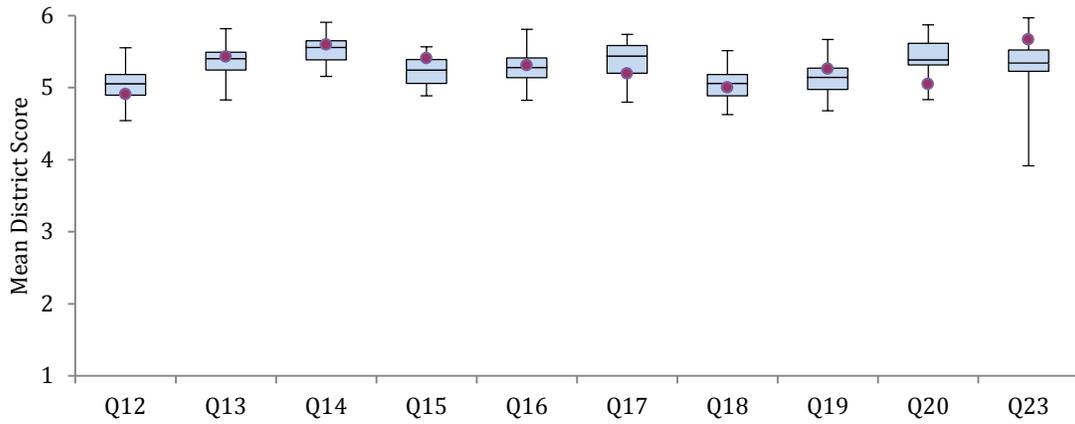

±± Minimum reporting standard not met for this survey item.

