## **Analysis of Programming Effectiveness**

What are commonalities and unique functions of these programs?

How can we merge programming to maximize use of human and fiscal resources?

How can we establish coherence among all evidence-based programming utilizing SRBI framework?

| Initiative/Program | Purpose/Desired<br>Outcomes | Target<br>Audience | School/District<br>Improvement Goals<br>Addressed | Resources Needed<br>(e.g., staff/team,<br>time, space,<br>materials) | Source of<br>Funding | Research-<br>Base | Schools<br>Currently<br>Involved | Data Source/Evidence<br>of Impact on Student<br>Outcomes |
|--------------------|-----------------------------|--------------------|---|--|----------------------|-------------------|----------------------------------|--|
|                    |                             |                    |   |  |                      |                   |                                  |  |
|                    |                             |                    |   |  |                      |                   |                                  |  |
|                    |                             |                    |   |  |                      |                   |                                  |  |
|                    |                             |                    |   |  |                      |                   |                                  |  |
|                    |                             |                    |   |  |                      |                   |                                  |  |
|                    |                             |                    |   |  |                      |                   |                                  |  |