## Brooklyn Box-and-Whisker Charts

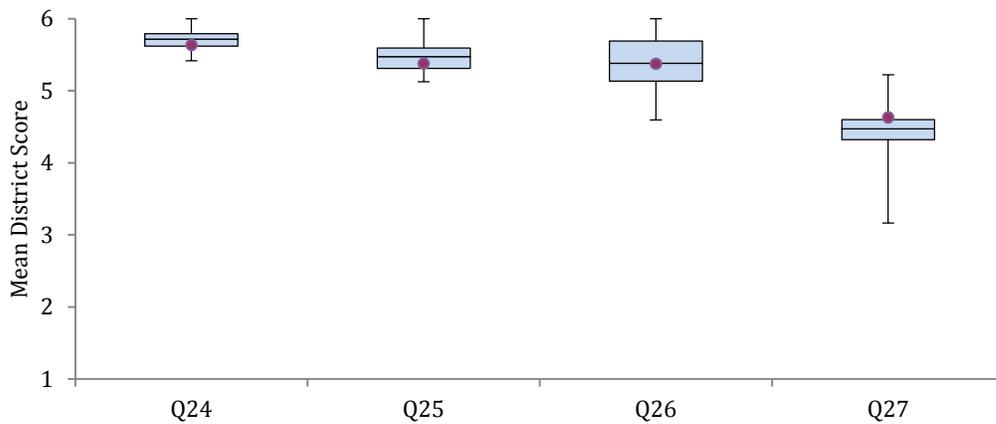

### Satisfaction with My Child's Program

### Participation in Developing and Implementing My Child's Program

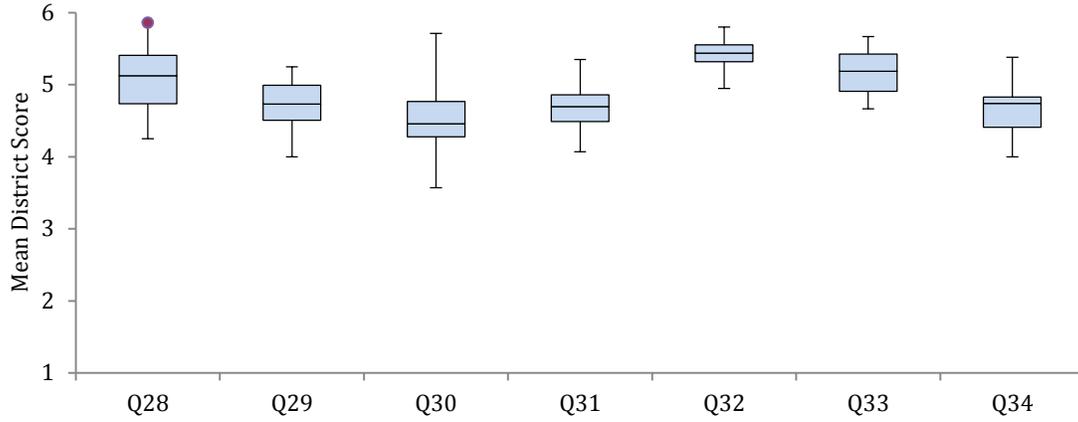

### My Child's Participation

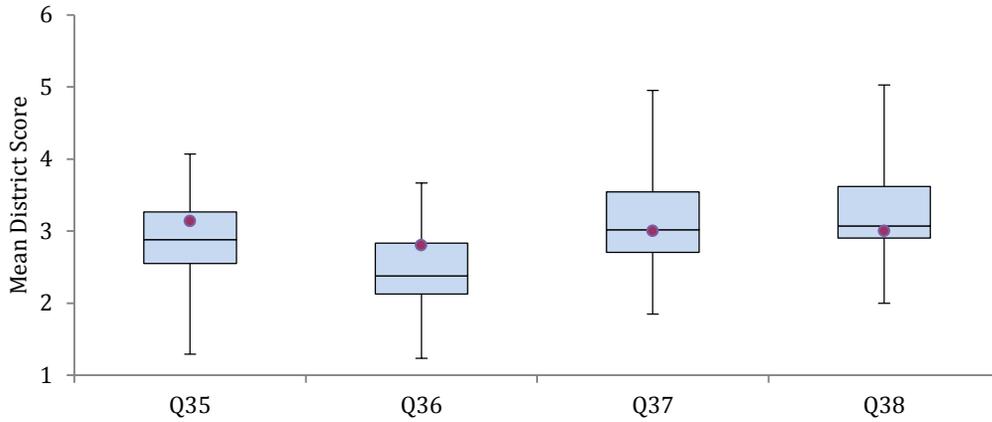

Note: The mean district score represents the average parent response scaled from 1 (strongly disagree) to 6 (strongly agree). Q3, Q4, and Q26 are negatively-keyed items and were reverse coded.

## Brooklyn Box-and-Whisker Charts (continued)

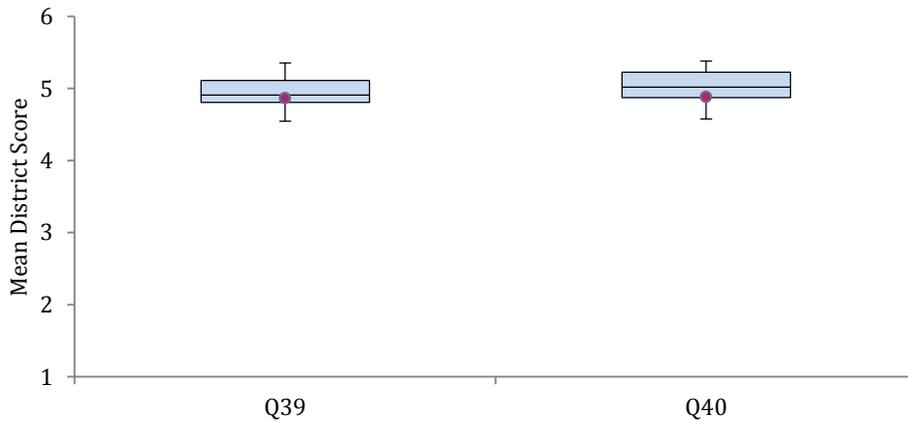

### Transition Planning

### Parent Training and Support

### My Child's Skills

Note: The mean district score represents the average parent response scaled from 1 (strongly disagree) to 6 (strongly agree). A district-level confidentiality edit was applied to Q29 through Q34.

## Clinton

The 2010-2011 survey was sent to 264 parents of children receiving special education services in the Clinton School District. A total of 54 surveys were returned for a response rate of 20.5%, above the overall survey response rate of 20.2% (n=1,870). (See Appendix A for the survey response rate per district.)

## Windsor Locks

The 2010-2011 survey was sent to 209 parents of children receiving special education services in the Windsor Locks School District. A total of 54 surveys were returned for a response rate of 25.8%, above the overall survey response rate of 20.2% (n=1,870). (See Appendix A for the survey response rate per district.)

## Districts with Fewer than 20 Responses

Survey responses from the school districts of Canaan, Eastford, Hampton, Hartland, Marlborough, and Regional School District 11 were aggregated into a single survey response table and box-and-whisker chart in order to meet the CSDE standard for confidential reporting of district-level data. This standard prohibits district-level data from being publicly reported if fewer than 20 survey responses are received from an individual district. (See Appendix A for the survey response rate per district.)

## Appendix A: Response Rate by District

The 2010-2011 survey was sent to a total of 9,251 parents of children receiving special education services across 29 districts. The overall survey response rate was 20.2% (n=1,870), with the response rate by district ranging from a low of 6.3% in Canaan School District to a high of 33.3% in the Hartland School District. A total of 523 surveys were returned undeliverable, representing 5.7% of the total mailing.

**Survey Response Rate by District Table**
